City of Burbank Investment Portfolio Report for July 2023 Dated August 31, 2023

Dear City Council Members

Justin Hess, City Manager

Judie Wilke, Assistant City Manager

Jennifer Becker, Financial Services Director

Joe Lillio, CFO Burbank Water & Power

This report fulfills City, Youth Endowment Services Fund, Parking Authority, Public Financing Authority, Successor Agency to the Redevelopment Agency and Housing Authority resolutions.

CITY PORTFOLIO OVERVIEW

The City must maintain \$115 million in liquidity at all times (maturities within one year plus real estate taxes due from the County in April and December) to meet our projected budgeted expenditures. We currently have \$194 million in liquidity, with \$44 million in our account at the Morgan Stanley Institutional Liquidity Fund – Government Portfolio, \$41 million in our account at the California Asset Management Program, \$61 million in investments maturing within a year and \$48 million in real estate taxes due in April and December.

The City Investment Pool ended July at \$535 million, down from June's balance of \$553 million. This is primarily due to the \$45 million payment to CALPERS. Market value came in at 95.2% in July, slightly lower than 95.3% in June. The weighted average yield of the portfolio at the end of the month is 3.09%.

Credit News

On August 7, Moody's placed Truist Bank under review for downgrade (negative watch), stating that it "reflects several sources of strain on the US banking sector: funding pressures, regulatory capital weaknesses and rising risks associated with commercial real estate exposures. The review for downgrade of Truist reflects its comparatively low, though improving, level of capitalization along with weaknesses in the bank's asset-liability management. In addition, the review for downgrade reflects Moody's view that the stability of US banks' deposit funding has declined as reflected in the lowering of the US macro profile, a key input in bank ratings, all in the context of Truist's high ratings, with Truist Bank's a2 BCA two notches above the baa1 median BCA of Moody's rated US banks."

On August 7, Moody's placed Bank of New York Mellon under review for downgrade (negative watch), stating that it "reflects ongoing strain in the US banking sector, including increased funding pressures and potential regulatory capital weaknesses. There is some evidence of funding pressure at BNY, reflecting strains

in the operating environment. For example, average deposits declined 11% year-over-year in the second quarter, driven by declines in non-interest bearing deposits which have receded to 22% of average total deposits. At the same time, the bank's interest-bearing deposit costs continue to rise, with BNY exhibiting a relatively elevated beta compared to many highly rated bank peers. The affirmation of the long-term deposit ratings...with a stable outlook reflects Moody's assessment of a moderate probability for government support for depositors due to the company's large global custody footprint as well as its prominence in the tri-party repo market."

On August 7, Moody's placed State Street under review for downgrade (negative watch), also stating that it "reflects the ongoing strain in the US banking sector, including increased funding pressures and potential regulatory capital weaknesses. State Street's average deposits have declined by 9.9% over the last year through the second quarter of 2023, driven by a large 37.4% decline in average non-interest bearing deposits over the same period. At the same time, the bank's costs and deposit beta on its US dollar deposits have risen faster than most other large US-based global systemically important bank peers, though its costs and beta for non-US dollar deposits are lower than for its US dollar deposits. State Street's global custody and investment servicing franchise results in a highly liquid balance sheet... However, its securities-heavy balance sheet has also been impacted by higher interest rates. Favorably, Moody's believes that State Street's significant liquidity position, with cash and interest-bearing deposits with banks equal to 31% of total assets as of 30 June 2023, will help shield it from realizing losses on its securities portfolio."

