City of Burbank Investment Portfolio Report for April 2025 Dated June 4, 2025

Dear City Council Members
Justin Hess, City Manager
Courtney Padgett, Assistant City Manager
Jennifer Becker, Financial Services Director
Joe Lillio, CFO Burbank Water & Power

This report fulfills City, Youth Endowment Services Fund, Parking Authority, Public Financing Authority, Successor Agency to the Redevelopment Agency and Housing Authority resolutions.

CITY PORTFOLIO OVERVIEW

The City must maintain \$124 million in liquidity at all times (maturities within one year plus real estate taxes due from the County in April and December) to meet our projected budgeted expenditures. We currently have \$373 million in liquidity, with \$136 million in our account at the California Asset Management Program, \$79 million in LAIF, \$3 million in our account at the Morgan Stanley Institutional Liquidity Fund – Government Portfolio, \$104 million in investments maturing within a year and \$51 million in real estate taxes due in April and December.

The City Investment Pool ended April at \$711 million, up from March's balance of \$690 million. Market value came in at 99.5% in April, slightly up from 99.1% in March. The weighted average yield of the portfolio at cost at the end of the month is 3.46%.

Credit News

On May 8, S&P's affirmed National Securities Clearing Corporation (NSCC)'s rating, and changed its outlook from stable to negative, stating that "clearing risks are evolving at National Securities Clearing Corp. (NSCC) following secular multi-year growth in equity trading activity which has increased risks during peak periods, increased concentration of that activity among the largest members, and implementation of the NSCC and Options Clearing Corp. accord in May 2024. NSCC is making investments in its risk management systems that will allow it to more accurately measure and forecast its "cover 2" stressed liquidity needs, but it's unclear whether the company will maintain sufficient liquidity to consistently meet hypothetical liquidity needs in a "cover 2" stress scenario (whereby the largest two clearing members default jointly). As a result, we revised the outlook to negative from stable and affirmed our 'AA+' long-term and 'A-1+' short-term issuer credit ratings on NSCC and related issue ratings on its debt. The negative outlook reflects our doubt that the company will meet hypothetical cover 2 liquidity needs with a high degree of confidence, even after investments in its risk management systems.

On May 14, Moody's downgraded the State of Maryland's rating from Aaa to Aa1, stating that "Maryland's Aa1 issuer rating reflects the state's wealthy and diverse economy and proactive financial management practices including a well-established tax revenue forecasting process and strong capacity to impose midyear spending cuts. The state recently addressed a trend of overspending in various programs through a combination of tax increases and restraints on expenditures. These actions closed a budget gap although the need for further corrective steps may arise directly from federal funding cuts or the economic consequences of federal layoffs and other policy shifts, to which Maryland has a very high degree of exposure. The state's financial reserves remain strong by its historical standards, although lower than those of Aaa-rated states."

On May 19, Moody's downgraded New York Life's rating from Aaa to Aa1, and changed its outlook from negative to stable, stating that it is "driven by the downgrade of the US Government's rating and the linkage of the company's credit profile and the US government from systemic risks that affect the US government's creditworthiness. Strong credit linkages exist between New York Life and the US Government in factors that affect business prospects, investment portfolios, earnings and capital generation--including their direct investment in US Government and government-guaranteed securities. New York Life is exposed to many of the same macroeconomic pressures and financial market conditions that affect a sovereign's creditworthiness. The company's investments, businesses, revenues and reserves are predominantly generated domestically in the US. New York Life's solvency and credit profile is also tied to its investment portfolio given the high asset leverage ratio (assets-to-equity), and the securities it invests in, including corporate credits, which are typically correlated with the US Government and/or economy. Over time, therefore, the insurers' underwriting and investment results are heavily influenced by US economic and market trends. We view the downgrade not to be reflective of any recent decline in New York Life's credit fundamentals, and we still believe that the company exhibits business and financial profiles consistent with the highest rating (Aaa). Moreover, we maintain a stable outlook on the US life insurance sector, driven by higher investment income from rising interest rates, and strong capital positions to help navigate the current economic environment. Therefore, any further weakening in the sovereign credit profile of the US Government also places downward pressure on the sector."

On May 19, Moody's downgraded Northwestern Mutual's rating from Aaa to Aa1, and changed its outlook from negative to stable, stating that it is also "driven by the downgrade of the US Government's rating and the linkage of the company's credit profile and the US government from systemic risks that affect the US government's creditworthiness... We view the downgrade not to be reflective of any recent decline in Northwestern Mutual's credit fundamentals, and we still believe that the company exhibits business and financial profiles consistent with the highest rating (Aaa)... The rating also reflects Northwestern Mutual's strong credit profile and our expectation that the company's exceptional intrinsic strengths, including leading positions and prominent franchise in the US life insurance market and strong distribution networks enables the company to withstand potential severe U.S. sovereign stress scenarios."

