Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction - Site Inspection/Visit  
Completed Date: 03/26/2012  
Comments: 3/22/2012, DTSC's PM visited the site, and performed walk through of the site with Mr. Sergik Avakian representing the American Best Engineering, the current operator at the site. It was observed that the restricted area as defined by the LUC is in full compliance with the stipulated terms in the LUC. Mr. Avakian mentioned that he is renting/lease the site from a new owner. On 3/26/2012 DTSC's PM contacted Mr Richard Fond, and was confirmed Mr Fond sold the property on March 2012. DTSC's PM requested Mr Fond to advise DTSC regarding the particulars on the ownership transfer as required by the LUC, Mr. Fond will respond to the request.

Quarterly Update:

Alumtreat manufactured from 1973 to 1992 anodizing aluminum parts for the construction industry. The facility covers an approximate rectangular area 100 x 400 feet. Alumtreat generated waste water and sludge from the anodizing process. Waste water was treated in an on-site clarifier prior to discharge to the City of Burbank Sewer System and sludges were stored in drums in a secondary containment area prior to off site disposal. These units were permitted by DTSC as an on-site interim status facility pursuant to the California Hazardous Waste Control Law Health & Safety Code 25100 et seq., and the Federal Resource Conservation and Recovery Act 42 U.S.C. 6901 et seq. Operations ceased in 1992 when the City of Burbank suspended Alumtreat's waste water discharge permit. Alumtreat submitted a Closure Plan to DTSC for closure of the two regulated units which were a hazardous waste drum storage area and the clarifier. The Closure Plan was approved in 1995. The property owner implemented the closure plan approved by DTSC for closure of the hazardous waste storage & treatment units and other solid waste management units. Certain heavy metals remain in the soils in the area formerly occupied by the aluminum anodizing process tanks. A land use covenant with a provision to run with the land was signed in August 1997. Annual site inspections are conducted to ensure that the land use remains unchanged. 10/18/2017 Closure Administrative: This facility is a duplicate of CAD009561911. The CAD009561911 EPA ID # was already Clean Closed and there was a closure document present. Closed administratively due to being a duplicate.

Quarterly Update:	Inactive Facility - Landuse covenant. The Alumatreat, Inc, facility manufactured anodized aluminum parts for the construction industry. The facility generated waste water and sludge from the anodizing process. Waste waters were treated in an onsite clarifier prior to discharge to the sewer system, and sludges were stored in a secondary containment area prior to off-site disposal. Operations at the facility ceased on March 11, 1992. Alumatreat submitted a RCRA Part A Permit Application in November 1980. An Interim Status Document was issued in August 1983 to Alumatreat for treatment and storage of hazardous waste onsite in two solid waste management units (SWMUs). In August 1994, Alumatreat submitted a closure plan for proper closure of the SWMUs. Closure certification was accepted in August 1997. A covenant to restrict use of the property was recorded on September 19, 1997.

Facility Project Subtype:	Not reported
RWQCB Region:	LOS ANGELES RWQCB (REGION 4)
Site History:	The site is currently an active metal processing facility, operated by Senior Aerospace SSP. Historical operations at the site also include metal fabrication and the use of caustics, acids, solvents, ammonium nitrate, and lubricants by the former Stainless Steel Products. An SVE system operated at the site from 1998 through 2002 to treat VOCs in the subsurface. An NFA was issued in April 2005 for VOCs in soils only. A California Water Code 13267 Order was issued in June 2013 to Breeze-Eastern, Senior Aerospace (current occupant), William Zimmerman and James Galbraith to conduct a subsurface investigation for potential chromium and hexavalent chromium impact. An Order was issued to Breeze-Eastern and Senior Aerospace for groundwater monitoring at the site. Breeze-Eastern has conducted site investigation for heavy metals. The site is being reviewed for a soils-only closure for metals. A Notice of Opportunity to Comment was issued to adjacent properties on 7/12/2016 and no comments were received. The Site was issued an NFR for soils on 8/25/16. Groundwater monitoring is ongoing.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 RWQCB Region: LOS ANGELES RWQCB (REGION 4)  
 Site History: Space-Lok, Inc. occupied the site (Site) from approximately 1962 to 1996, producing primarily aircraft fasteners. Aqueous finishing was only conducted in the building located in the southeastern portion of the Site. Solid sodium-dichromate was documented to have been stored inside the building. Subsurface soil investigations for heavy metals were conducted in June 2013 and July 2014. All CrVI detections were below the commercial/industrial RSL of 6.3 mg/kg. Concentrations of CrVI slightly exceeding the residential RSL of 0.3 mg/kg (0.45 mg/kg and 0.72 mg/kg) are shallow and limited in extent (one boring).

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System:**

**HAZARDOUS AIR POLLUTANT MAJOR**  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RWQCB Region: LOS ANGELES RWQCB (REGION 4)  
Site History: Site assessments indicated elevated concentrations of PCE and TCE in the vadose zone in the northwest portion of the site near a former AST. An NFR letter was issued on November 16, 1995 excluding the VOC-contaminated northwest area. An SVE system operated intermittently between 1997 and 2002. PCE, TCE, and 1,1-DCE were significantly reduced compared to baseline concentrations and asymptotic conditions were attained. VLEACH modeling indicated that residual VOCs will not further degrade groundwater quality beneath the site. The Regional Board issued an NFR for soils letter on February 7, 2003. LMC monitors and treats the groundwater in the BOU on an ongoing basis with oversight by USEPA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Hazardous Waste Summary:

Waste Code: D001  
Waste Description: Ignitable Waste

Waste Code: D002  
Waste Description: Corrosive Waste

Waste Code: D003  
Waste Description: Reactive Waste

Waste Code: D005  
Waste Description: Barium

Waste Code: D006  
Waste Description: Cadmium

Waste Code: D007  
Waste Description: Chromium

Waste Code: D008  
Waste Description: Lead

Waste Code: D035  
Waste Description: Methyl Ethyl Ketone

Waste Code: F002  
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane,

Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003  
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006  
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007  
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F009  
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

RWQCB Region: LOS ANGELES RWQCB (REGION 4)

Site History: AH Plating is located at 1837 Victory Place in Burbank, CA. The Los Angeles County Assessor's parcel number for the property is 2464-017-010. A.H. Plating currently conducts electroplating operations primarily servicing the aviation industry. The facility has been in operation under the current owners for approximately 31 years. Prior to the AH Plating ownership, the property was owned and operated by Sun Valley Machine, Inc. from 1966 to through 1978. The plating facility consists of a one-story production building situated on the northern half of the property and an equipment storage area in the southern portion of the property. Plating operations are conducted in open-top plating tanks situated within concrete-lined containment areas within the production building. AH Plating conducts three principal metal coating operations including chromium plating, nickel plating, and cadmium plating.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RISK AND TECHNOLOGY REVIEW  
HAZARDOUS AIR POLLUTANT MAJOR  
STATE MASTER

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Waste Code: D035  
Waste Description: Methyl Ethyl Ketone

Waste Code: F001  
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006  
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

**WDS:**

Name: STEVES PLATING CORP  
Address: 3111 N San Fernando Blvd  
City: BURBANK  
Facility ID: 4 19I016820  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 4  
Facility Telephone: 8188422184  
Facility Contact: STEPHEN DALE KNEZEVICH  
Agency Name: STEVES PLATING CORP  
Agency Address: 3111 N San Fernando Blvd

Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Military DOD Site: No  
Facility Project Subtype: Not reported  
RWQCB Region: LOS ANGELES RWQCB (REGION 4)  
Site History: The Lockheed Martin Corporation was subject to CAO No. 1987-161 issued to Lockheed Aeronautical Systems Company on Dec. 17, 1987. Beginning in 1997 and through 2008, SVE was used to extract approx. 184,000 pounds of VOCs to residual concentrations. Former Plant B1 occupied approx. 100 acres southwest of the Bob Hope Airport. It was in use by Lockheed between 1928 and 1991 with operations entailing completed parts fabrication and subassembly, including tooling, parts shaping, machining, plating, deburring, cleaning, and painting. An investigation was conducted under a 13267 Order No. R4-2013-0063 issued on April 18, 2013 to delineate the extent of VOCs and CrV in the subsurface and groundwater.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<b>Relative:</b> <b>Higher</b>  <b>Actual:</b> <b>679 ft.</b>	<b>CA BOND EXP. PLAN:</b> Reponsible Party: RWQCB REFERRAL SITE Project Revenue Source Company: Not reported Project Revenue Source Addr: Not reported Project Revenue Source City,St,Zip: Not reported Project Revenue Source Desc: The PRP is providing for the remediation of the site under RWQCB lead and will pay all costs associated with site cleanup. There are no current plans for expenditure of Bond funds for the site.  Site Description: The site is the location of an aircraft manufacturing facility constructed in the late 1930's and early 1940's. Operational activities include aircraft research, manufacturing and maintenance. Hazardous materials which are used at the facility include plating solutions, acids, fuels, and solvents.  Hazardous Waste Desc: The facility overlies the San Fernando Valley Ground Water Basin. Analysis of monitoring wells on the facility and downgradient has revealed contamination of the ground water by perchloroethylene (PCE) and trichloroethylene (TCE). Concentrations of PCE vary from approximately 20 to 12,000 parts per billion (ppb) and from approximately 20 to 1,600 ppb for TCE. Other compounds detected at low levels are acetone, chloroform, methyl ethyl ketone, chlorobenzene, ethylbenzene, and benzene.  Threat To Public Health & Env: The contaminated aquifer is a major source of drinking water for the city. Wells downgradient have been shut down due to contamination from this or other sources. If the contamination migrates further offsite, additional wells may become contaminated, thus leading to a reduction in water quality and potential long-term loss of water supply.  Site Activity Status: The potentially responsible party (PRP) has installed ground water monitoring wells and is currently working under the direction of the Regional Water Quality Control Board to determine the nature and extent of the contamination.

CA Enviroscreen 3 Score: 66-70%  
CA Enviroscreen 4 Score: 65-70%  
Military DOD Site: No  
Facility Project Subtype: Not reported  
RWQCB Region: LOS ANGELES RWQCB (REGION 4)  
Site History: Magna Plating was developed as a plating facility from 1953 through July 2006. The present ownership has operated Magna-Plating Company since 1963. Magna-Plating Company utilized cadmium, zinc, nickel and chromium in their operations as a plating facility. Chromium use was reportedly phased out in 1997. The Los Angeles Regional Water Quality Control Board (LARWQCB) required the plating facilities to evaluate and remediate the presence of heavy metals in soil, and chlorinated solvents, total chromium, hexavalent chromium and metals in groundwater.

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Feature Description: DOD is not known to have used this site nor to have constructed any facilities on it. There were other Vega Aircraft sites in Burbank. In 1942, this site was known as Vega Aircraft Corporation Plant 1. This manufacturing facility was adjacent to the southeast corner of the Lockheed Air Terminal (DERP-FUDS J09CA044700), and in 1954 Lockheed Air Terminal became part of Air Force Plant 14 (DERPFUDS J09CA009800). Vega Aircraft Corporation Plant 1 eventually became Lockheed Aircraft Corporation Plant A-1, but it was not a part of either of the above-mentioned formerly used defense sites.

Completed Document Type: 5 Year Review Reports

Completed Date: 08/17/1998

Comments: A second 5-year review of remedial activities is conducted at the North Hollywood OU (NHOU) and covers operations from 1993 thru 1997. The purpose was to evaluate whether the NH Interim Remedy achieved the objectives specified in the ROD. The findings of the 5-year review are that the objectives of the ROD have been met.

Background Info:	<p>The San Fernando Valley Ground Water Basin (SFVGB) is located within the Upper Los Angeles River Area, and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.</p> <p>The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:</p> <p>Area #1 - North Hollywood NPL Site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit(OU) and the Burbank OU.</p> <p>Area #2 - Crystal Springs NPL Site covers 3975 acres located southeast of the North Hollywood NPL site and is in the cities of Glendale and Los Angeles.</p> <p>Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the SF Valley and is located in and adjacent to La</p>

Crescenta in the Verdugo Mountains.

Area #4 - the Pollock NPL Site covers 1635 acres in the south-eastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale.

Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.

The primary contaminants of concern are the volatile organic compounds (VOCs) trichloroethylene (TCE) and tetrachloroethylene (PCE). These compounds have been and/or are being used in many San Fernando Valley industries, such as aeronautical, automotive dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination in numerous wells have been so severe with TCE and PCE that these wells have essentially been put out of commission.

Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of VOC vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards. Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the San Fernando Valley since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying responsible parties.

EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP). The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern and Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements; (ARAR's) and evaluate the potential risk to human health and the environment. The Remedial Investigation of the SFVGWB was divided into two phases.

Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).

Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.

Phase II activities consist of a basinwide remedial investigation conducted by the LADWP.

Remedial Actions (RAs):

North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.

A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.

A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.

Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU has been separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remedy. The PRPs have formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.

Verdugo and Pollock (Areas #3 and #4) --

Currently no RAs have been identified for Area #3 or for Area #4.

In October 2003 US EPA proposed No Remedial Action for Verdugo Basin (Area #3).

Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valley Groundwater Basin.

EPA and the RWQCB are currently identifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response,

including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

**SUPERFUND NPL**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023  
Date Data Arrived at EDR: 03/28/2023  
Date Made Active in Reports: 05/30/2023

Source: Environmental Protection Agency  
Telephone: 703-603-8704  
Last EDR Contact: 06/23/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023  
Date Data Arrived at EDR: 07/06/2023

Next Scheduled EDR Contact: 10/23/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/23/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 07/24/2023	Source: EPA
Date Data Arrived at EDR: 07/31/2023	Telephone: 800-424-9346
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 10/02/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 10/02/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 10/02/2023
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 10/02/2023
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 10/02/2023
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 05/23/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 05/23/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/04/2023
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/12/2023

Date Data Arrived at EDR: 06/20/2023

Date Made Active in Reports: 08/14/2023

Number of Days to Update: 55

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/24/2023

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 05/25/2023	Source: DTSC and SWRCB

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS NPL: Superfund Sites with PFAS Detections Information

EPA's Office of Land and Emergency Management and EPA Regional Offices maintain data describing what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment.

Data Release Frequency: Varies

## PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

	Data Release Frequency: Varies

**DRYCLEAN SAN DIEGO CO DIST:** San Diego County Air Pollution Control District Drycleaner Facility Listing  
A listing of drycleaner facility locations, for the San Diego County Air Pollution Control District.

Date of Government Version: 02/01/2019	Source: San Diego County Air Pollution Control District
Date Data Arrived at EDR: 05/01/2019	Telephone: 858-586-2616
Date Made Active in Reports: 05/01/2023	Last EDR Contact: 08/08/2023
Number of Days to Update: 1461	Next Scheduled EDR Contact: 09/11/2023
	Data Release Frequency: Varies

**EMI:** Emissions Inventory Data

Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.

