City of Burbank Investment Portfolio Report for July 2020 Dated August 31, 2020

Dear City Council Members

Justin Hess, City Manager

Judie Wilke, Assistant City Manager

Cindy Giraldo, Financial Services Director

Bob Liu, CFO Burbank Water & Power

This report fulfills City, Youth Endowment Services Fund, Parking Authority, Public Financing Authority, Successor Agency to the Redevelopment Agency and Housing Authority resolutions.

CITY PORTFOLIO OVERVIEW

The City must maintain \$96 million in liquidity at all times (maturities within one year plus real estate taxes due from the County in April and December) to meet our projected budgeted expenditures. We currently have \$296 million in liquidity, with \$192 million in our account at the Local Agency Investment Fund (LAIF), \$59 million in investments maturing within a year and \$45 million in real estate taxes due in April and December. Higher liquidity levels continue to be maintained in anticipation of future cash outflows.

The City Investment Pool ended July at \$447 million, down from June's balance of \$480 million. This drop is mainly due to July's \$43 million in CALPERS payments which has generated significant annual cost savings through the implementation of our Multi-Year Pension Funding Plan. Market value increased from 102.28% in June to 102.51% in July. The weighted average yield of the portfolio at the end of the month is 1.75%.

Credit News:

On August 5, Moody's affirmed US Bancorp's ratings at A1 while revising its outlook to negative to reflect "the bank's weaker capital position as it continues to face coronavirus pandemic challenges... The US economy will contract in 2020 and grow modestly in 2021 as a result of the coronavirus outbreak, which will likely have a direct negative impact on USB's and other US banks' asset quality, capitalization, and profitability. Because of USB's higher ratings relative to peers, its rating position is more sensitive to deterioration."

On July 24, S&P's lowered the San Francisco City and County Airport Commission's rating from A+ to A stating it "reflects our view that enplanements have been significantly affected over the past few months of fiscal 2020 ended June 30. The rating action further reflects our view that enplanements will continue to be severely or materially depressed or unpredictable for fiscal 2021 and beyond as a result of the ongoing COVID-19 pandemic and associated effects that we believe are outside of management's control."

On August 7, S&P's affirmed San Francisco International Airport's ratings at A while placing it under negative watch stating that "the ongoing COVID-19 pandemic will result in materially depressed, unpredictable, or anemic passenger activity levels for an extended period, which is increasingly weakening the overall credit quality of U.S. airports and airport-related issuers... The airport sector is venturing into uncharted territory with likely slow systemwide passenger traffic growth; a smaller and weakened airline industry; and airport operators exposed to credit risk from a business model untested in the current, severely stressed operating environment. Time horizons, predictions regarding the evolution of the coronavirus pandemic, and related impacts remain highly ambiguous and we believe current airport financial forecasts based on estimates of passenger recovery scenarios are subject to considerable uncertainty."

MARKET OUTLOOK

The Federal Reserve held its annual economic policy symposium last August 27-28. Traditionally held behind closed doors in Jackson Hole, WY, the gathering was held online for the first time ever, allowing the public to view its proceedings. Federal Reserve chair Jerome Powell issued a revised statement on the central bank's long-term goals and strategy. One major change is a move to a "flexible form of average inflation targeting" which means the Federal Reserve will seek to achieve inflation that averages 2 percent over time. This means that "following periods when inflation has been running persistently below 2 percent, appropriate monetary policy will likely aim to achieve inflation moderately above 2 percent for some time." However, there is no particular mathematical formula or time period that defines this average. Rather, the Fed will use its judgement to reflect a broad array of considerations.