On May 19, Moody's downgraded National Securities Clearing Corporation (NSCC)'s rating from Aaa to Aa1, and changed its outlook from negative to stable, stating that "the rating actions were triggered by our downgrade of the US Government's long-term issuer rating to Aa1 from Aaa, with a stable outlook. This downgrade signaled that the US Government has a weaker capacity to support the US global systemically important financial market utilities (SIFMUs), including those SIFMU's that are owned by DTCC (Depository Trust & Clearing Corporation) including NSCC. The stable outlook associated with NSCC is consistent with the US Government's stable outlook. DTCC's and its clearing and depository agencies' long-term ratings and clearing counterparty ratings (CCR) that have been downgraded all previously incorporated one notch of US Government support uplift in their ratings constructs, and this notch of government support has now been removed. The creditworthiness of DTCC's SIFMUs is closely linked to the US Government's creditworthiness because of the very high likelihood that the US Government would provide support to the SIFMUs if needed, given their systemic importance; and because of NSCC's and FICC's extensive use of US Treasury and government agency securities as collateral in their activities. A weakening of the US Government's creditworthiness adversely affects its ability to support DTCC's SIFMUs; and the associated weakening of US Treasury and government agency securities' collateral used in supporting their clearing functions weakens the creditworthiness of FICC and NSCC. These factors in turn weaken DTCC's creditworthiness, since DTCC holding company creditors are structurally subordinated to its subsidiaries, including the SIFMUs. Accordingly, DTCC's ratings were downgraded to continue to reflect its level of structural subordination to its SIFMUs."

On May 21, S&P's affirmed The Hershey Corporation's rating, and changed its outlook from stable to negative, stating that "We expect U.S.-based The Hershey Co.'s leverage to increase to the mid-2x area by the end of fiscal 2025 because of weakening profitability attributable to elevated cocoa costs and acquisitions. While management has confirmed its commitment to its 1.5x-2.0x target leverage, we believe its ability to restore leverage near these levels is at risk as cocoa prices remain high and the company remains open to acquisitions. We are affirming our 'A' issuer credit rating and 'A-1' short-term and commercial paper ratings and revising our outlook to negative from stable. The negative outlook reflects the risk that we could lower the ratings if Hershey is unable to restore leverage to the low-2x area over the next 24 months."

MARKET OUTLOOK

Markets continue their increasing concern over the growing Federal deficit and overall national debt. On May 16, the US government lost its last triple-A credit score from a major international ratings firm after a downgrade by Moody's. (S&P's downgraded the US in 2011, and Fitch also did in 2023.) With the latest downgrade, Moody's explained that "successive US administrations and Congress have failed to agree on measures to reverse the trend of large annual fiscal deficits and growing interest costs. We do not believe that material multi-year reductions in mandatory spending and deficits will result from current fiscal proposals under consideration. Over the next decade, we expect larger deficits as entitlement spending rises while government revenue remains broadly flat." While the downgrade has had limited impact as the US continues to be viewed as highly unlikely to default and with both the US dollar and US Treasuries still considered the world's safe havens, some investors are now avoiding the longer 30-year US Treasury bonds with the belief that interest rates will need to increase a lot more to provide additional compensation for holding longer maturities. More recently, JP Morgan CEO Jamie Dimon also warned that with the worsening fiscal situation in the US, "cracks in the bond market" are going happen, whether it is in several months or several years. The trend is not limited to the US, with other advanced economies like Japan and Germany also borrowing more money to fund their deficits.

Meanwhile, US consumer sentiment remain near historic lows as there continues to be a lot of uncertainty about the country's economic outlook. Tariffs and the potential for higher prices remain a major driver of negative sentiment as people now expect prices to grow over 7% in the next year, the highest inflation expectation since 1981. Businesses are still unclear where their costs will ultimately be especially as tariff policies change regularly. While some tariffs are on hold, for example, some businesses are trying to quickly rush their imports to take advantage of relatively lower tariff rates. Even as the courts have ruled that many of the tariffs are unconstitutional and while the administration has appealed, there are other legal avenues where individualized tariffs may still be implemented. More recently, the President said he would double tariffs on imported steel and aluminum. In addition, tariff talks with the EU and China remain up in the air. While job openings increased unexpectedly in April, layoffs also increased. The housing sector remains sluggish with 30-year fixed mortgage rates still close to 7%, and pending home sales near all-time lows. Consumers are now cutting back on vacation spending, with some opting to drive locally, instead of flying, to save money. In their last meeting in early May, the Federal Reserve reiterated their "wait and see" policy stance, expressing their concern that tariffs may bring about higher prices while slowing economic growth, potentially resulting in stagflation.

CITY OF BURBANK
OFFICE OF THE CITY TREASURER
 Investment Report | April 2025

INVESTMENT POLICY COMPLIANCE

I certify that the City's Investment Portfolio is in full compliance with the City's Investment Policy and California Government Code Section 53601, and I believe the Investment Pool contains sufficient cash flow from liquid and maturing securities, bank deposits, and income to meet the City's expenditure requirement for the next six months.