Date of Government Version: 12/31/2020	Source: California Air Resources Board
Date Data Arrived at EDR: 06/13/2022	Telephone: 916-322-2990
Date Made Active in Reports: 08/30/2022	Last EDR Contact: 06/09/2023
Number of Days to Update: 78	Next Scheduled EDR Contact: 09/25/2023
	Data Release Frequency: Varies

**ENF:** Enforcement Action Listing

A listing of Water Board Enforcement Actions. Formal is everything except Oral/Verbal Communication, Notice of Violation, Expedited Payment Letter, and Staff Enforcement Letter.

Date of Government Version: 04/17/2023	Source: State Water Resources Control Board
Date Data Arrived at EDR: 04/18/2023	Telephone: 916-445-9379
Date Made Active in Reports: 07/06/2023	Last EDR Contact: 07/18/2023
Number of Days to Update: 79	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Varies

**Financial Assurance 1:** Financial Assurance Information Listing

Financial Assurance information

Date of Government Version: 01/11/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/17/2023	Telephone: 916-255-3628
Date Made Active in Reports: 04/04/2023	Last EDR Contact: 06/28/2023
Number of Days to Update: 77	Next Scheduled EDR Contact: 10/30/2023
	Data Release Frequency: Varies

**Financial Assurance 2:** Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Last EDR Contact: 06/29/2023  
Next Scheduled EDR Contact: 10/16/2023  
Data Release Frequency: Quarterly

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 02/11/2021	Source: RWQCB, Central Valley Region

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Data Release Frequency: Varies

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

Data Release Frequency: Varies

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

	Data Release Frequency: Varies

## EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## CUPA TULARE: CUPA Facility List Cupa program facilities

Date of Government Version: 10/07/2022  
Date Data Arrived at EDR: 10/07/2022  
Date Made Active in Reports: 12/21/2022  
Number of Days to Update: 75

Source: Tulare County Environmental Health Services Division  
Telephone: 559-624-7400  
Last EDR Contact: 07/26/2023  
Next Scheduled EDR Contact: 11/13/2023  
Data Release Frequency: Varies

## TUOLUMNE COUNTY:

### CUPA TUOLUMNE: CUPA Facility List Cupa facility list

Date of Government Version: 04/23/2018  
Date Data Arrived at EDR: 04/25/2018  
Date Made Active in Reports: 06/25/2018  
Number of Days to Update: 61

Source: Divison of Environmental Health  
Telephone: 209-533-5633  
Last EDR Contact: 07/11/2023  
Next Scheduled EDR Contact: 10/30/2023  
Data Release Frequency: Varies

## VENTURA COUNTY:

### BWT VENTURA: Business Plan, Hazardous Waste Producers, and Operating Underground Tanks

The BWT list indicates by site address whether the Environmental Health Division has Business Plan (B), Waste Producer (W), and/or Underground Tank (T) information.

Date of Government Version: 03/27/2023  
Date Data Arrived at EDR: 04/25/2023  
Date Made Active in Reports: 07/14/2023  
Number of Days to Update: 80

Source: Ventura County Environmental Health Division  
Telephone: 805-654-2813  
Last EDR Contact: 07/17/2023  
Next Scheduled EDR Contact: 10/30/2023  
Data Release Frequency: Quarterly

### LF VENTURA: Inventory of Illegal Abandoned and Inactive Sites

Ventura County Inventory of Closed, Illegal Abandoned, and Inactive Sites.

Date of Government Version: 12/01/2011  
Date Data Arrived at EDR: 12/01/2011  
Date Made Active in Reports: 01/19/2012  
Number of Days to Update: 49

Source: Environmental Health Division  
Telephone: 805-654-2813  
Last EDR Contact: 06/21/2023  
Next Scheduled EDR Contact: 10/09/2023  
Data Release Frequency: No Update Planned

### LUST VENTURA: Listing of Underground Tank Cleanup Sites

Ventura County Underground Storage Tank Cleanup Sites (LUST).

Date of Government Version: 05/29/2008  
Date Data Arrived at EDR: 06/24/2008  
Date Made Active in Reports: 07/31/2008  
Number of Days to Update: 37

Source: Environmental Health Division  
Telephone: 805-654-2813  
Last EDR Contact: 08/02/2023  
Next Scheduled EDR Contact: 11/20/2023  
Data Release Frequency: No Update Planned

### MED WASTE VENTURA: Medical Waste Program List

To protect public health and safety and the environment from potential exposure to disease causing agents, the Environmental Health Division Medical Waste Program regulates the generation, handling, storage, treatment and disposal of medical waste throughout the County.

Date of Government Version: 03/27/2023  
Date Data Arrived at EDR: 04/21/2023  
Date Made Active in Reports: 07/07/2023  
Number of Days to Update: 77

## YOLO COUNTY:

### UST YOLO: Underground Storage Tank Comprehensive Facility Report

Underground storage tank sites located in Yolo county.

Date of Government Version: 04/03/2023	Source: Yolo County Department of Health
Date Data Arrived at EDR: 04/18/2023	Telephone: 530-666-8646
Date Made Active in Reports: 06/13/2023	Last EDR Contact: 06/21/2023
Number of Days to Update: 56	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Annually

## YUBA COUNTY:

### CUPA YUBA: CUPA Facility List

CUPA facility listing for Yuba County.

Date of Government Version: 05/04/2023	Source: Yuba County Environmental Health Department
Date Data Arrived at EDR: 05/04/2023	Telephone: 530-749-7523
Date Made Active in Reports: 07/25/2023	Last EDR Contact: 07/19/2023
Number of Days to Update: 82	Next Scheduled EDR Contact: 11/06/2023
	Data Release Frequency: Varies

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 11/16/2022	Telephone: 860-424-3375
Date Made Active in Reports: 02/06/2023	Last EDR Contact: 08/08/2023
Number of Days to Update: 82	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: No Update Planned

### NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2018	Source: Department of Environmental Protection
Date Data Arrived at EDR: 04/10/2019	Telephone: N/A
Date Made Active in Reports: 05/16/2019	Last EDR Contact: 06/27/2023
Number of Days to Update: 36	Next Scheduled EDR Contact: 10/16/2023
	Data Release Frequency: Annually

This information is provided on a best effort basis and Endeavor Business Media does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of Endeavor Business Media.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

COMMERCIAL BUILDING  
2244 NORTH BUENA VISTA STREET  
BURBANK, CA 91504

### **TARGET PROPERTY COORDINATES**

Latitude (North):	34.196882 - 34° 11' 48.78"
Longitude (West):	118.337554 - 118° 20' 15.19"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	376758.5
UTM Y (Meters):	3784599.8
Elevation:	661 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	12021683 BURBANK, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1329F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1328F	FEMA FIRM Flood data
06037C1340F	FEMA FIRM Flood data
06037C1337F	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BURBANK	YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam  
 clay  
 silt loam  
 loamy sand  
 sandy loam  
 fine sand  
 clay loam  
 gravelly - sandy loam  
 coarse sand  
 gravelly - sand  
 sand

Surficial Soil Types: loam  
 clay  
 silt loam  
 loamy sand  
 sandy loam  
 fine sand  
 clay loam  
 gravelly - sandy loam  
 coarse sand  
 gravelly - sand  
 sand

Shallow Soil Types: fine sandy loam  
 gravelly - loam  
 sand  
 silty clay

Deeper Soil Types: stratified  
 clay loam  
 silty clay loam  
 gravelly - sandy loam  
 coarse sand  
 sand  
 weathered bedrock  
 very fine sandy loam

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

1 ONE STEEL TANK } TESTED: 0% LEL  
 # 10018 } SAFE FOR HOT WORK  
 } NOT SAFE FOR WORKERS  
 } IN TANK.

In the event of any physical or atmospheric adversely affecting the STANDARD SAFETY DESIGNATIONS assigned to any of the above spaces, or if any doubt, immediately stop all work and contact the undersigned Marine Chemist.