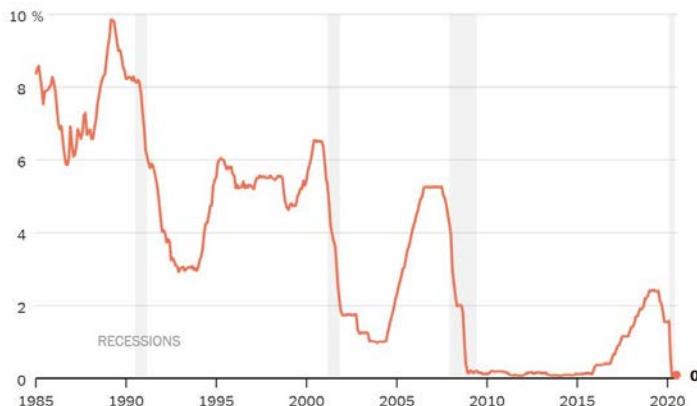

The other major change is an emphasis on maximum employment as a broad-based and inclusive goal. Powell explained that "this change reflects our appreciation for the benefits of a strong labor market, particularly for many in low- and moderate-income communities... Our policy decision will be informed by our "assessments of the shortfalls of employment from its maximum level" rather than by "deviations from its maximum level" as in our previous statement." What this means is that the central bank will make job growth a priority in the foreseeable future. The unemployment rate can be considered too high but never too low. This policy shift reflects the viewpoint that "a robust job market can be sustained without causing an outbreak of inflation."

By dropping its longstanding "inflation targeting" practice of preemptively increasing interest rates to guard against inflation, the Federal Reserve has continued to imply that interest rates would remain low for the foreseeable future, although the central bank has so far ruled out negative interest rates. While it may seem counterintuitive for the Fed to want higher inflation, the issue with low inflation is that it usually feeds into a cycle that results in even lower interest rates. If interest rates are already low during a normal economic environment, then the Fed would have less room to cut rates as necessary during times of crisis. This stagnation dynamic which the Fed wishes to avoid has already played out in many countries, including Japan, that have experienced low growth and low inflation for an extended period of time.

How Interest Rates Have Moved

Interest rates are near zero as the Federal Reserve tries to support the economy while the pandemic-induced downturn drags on.

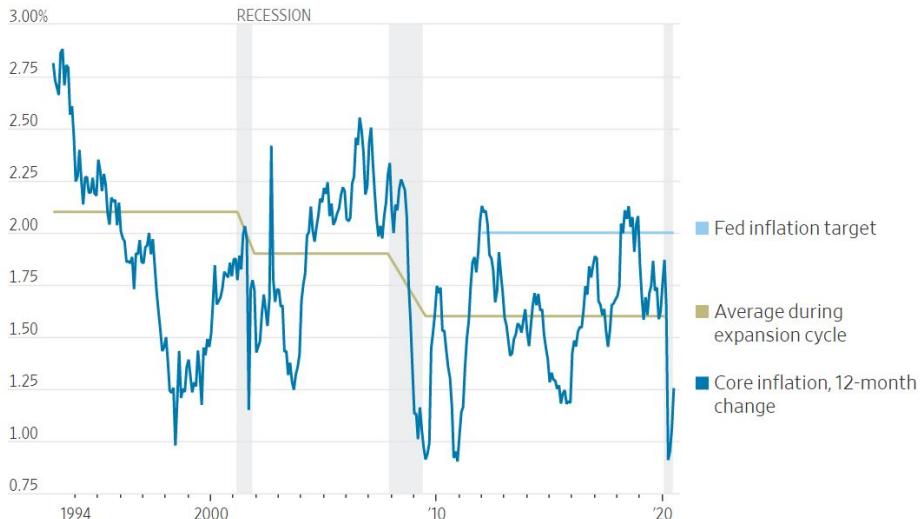

Effective federal funds rate

Source: Federal Reserve • Note: Monthly effective federal funds rate, not seasonally adjusted through July. • By The New York Times

Price Puzzle

Inflation during the expansion phase of the business cycle has trended lower, on average

Note: Core inflation excludes food and energy

Investment Report | July 2020

INVESTMENT POLICY COMPLIANCE

I certify that the City's Investment Portfolio is in full compliance with the City's Investment Policy and California Government Code Section 53601, and I believe the Investment Pool contains sufficient cash flow from liquid and maturing securities, bank deposits, and income to meet the City's expenditure requirement for the next six months.

The chart to the left shows relevant rates (LAIF, the 12-month moving average of the 2-year treasury, and portfolio current yield) as July 31, 2020, as well as current treasury yields and those from a year ago.

NOTE: Estimates for the interest earned on LAIF's loan to CalPERS (not allocated until just after the end of each quarter) are included in this month's LAIF yield. The effective rate of return published by LAIF was .92%; including an estimate of the bonus accrual for the loan to CalPERS, the yield reflected on the books for July is 1.07%. The rate of interest charged by LAIF on the CalPERS loan is the Constant Maturity 2-Year Treasury as of the last day of the quarter.