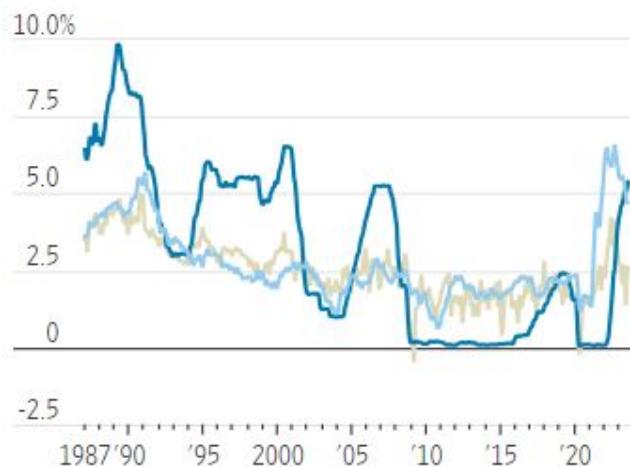

MARKET OUTLOOK

At the Jackson Hole Economic Symposium held this month, Fed Chair Powell reiterated that the central bank remains steadfast in its goal of bringing down inflation to its 2% target. In his speech, he emphasizes that "although inflation has moved down from its peak—a welcome development—it remains too high. We are prepared to raise rates further if appropriate and intend to hold policy at a restrictive level until we are confident that inflation is moving sustainably down toward our objective." He also mentions that it is still too early to tell whether the core Personal Consumption Expenditures inflation (which removes the volatile food and energy components) will continue on its trajectory (declining to 3.3% in July 2023 down from its peak of 7% in June 2022). He further notes that "getting inflation sustainably back down to 2% is expected to require a period of below-trend economic growth as well as some softening in labor market conditions. So far this year, GDP growth has come in above expectations and above its longer-run trend, and recent readings on consumer spending have been especially robust. Job openings have declined substantially without increasing unemployment—a highly welcome but historically unusual result that appears to reflect large excess demand for labor. Even as nominal wage growth has slowed, real wage growth has been increasing as inflation has fallen."

Average 30-year mortgage rates recently hit a 22-year high at 7.23%. Prices have not dropped, however, as homeowners are choosing not to put their homes on the market so they can hold on to the low mortgage rates they locked in during the pandemic. In July, the total number of existing single-family homes for sale was the lowest level since 1982. Serious delinquencies in the housing market are also at their lowest levels since before 2008, suggesting that prices will remain stable due to the low rate of foreclosures. With the tight supply, Zillow is now forecasting that home values will continue to appreciate into next year. The job market, however, has shown signs of cooling. US job openings fell more than expected in July to a 2-year low as companies pull back hiring. Layoffs remain unchanged though as companies choose to retain workers, and employees themselves are also mostly choosing not to leave with the quits rate edging lower to 2.3%, matching pre-pandemic levels.

Inflation and expectations

- 12-month core inflation rate
- Fed-funds rate
- Year-ahead inflation expectations

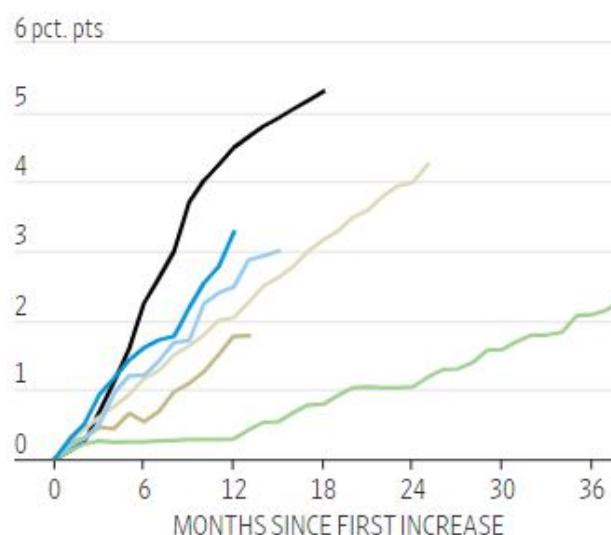

Note: Core inflation excludes food and energy prices

Sources: Labor Department (inflation); Federal Reserve (rates); Cleveland Fed (expectations)

Cumulative change in federal-funds rate since start of initial rate increase

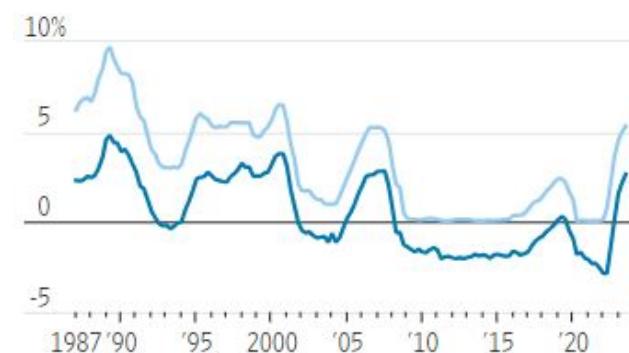

- 1988 ■ 1994 ■ 1999 ■ 2004
- 2015 ■ 2022

Investment Report | July 2023

INVESTMENT POLICY COMPLIANCE

I certify that the City's Investment Portfolio is in full compliance with the City's Investment Policy and California Government Code Section 53601, and I believe the Investment Pool contains sufficient cash flow from liquid and maturing securities, bank deposits, and income to meet the City's expenditure requirement for the next six months.