**QUALIFICATIONS:** Transfer of ballast or manipulation of valves or closure equipment leading to alter conditions in pipe lines, tanks or compartments subject to gas accumulation, unless specifically approved in this Certificate, requires inspection and endorsement or reissue of Certificate for the spaces so affected. All lines, vents, heating coils, valves, and similarly enclosed appurtenances shall be considered "not safe" unless otherwise specifically designated.

**STANDARD SAFETY DESIGNATIONS** (partial list, paraphrased from NFPA 306 Subsections 2-3.1 through 2-3.5, and Subsection 6-3.2)

**SAFE FOR WORKERS:** Means that in the compartment or space so designated: (a) the oxygen content of the atmosphere is at least 19.5 percent by volume; and that, (b) toxic materials in the atmosphere are within permissible concentrations; and that, (c) the residues are not capable of producing toxic materials under existing atmospheric conditions while maintained as directed on the Marine Chemist's Certificate.

**NOT SAFE FOR WORKERS:** Means that in the compartment or space so designated, the requirements of Safe for Workers have not been met.

**ENTER WITH RESTRICTIONS:** Means that in any compartment or space so designated, entry for work may be made only if conditions of proper protective equipment, clothing, and time are specified.

**SAFE FOR HOT WORK:** Means that in any compartment designated: (a) oxygen content of the atmosphere is at least 19.5 percent by volume, with the exception of inerted spaces or where external hot work is to be performed; and that, (b) the concentration of flammable materials in the atmosphere is below 10 percent of the lower flammable limit; and that, (c) the residues are not capable of producing a higher concentration than permitted by (b) above under existing atmospheric conditions in the presence of fire, and while maintained as directed on the Marine Chemist's Certificate; and further, that, (d) all adjacent spaces containing or having contained flammable or combustible materials have been cleaned sufficiently to prevent the spread of fire, or are satisfactorily inerted, or, in the case of fuel tanks or lube oil tanks, or engine room or fire room bilges, have been treated in accordance with the Marine Chemist's requirements.

**NOT SAFE FOR HOT WORK:** Means that in the compartment so designated, the requirements of Safe for Hot Work have not been met.

**CHEMIST'S ENDORSEMENT.** This is to certify that I have personally determined that all spaces in the foregoing list are in accordance with NFPA 306 Control of Gas Hazards on Vessels and have found the condition of each to be in accordance with its assigned designation.

"The undersigned acknowledges receipt of this Certificate under Section 2-6 of NFPA 306 and understands conditions and limitations under which it was issued."

This Certificate is based on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualifications and instructions.

**REQUIREMENTS FOR CONTRACTORS FOR  
 REMOVAL/INSTALLATION OF UNDERGROUND  
 STORAGE TANKS**

Under current department policy only those contractors holding one of the following classifications are properly licensed to contract solely for the installation and/or removal of underground storage tanks in Burbank.

**NOTE:** Effective January 1, 1994 all contractors performing the installation or removal of an underground tank(s) must hold the Hazardous Waste Certification issued by the Contractors State License Board.

Please indicate under which option you meet the requirements, and provide the additional information requested.

1. I have a Class:

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> *A* General Engineering | <input type="checkbox"/> *C-61-D-40* Service Station equipment |
| <input type="checkbox"/> *C-36* Plumbing Contractor         | <input type="checkbox"/> *B* General Building                  |

State Contractors License (check appropriate box).

License No. 642509 (A-HAZ)

2. I have a City of Burbank Business License.

License No. 33786

3. I have filed my State Workers Compensation Insurance with the City of Burbank Building Department.

Insurance Company: Reliance National Indemnity Co.

Policy Number: NWA016286505

Expiration Date: 12/31/99

4. I have received the City of Burbank Underground Tank Removal/Installation guidance document. I agree to abide by them in order to comply with Fire Department regulations and conditions stated herein.

5. I understand that appointments and inspections must be made 48 hours prior to the time work is to begin.

 PERMIT VERIFICATION REQUIREMENTS  
 FOR WORK RELATED TO UNDERGROUND STORAGE TANKS  
 CONTAINING HAZARDOUS SUBSTANCES**

**PURPOSE:** This form provides the Burbank Fire Department with verification that an applicant/contractor has obtained all permits required by the City of Burbank for any underground storage tank installation, removal, or repair and upgrade task.

**SCOPE:** This form shall apply to all individuals, companies, and corporations who install, remove, and repair or upgrade underground storage tanks.

**INSTRUCTIONS:** Every applicant or contractor performing work on underground storage tanks that requires a permit from the Burbank Fire Department shall also obtain all permits required by the City of Burbank. Each applicant or contractor must obtain the signature of a City Official representing the respective City Department for the required permit identified on this form. The applicant or contractor must apply for or obtain the required permit to obtain the required signature. Submit the original signed form with your completed permit application to the Burbank Fire Department Fire Prevention Bureau to obtain a permit. No permit will be issued without the completion of this form.

## INSTRUCTIONS FOR COMPLETING FORM "B"

### GENERAL INSTRUCTIONS

Section 2711 of Title 23, Division 3, Chapter 16, California Code of Regulations and sections 25286, 25287, and 25289 of Chapter 6.7, Division 20, Health and Safety Code require tank owners to apply for an UST operating permit.

1. One FORM "B" shall be completed for each tank for all NEW PERMITS, PERMIT CHANGES, REMOVALS and/or any other TANK INFORMATION CHANGE.
2. This form should be completed by either the PERMIT APPLICANT or the LOCAL AGENCY UNDERGROUND TANK INSPECTOR.
3. Please type or print clearly all requested information.
4. Use a hard point writing instrument, you are making 3 copies.
5. Tank owners must submit a plot plan to the local agency showing the location of the USTs with respect to buildings and landmarks [2711 (a)(8) CCR].
6. Tank owners must submit documentation showing compliance with state financial responsibility requirements to the local agency for petroleum USTs [2711 (a)(11) CCR].

### TOP OF FORM: MARK ONLY ONE ITEM

1. Mark an (X) in the box next to the item that best describes the reason the form is being completed.
2. Indicate the DBA or Facility name where the tank is installed.

### I. TANK DESCRIPTION - COMPLETE ALL ITEMS - IF UNKNOWN - SO SPECIFY

- A. Indicate owners tank ID # - If there is a tank number that is used by the owner to identify the tank (ex. AB70789).
- B. Indicate the name of the company that manufactured the tank (ex. ACME TANK MFG).
- C. Indicate the year the tank was installed (ex. 1987).
- D. Indicate the tank capacity in gallons (ex. 25,000 or 10,000 etc.).

