CITY OF BURBANK MAP

Map displays the Top 10 Burbank Employers as reported in the Burbank Business & Economic Development Annual Report 2018-2019

INTRODUCTION

Burbank is a city built upon the fundamentals of People, Pride, and Progress. Over the years, these guiding principles have cultivated a safe, beautiful, and thriving community and transformed a rural town into the “Media Capital of the World”. Located just north of downtown Los Angeles, Burbank is home to Warner Bros. Entertainment, The Walt Disney Company, ABC, Cartoon Network Studios, Nickelodeon, and Netflix Animation. As a destination of choice for leisure and business travelers, the Hollywood Burbank Airport provides convenient and reliable transportation services for all. While Burbank is the site of much entertainment activity, it is also known for its strong sense of community and civic pride.

Due to Burbank’s central location in the region, convenient accessibility, and continued economic vitality, Burbank has evolved from a rural town into a thriving urban city of more than 107,000 residents, with a daily workforce population of more than 130,000. The residents of the City take pride in having reliable, sustainable, and affordable municipal electric and water utilities, police and fire services, recreational facilities and other high quality municipal programs and services. Burbank is known for its exceptional schools, tree lined neighborhoods, and a diverse business community.

As a full-service City, Burbank recognizes the need for active legislative engagement at the local, state, and federal levels to protect and enhance the interests of its residents and businesses. Accordingly, City officials maintain close relationships with Burbank’s state and federal representatives to advocate, influence, and monitor pertinent legislation.

The City of Burbank is committed to preserving local control and decision-making authority, along with state and local funding sources, and opposes unfunded or inadequately funded mandates, especially those that may be injurious to the character of its neighborhoods, the provision of community services, or the success of its business community.

Looking ahead to 2022, this Legislative Platform clearly outlines the position of the City of Burbank on priority issues in the coming year, from responsible development to sustainability measures, as well as resources for innovative transit and clean energy projects. Drafted in consultation with the City’s state and federal advocacy firms, the Legislative Platform is intended to assist the Mayor, Council Members, and staff to proactively and appropriately address legislation that may impact the City’s ability to operate effectively, while allowing the consideration of additional legislative and budgetary issues that arise during the legislative session. With the Legislative Platform as a guiding document, the City will continue to work with its constituents, consultants, and elected representatives to promote and preserve the City’s interests at the local, state, and federal level.

- 6. Net Energy Metering Programs** Support City Council authority over local net energy metering programs and policies that encourage clean sources of energy while equitably allocating costs.
- 7. Regionalization of Electrical Markets** Support legislation and regulation that would allow for the cost-effective and environmentally effective regionalization of electrical markets in the Western United States.
- 8. Transmission** Support legislation that provides financial assistance and allows for opportunity to build and/or own transmission in the LA Basin and throughout the U.S. to ensure grid reliability.

WE SUPPORT

- 1. **Delta Conveyance Project** Support administrative and legislative plans that foster the Delta Conveyance Project, a comprehensive ecosystem restoration and protection plan for the Delta, as the best alternative to meet California’s co-equal goals of water supply reliability and Delta ecosystem restoration.
- 2. **Cost-Effective Water Ecosystem Projects** Support state and federal funding for water ecosystem projects that enhance water quality and are cost-effective. Advocate for direct beneficiaries and cost causers to fund their fair share of infrastructure project costs that provide long-term benefits to the state and its inhabitants.
- 3. **Water Supply Projects** Advocate for state and federal funding for the construction of new water storage projects, both state-wide and locally, to increase water supply.
- 4. **Local Water Use Control** Support efforts to maintain and strengthen local control of water use and encourage water recycling and the many benefits of sustainability to Burbank’s water supply, conserving the vital resource of potable water, and reducing our dependence on imported water.
- 5. **Water Conservation** Actively pursue legislation and funding that support water conservation measures including awareness, residential and commercial customer assistance, water storage, and efforts to mitigate and plan for droughts, such as drought-resistant landscaping and permeable surfaces.
- 6. **Direct Potable Reuse** Support continued work on developing regulations for the implementation of Direct Potable Reuse.

WE OPPOSE

- 7. **Redistribution of Public Benefits** Oppose efforts by the state that would impose Public Benefit requirements on water utilities that transfer funding to the state for redistribution. Retain funding for Local Benefits efforts for exclusive local use.

- 1. **Veteran Funding and Initiatives** Proactively support and advocate for initiatives, partnerships, funding, and programs to ensure veterans and their families have access to holistic services and resources including, but not limited to, physical and mental health, affordable housing, employment, and education.