### II. TANK CONTENTS

- A. 1. IF MOTOR VEHICLE FUEL, check box 1 and complete items B & C.  
2. If not MOTOR VEHICLE FUEL, check the appropriate box in section A and complete items B & D.
- B. Check the appropriate box.
- C. Check the type of MOTOR VEHICLE FUEL (if box 1 is checked in A).
- D. Print the chemical name of the hazardous substance stored in the tank and the C.A.S.#. (Chemical Abstract Service number), if box 1 is NOT checked in A.

### III. TANK CONSTRUCTION - MARK ONE ITEM ONLY IN BOX A, B, C & D

1. Check only one item in TYPE OF SYSTEM, TANK MATERIAL, INTERIOR LINING and CORROSION PROTECTION.
2. If OTHER, print in the space provided.

### IV. PIPING INFORMATION

1. Circle "A" if above ground circle "U" if underground, and circle both if applicable.
2. If UNKNOWN circle; or if OTHER, print in space provided.
3. Indicate the LEAK DETECTION system(s) used to comply with the monitoring requirement for the piping.

### V. TANK LEAK DETECTION

1. Indicate the LEAK DETECTION system(s) used to comply with the monitoring requirements for the tank.

### VI. INFORMATION ON TANK PERMANENTLY CLOSED IN PLACE

1. ESTIMATED DATE LAST USED - MONTH/YEAR (January, 1988 or 01/88)
2. ESTIMATED QUANTITY of HAZARDOUS SUBSTANCE remaining in the tank (in Gallons).
3. WAS TANK FILLED WITH INERT MATERIAL? Check "Yes" or "No".

TANK OWNER OR AUTHORIZED REPRESENTATIVE MUST SIGN AND DATE THE FORM AS INDICATED [see section 2711 (a)(13) CCR]

### INSTRUCTION FOR THE LOCAL AGENCIES

The state underground storage tank identification number is composed of the two digit county number, the three digit jurisdiction number, the six digit facility number and the six digit tank number. The county and jurisdiction numbers are predetermined and can be obtained by calling the State Board (916) 227-4303. The facility number must be the same as shown in form "A". The tank number may be assigned by the local agency, however, this number must be numerical and cannot contain an alphabet. If the local agency prefers the State Board to assign the tank number, please leave it blank.

IT IS THE RESPONSIBILITY OF THE LOCAL AGENCY THAT INSPECTS THE FACILITY TO VERIFY THE ACCURACY OF THE INFORMATION. THE LOCAL AGENCY IS RESPONSIBLE FOR THE COMPLETION OF THE "LOCAL AGENCY USE ONLY" INFORMATION BOX. THE LOCAL AGENCY SHOULD RETAIN THE ORIGINAL AND YELLOW COPIES. THE PINK COPY SHOULD BE RETAINED BY THE TANK OWNER.

**CITY OF BURBANK  
UST REMOVAL**

**Technical Provisions**

**1.0 GENERAL**

**1.1 Project Overview**

The City of Burbank is requesting Bids from qualified Contractors (Contractor), experienced in the removal of underground fuel storage tanks (USTs) to remove an existing UST at the site of the old Fire Station 13 located at 2244 Buena Vista Street in the City of Burbank.

**1.2 Scope of Work/Project Description**

The project scope of work consists of the removal of an existing UST and associated equipment. The existing facilities to be removed consist of the following:

One (1), 1,500 gallon diesel UST

Existing UST is a single wall steel tank

Piping. Removal of all associated product piping, including vent piping.

All ancillary work such as excavation, backfilling and paving required to provide a complete project.

See Figure No. 1 for a Site Plan of the existing facility.

Project also includes the removal of contaminated soil that may be encountered.

**1.3 Applicable Codes/Reference Standards**

Contractor shall comply with all applicable codes, regulations and standards governing this work, including but not necessarily limited to the following:

State of California Underground Storage Tank Regulations, California Code of Regulations, Title 23, Division 3, Chapter 16 and Chapter 6.7, Health and Safety Code.

City of Burbank Underground Storage Tank Removal Procedures and Site Closure procedures.

BURBANK FIRE DEPT.  
22 DEC 99 06 51

South Coast Air Quality Management District (Rule 1166 and 1149 as applicable).

OSHA: Give required notifications prior to beginning the excavation.

Standard Specifications for Public Works Construction, latest edition ("Greenbook").

#### **1.4 Permitting**

Contractor shall be responsible for procuring all permits and obtaining inspections required to complete the work.

Copies of City of Burbank Fire Department requirements are provided with this specification for the Contractor's reference.

The above permitting services will be provided by the City at no cost to the Contractor.

In addition to the City, the Contractor shall be responsible for procuring all permits required by other Agencies for the work. These agencies include but are not necessarily limited to: South Coast Air Quality Management District, OSHA.

#### **1.5 Health and Safety Plan**

Prepare a site specific Health and Safety Plan. Plan will describe the measures necessary to protect the health and welfare of field personnel. No work shall proceed until the Health and Safety plan is available on-site and reviewed by the workers executing the tasks in this section. Health and Safety Plan shall be available at the start of the project.

#### **1.6 Schedule**

Contractor shall proceed with the work so that removal is complete within 21 calendar days from Notice to Proceed (NTP). The building and site are currently serving as a Boy's club. Contractor shall coordinate activities with the on-site personnel.

#### **1.7 Submittals**

The following shall be submitted for review and approval by the City prior to commencing field activities:

Health and Safety Plan. Work shall not proceed until the Health and Safety Plan is approved by the City.

The following shall be submitted within 10 days of project completion:

Close out documents, including but not necessarily, limited to the following:

- Certificates of destruction for the tank.
- Copies of permits
- Copies of manifests for removal and disposal of rinseate.
- Load tickets for removal of contaminated soil.

#### **1.8 Clean up**

During progress of work keep premises reasonably free of debris and waste materials. Upon completion and before final acceptance of work, remove all debris, rubbish, leftover materials, tools and equipment from site.

#### **1.9 Site Conditions**

Bidder's shall visit the site and familiarize themselves with the existing conditions before submitting their bid. Bidders can perform their own investigations, including borings, to satisfy themselves of field conditions. Submittal of a bid will be considered evidence of the bidder's familiarity and knowledge of the existing facilities.

#### **1.10 Quality Assurance**

Work shall be performed by a Contractor duly licensed in the State of California and experienced in this kind of work. Contractor shall have a minimum of 5 years experience in the removal of USTs and associated work. Contractor shall use adequate numbers of skilled workmen who are thoroughly trained and experienced in the necessary crafts and who are completely familiar with the specified requirements and methods needed for proper performance of the work.

Removal of Underground Storage Tanks shall be performed by a Contractor who has passed the Hazardous Substance Removal Certification examination in accordance with Section 7058.7 of the Business and Professions Code.

Work shall be performed in accordance with the requirements of all legally constituted authorities having jurisdiction, including all local ordinances, codes and the safety orders of the State Division of Industrial Safety.

UST removal and contaminated soil removal will be monitored by an Environmental Consultant employed by the City.

**Backfill and Compaction.** Backfill shall be supervised by a licensed Soils Engineer. Testing of clean imported materials will confirm 90% laboratory density as determined by the ASTM D1557-91 Test Method. Tests will be performed by an accredited soils laboratory and results will be submitted to the Engineer within 24 hours.

### **1.11 Close Out Documents**

Final acceptance of the work by the City, initiating the warranty period, shall include receipt of the following documents all required closure documents. Final payment will not be made until such documents are received.

## **2.0 EXECUTION**

### **2.1 EARTHWORK AND PAVING**

Contractor shall perform all excavation, backfilling, compacting and paving required to execute this work. All earthwork shall be in accordance with the Standard Specifications for Public Works Construction, 1997 edition and as noted below.

UST excavation shall be backfilled and compacted to a minimum of 90% maximum density per ASTM D1557.

Provide protection and repair adjacent surfaces and areas which may be stained or damaged as a result of paving and concrete operations. Protect installed concrete and asphalt paving until final acceptance. Repair or replace damaged or defective concrete and asphalt paving to original specified condition.

Contractor shall provide notification to the Owner 72 hours prior to commencing this work. Notice shall include when the work will be done, duration of the work, and time that the area will be closed to traffic. Contractor shall conspicuously post notice at the driveway entrance during the execution work indicating closure of the area and duration of the closure.

**Asphalt materials:**

**Aggregate base course:** Conforming to PWC Spec. Subsection 200-2, with gradation conforming to subsection 200-2.2.2, for crushed aggregate base.

**Liquid asphalt:** Conforming to PWC Spec. Subsection 203-2, Grade SC-250.

**Asphaltic concrete:** Conforming to PWC Spec. Subsection 203-6, Type C2-AR-4000 for asphalt concrete pavement.

**Emulsified asphalt:** Conforming to PWC Spec. Subsection 203-3, Type SS-1H.

**Emulsion-Aggregate Slurry:** Conforming to PWC Spec. Subsection 203-5, quickset, Type I.

**Concrete Materials:**

Prior to the start of any work, submit a mix design for each type of concrete, including a complete list of materials.

**Portland cement:** ASTM C150, Type II, low alkali, conforming to PWC Spec. Subsection 201-1.2.1.

**Aggregates:** Conforming to PWC Spec. Subsection 201-1.2.2.

**Water:** Clean, fresh and potable, conforming to PWC Spec. Subsection 201-1.2.3.

**Admixtures:** Conforming to PWC Spec. Subsection 201-1.2.4.

**Proportioning:** Conforming to PWC Spec. Subsection 201-1.3.

**Strength:** Conforming to PWC Spec. Subsection 201-1.1, unless otherwise indicated.

**Reinforcing steel (use only where called for):** Conforming to ASTM A615, Grade 60 billet steel.

**Expansion joint filler:** Conforming to PWC Spec. Subsection 201-3.2.

**Forms:** Wood or metal. The Contractor shall be responsible for the adequacy of forms and form supports.

**Concrete curing compound:** Conforming to PWC Spec. Subsection 201-4.

**Execution:**

**Subgrade preparation:** Conforming to PWC Spec. 301-1, with the top six inches compacted to 90 percent relative compaction at all locations. The subgrade shall be maintained in a smooth, compacted condition, in conformity with the required section and established grade until the concrete is placed.

Subgrade preparation and compaction to be performed under the supervision of the Soils Engineer.

**Aggregate base course:** Conforming to PWC Spec. Subsection 301-2, placed in one or more layers as required to obtain 95 percent relative compaction. Deliver to site as a uniform mixture. Construct to indicated compacted thickness.

**Prime coat:** Conforming to PWC Spec. Subsection 302-5.2, with quantity per square yard as approved. Apply on completed aggregate base course. Allow sufficient time before placing the asphalt concrete to permit the prime coat to penetrate the prepared compacted base.

**Asphalt concrete:** Conforming to PWC Spec. Subsection 302-5, including the requirements for smoothness and density. After final rolling, do not permit vehicular traffic on pavement until it has cooled and hardened.

**Tack coat:** Conforming to PWC Spec. Subsection 302-5.3. Apply to contact surfaces of previously constructed asphalt or portland cement concrete and surfaces abutting or projecting into asphalt concrete pavement.

**Emulsion-Aggregate Slurry:** Conforming to PWC Spec. Subsection 302-4.

**Form setting:** Conforming to PWC Spec. Subsection 303-5.2.1.

**Placing concrete:** Conforming to PWC Spec. Subsection 303-5.3.

**Joints:** Conforming to PWC Spec. Subsection 303-5.4.

**Finishing:** Conforming to PWC Spec. Subsection 303-5.5.

**Curing and protection:** Curing: Conforming to PWC Spec. Subsection 303-5.6.

**Drainage test:** Prior to application of seal coat, flood paving with water when rolling is completed and paving is cool. Where water ponds to a depth of more than 1/8" in six (6) feet, remove paving and install properly draining paving as directed at no extra cost to Owner. Correction of low areas by feathering or skin patching is not acceptable.

During progress of work, keep premises reasonably free of debris and waste materials.

Upon completion and before final acceptance of work, remove all debris, rubbish, leftover materials, tools and equipment from site.

## **2.2 UST REMOVAL**

No UST removal work shall proceed until all proper notifications have been

made and permits issued. All UST removal work shall be in accordance with the City of Burbank Fire Department requirements. Removal shall generally consist of the following:

- Saw-cut and remove asphalt and concrete paving.
- Excavate overburden in order to expose UST and associated piping in preparation for removal, soil to be stockpiled on site for subsequent backfill operations.
- Provide air monitoring of excavated soil per South Coast Air Quality Management District (SCAQMD) Rule No. 1166.
- Monitor excavated soil for segregation into "clean" and "impacted" stockpiles.
- Purge UST and obtain gas-free certifications, triple-rinse tanks in accordance with City of Burbank requirements.
- Transport and dispose of hazardous waste rinseate generated during triple rinsing procedures to approved facilities. Transportation and disposal will be completed under appropriate manifests.
- Upon completion of triple rinsing procedures, the UST shall be certified as non-hazardous by a Marine Chemist or Certified Industrial Hygienist.
- Remove UST and transport to destruction facility and obtain certificates of destruction; remove and dispose of product piping and ancillary equipment.
- Soil samples will be collected by the City's Environmental Consultant at the frequency, depth and location required by the City of Burbank. Contractor shall provide a copy of the sampling requirements to the City's Environmental Consultant when obtained from the City. Samples will be analyzed on a 48 hour turnaround.
- Upon clearance from the regulatory agencies, the excavation will be backfilled.
- Perform compaction tests of backfill at area of removed tanks and prepare a compaction report.
- Provide all appropriate documentation for Closure Reports. Documentation shall include, but is not limited to all relevant permits and manifests, certificate of tank destruction and compaction reports

Shore and crib excavations if required to maintain their stability. Slope sides of excavations to comply with local codes and ordinances. Shore and brace where sloping is not possible because of space restrictions or stability of material excavated. Maintain sides and slopes of excavations in safe condition until completion of backfilling.

### **2.3 CONTAMINATED SOIL DISPOSAL**

**Procedures:** Submit a written proposed petroleum-contaminated soil and clean soil excavation and truck loading procedure to the Engineer for approval before work is started. The procedure shall include a detailed description of the methods and equipment to be used for each operation, the sequence of operations, soil testing and classification, air emission monitoring, coordination of truck loading with excavation, and the truck traffic pattern.

The procedure shall provide for a safe conduct of the work, protection of personnel and property, compliance with SCAQMD Rule 1166, coordination with other work in progress, and non-interference with facility operations.

Prior to submittal of this procedure, the Contractor shall investigate and verify the soil excavation and storage area allotted for the work, and the site traffic patterns.

**PERMITS.** The soil excavation, testing and truck loading process shall comply with the applicable Federal, State and Local Codes, and Contractor assumes responsibility for obtaining and paying for such permits that may be required.

A South Coast Air Quality Management District (SCAQMD) permit per Rule 1166.

**PAYMENT FOR CONTAMINATED SOIL.** The unit price bid per ton of contaminated soil shall include the costs for excavation, characterization/profiling, testing, removal and treatment of the soil and backfilling and compaction of the excavated areas.

**EXECUTION.** For the purpose of this bid, all excavated soil will be considered either petroleum-contaminated or clean. Excavated soil includes petroleum-contaminated or potentially petroleum-contaminated soil generated from the removal of underground storage tanks and piping. The petroleum-contaminated soil is assumed to primarily originate from gasoline and diesel fuel. All the soil is believed to be non-hazardous as defined by the State of California in CAC Title 22.

For the purpose of this project, any excavated soil that contains a level of total petroleum hydrocarbons of 100 parts per million of petroleum or any level of BTEX is classified as petroleum-contaminated. Any excavated soil that contains a level of total petroleum hydrocarbons less than 100 parts per million and non-detectable levels of BTEX is classified as clean.

All excavated soils that are found to be petroleum-contaminated shall be disposed of in a manner that will absolve the City of any liability. The Contractor shall be responsible for profiling the material in order to ensure acceptance at the selected treatment facility. Only facilities fully permitted in California that thermally treat soil to less than 10 ppm TPH will be considered. The Contractor will only use haulers for the petroleum contaminated soil who are registered hazardous waste haulers and shall submit the EPA haulers registration number to the Engineer. The treatment facility must provide a copy of the monitoring plan being followed for testing treated soil. At a minimum the City must be provided with documentation of test results for all treated soil by an independent State Certified Laboratory. The City reserves the right to approve or disapprove disposal site and remediation method.

The soil is to be excavated and moved to the designated storage area. Three separate zones will be set aside in the designated storage area. In the first zone soil will be stockpiled and tested to determine the level of contamination. The second zone will be for clean soil and the third zone will be for soil that is designated as petroleum-contaminated.

All soil in the designated storage area must be covered with 6 mil plastic sheeting when stored in either clean or contaminated area. It is the Contractor's responsibility to immediately replace the plastic sheeting if it becomes dislodged.

Samples, as required by the local enforcement agency, from each area of excavation shall be tested by an independent State of California Certified Laboratory. All of the Soil tests specified shall be performed at a minimum.

Lab results must be provided to the City prior to moving any soil from the initial stockpile area to either the clean or contaminated zones within the designated storage area. All clean and petroleum-contaminated soil must be removed from the storage area within 14 days of deposit. In the event the Contractor does not remove the soil within 14 days, the City reserves the right to remove the material with all costs to be borne by the Contractor.

If the soil is determined to be clean, it will then be moved to the area designated for clean soil and then disposed in a legal manner off site. Clean, stockpiled soil may be used as backfill. Any additional profiling that may be required of this clean soil will be at the expense of the Contractor.

If the soil is found to be petroleum-contaminated, it will be moved to the area designated as contaminated and stored in a legal manner prior to disposal. Any additional profiling of this petroleum-contaminated soil in order to secure approval for treatment is the responsibility of the Contractor.

**Soil Tests:** Soil tests shall be performed on excavated soils to confirm that the soils are "clean" or non-hazardous but petroleum contaminated.

The Contractor shall obtain the tests noted below. Costs for these tests shall be included in the contract price for disposal.

1. EPA Test #418.1 for total petroleum hydrocarbons. Perform test on representative samples for temporary stockpiles.
2. EPA Test #8020 for Benzene, Toluene, Ethylbenzene and Xylene (BTEX) and Methyl-tertiary Butyl Ether (MTBE). Test one sample for each 100 tons of soil from temporary stockpile.
3. EPA Test #8015 (d) modified for diesel. Test one sample for each 100 tons of soil from temporary stockpile.
4. EPA Test #8015 (g) modified for gasoline. Test one sample for each 100 tons of soil from temporary stockpile.
5. EPA Test #8260 for MTBE, gasoline constituents, chlorinated solvents and miscellaneous organic compounds.
6. EPA Test #8010 for Halogenated Volatile Organics.
7. Total lead (CCR Title 26 TTLC). Two test samples. If total lead is > 50 ppm, test sample for soluble lead (STLC).

Any other tests that may be ordered by the Engineer or as required by the regulatory agencies (these tests will be paid for as extra work). A copy of the test results with chain of Custody must be provided to the Engineer within seven days of sampling.

Contractor shall provide The City's Project Manager with weigh tickets from a certified weighmaster for each load of petroleum-contaminated or clean soil that leaves the site. These weigh tickets must be delivered to the Project Manager within 24 hours after leaving the site and will be used to compute the payment for performing the work specified herein above.

Full compensation for any trucking or construction delays which may be incurred following the above handling procedures shall be considered as included in the price/ton for excavation, hauling and disposal of petroleum contaminated or clean soil and no additional compensation will be considered.

# CITY OF BURBANK UST REMOVAL

## Technical Provisions

### 1.0 GENERAL

#### 1.1 Project Overview

The City of Burbank is requesting Bids from qualified Contractors (Contractor), experienced in the removal of underground fuel storage tanks (USTs) to remove an existing UST at the site of the old Fire Station 13 located at 2244 Buena Vista Street in the City of Burbank.

#### 1.2 Scope of Work/Project Description

The project scope of work consists of the removal of an existing UST and associated equipment. The existing facilities to be removed consist of the following:

One (1), 1,500 gallon diesel UST

Existing UST is a single wall steel tank

Piping. Removal of all associated product piping, including vent piping.

All ancillary work such as excavation, backfilling and paving required to provide a complete project.

See Figure No. 1 for a Site Plan of the existing facility.

Project also includes the removal of contaminated soil that may be encountered.

#### 1.3 Applicable Codes/Reference Standards

Contractor shall comply with all applicable codes, regulations and standards governing this work, including but not necessarily limited to the following:

State of California Underground Storage Tank Regulations, California Code of Regulations, Title 23, Division 3, Chapter 16 and Chapter 6.7, Health and Safety Code.

City of Burbank Underground Storage Tank Removal Procedures and Site Closure procedures.

South Coast Air Quality Management District (Rule 1166 and 1149 as applicable).

OSHA: Give required notifications prior to beginning the excavation.

Standard Specifications for Public Works Construction, latest edition ("Greenbook").

#### **1.4 Permitting**

Contractor shall be responsible for procuring all permits and obtaining inspections required to complete the work.

Copies of City of Burbank Fire Department requirements are provided with this specification for the Contractor's reference.

The above permitting services will be provided by the City at no cost to the Contractor.

In addition to the City, the Contractor shall be responsible for procuring all permits required by other Agencies for the work. These agencies include but are not necessarily limited to: South Coast Air Quality Management District, OSHA.

#### **1.5 Health and Safety Plan**

Prepare a site specific Health and Safety Plan. Plan will describe the measures necessary to protect the health and welfare of field personnel. No work shall proceed until the Health and Safety plan is available on-site and reviewed by the workers executing the tasks in this section. Health and Safety Plan shall be available at the start of the project.

#### **1.6 Schedule**

Contractor shall proceed with the work so that removal is complete within 21 calendar days from Notice to Proceed (NTP). The building and site are currently serving as a Boy's club. Contractor shall coordinate activities with the on-site personnel.

#### **1.7 Submittals**

The following shall be submitted for review and approval by the City prior to commencing field activities:

Health and Safety Plan. Work shall not proceed until the Health and Safety Plan is approved by the City.

The following shall be submitted within 10 days of project completion:

Close out documents, including but not necessarily, limited to the following:

- Certificates of destruction for the tank.
- Copies of permits
- Copies of manifests for removal and disposal of rinseate.
- Load tickets for removal of contaminated soil.

#### **1.8 Clean up**

During progress of work keep premises reasonably free of debris and waste materials. Upon completion and before final acceptance of work, remove all debris, rubbish, leftover materials, tools and equipment from site.

#### **1.9 Site Conditions**

Bidder's shall visit the site and familiarize themselves with the existing conditions before submitting their bid. Bidders can perform their own investigations, including borings, to satisfy themselves of field conditions. Submittal of a bid will be considered evidence of the bidder's familiarity and knowledge of the existing facilities.

#### **1.10 Quality Assurance**

Work shall be performed by a Contractor duly licensed in the State of California and experienced in this kind of work. Contractor shall have a minimum of 5 years experience in the removal of USTs and associated work. Contractor shall use adequate numbers of skilled workmen who are thoroughly trained and experienced in the necessary crafts and who are completely familiar with the specified requirements and methods needed for proper performance of the work.

Removal of Underground Storage Tanks shall be performed by a Contractor who has passed the Hazardous Substance Removal Certification examination in accordance with Section 7058.7 of the Business and Professions Code.

Work shall be performed in accordance with the requirements of all legally constituted authorities having jurisdiction, including all local ordinances, codes and the safety orders of the State Division of Industrial Safety.

UST removal and contaminated soil removal will be monitored by an Environmental Consultant employed by the City.

**Backfill and Compaction.** Backfill shall be supervised by a licensed Soils Engineer. Testing of clean imported materials will confirm 90% laboratory density as determined by the ASTM D1557-91 Test Method. Tests will be performed by an accredited soils laboratory and results will be submitted to the Engineer within 24 hours.

### **1.11 Close Out Documents**

Final acceptance of the work by the City, initiating the warranty period, shall include receipt of the following documents all required closure documents. Final payment will not be made until such documents are received.

## **2.0 EXECUTION**

### **2.1 EARTHWORK AND PAVING**

Contractor shall perform all excavation, backfilling, compacting and paving required to execute this work. All earthwork shall be in accordance with the Standard Specifications for Public Works Construction, 1997 edition and as noted below.

UST excavation shall be backfilled and compacted to a minimum of 90% maximum density per ASTM D1557.

Provide protection and repair adjacent surfaces and areas which may be stained or damaged as a result of paving and concrete operations. Protect installed concrete and asphalt paving until final acceptance. Repair or replace damaged or defective concrete and asphalt paving to original specified condition.

Contractor shall provide notification to the Owner 72 hours prior to commencing this work. Notice shall include when the work will be done, duration of the work, and time that the area will be closed to traffic. Contractor shall conspicuously post notice at the driveway entrance during the execution work indicating closure of the area and duration of the closure.

**Asphalt materials:**

**Aggregate base course:** Conforming to PWC Spec. Subsection 200-2, with gradation conforming to subsection 200-2.2.2, for crushed aggregate base.

**Liquid asphalt:** Conforming to PWC Spec. Subsection 203-2, Grade SC-250.

**Asphaltic concrete:** Conforming to PWC Spec. Subsection 203-6, Type C2-AR-4000 for asphalt concrete pavement.

**Emulsified asphalt:** Conforming to PWC Spec. Subsection 203-3, Type SS-1H.

**Emulsion-Aggregate Slurry:** Conforming to PWC Spec. Subsection 203-5, quickset, Type I.

**Concrete Materials:**

Prior to the start of any work, submit a mix design for each type of concrete, including a complete list of materials.

**Portland cement:** ASTM C150, Type II, low alkali, conforming to PWC Spec. Subsection 201-1.2.1.

**Aggregates:** Conforming to PWC Spec. Subsection 201-1.2.2.

**Water:** Clean, fresh and potable, conforming to PWC Spec. Subsection 201-1.2.3.

**Admixtures:** Conforming to PWC Spec. Subsection 201-1.2.4.

**Proportioning:** Conforming to PWC Spec. Subsection 201-1.3.

**Strength:** Conforming to PWC Spec. Subsection 201-1.1, unless otherwise indicated.

**Reinforcing steel (use only where called for):** Conforming to ASTM A615, Grade 60 billet steel.

**Expansion joint filler:** Conforming to PWC Spec. Subsection 201-3.2.

**Forms:** Wood or metal. The Contractor shall be responsible for the adequacy of forms and form supports.

**Concrete curing compound:** Conforming to PWC Spec. Subsection 201-4.

**Execution:**

**Subgrade preparation:** Conforming to PWC Spec. 301-1, with the top six inches compacted to 90 percent relative compaction at all locations. The subgrade shall be maintained in a smooth, compacted condition, in conformity with the required section and established grade until the concrete is placed.

Subgrade preparation and compaction to be performed under the supervision of the Soils Engineer.

**Aggregate base course:** Conforming to PWC Spec. Subsection 301-2, placed in one or more layers as required to obtain 95 percent relative compaction. Deliver to site as a uniform mixture. Construct to indicated compacted thickness.

**Prime coat:** Conforming to PWC Spec. Subsection 302-5.2, with quantity per square yard as approved. Apply on completed aggregate base course. Allow sufficient time before placing the asphalt concrete to permit the prime coat to penetrate the prepared compacted base.

**Asphalt concrete:** Conforming to PWC Spec. Subsection 302-5, including the requirements for smoothness and density. After final rolling, do not permit vehicular traffic on pavement until it has cooled and hardened.

**Tack coat:** Conforming to PWC Spec. Subsection 302-5.3. Apply to contact surfaces of previously constructed asphalt or portland cement concrete and surfaces abutting or projecting into asphalt concrete pavement.

**Emulsion-Aggregate Slurry:** Conforming to PWC Spec. Subsection 302-4.

**Form setting:** Conforming to PWC Spec. Subsection 303-5.2.1.

**Placing concrete:** Conforming to PWC Spec. Subsection 303-5.3.

**Joints:** Conforming to PWC Spec. Subsection 303-5.4.

**Finishing:** Conforming to PWC Spec. Subsection 303-5.5.

**Curing and protection:** Curing: Conforming to PWC Spec. Subsection 303-5.6.

**Drainage test:** Prior to application of seal coat, flood paving with water when rolling is completed and paving is cool. Where water ponds to a depth of more than 1/8" in six (6) feet, remove paving and install properly draining paving as directed at no extra cost to Owner. Correction of low areas by feathering or skin patching is not acceptable.

During progress of work, keep premises reasonably free of debris and waste materials.

Upon completion and before final acceptance of work, remove all debris, rubbish, leftover materials, tools and equipment from site.

## **2.2 UST REMOVAL**

No UST removal work shall proceed until all proper notifications have been

made and permits issued. All UST removal work shall be in accordance with the City of Burbank Fire Department requirements. Removal shall generally consist of the following:

- Saw-cut and remove asphalt and concrete paving.
- Excavate overburden in order to expose UST and associated piping in preparation for removal, soil to be stockpiled on site for subsequent backfill operations.
- Provide air monitoring of excavated soil per South Coast Air Quality Management District (SCAQMD) Rule No. 1166.
- Monitor excavated soil for segregation into "clean" and "impacted" stockpiles.
- Purge UST and obtain gas-free certifications, triple-rinse tanks in accordance with City of Burbank requirements.
- Transport and dispose of hazardous waste rinseate generated during triple rinsing procedures to approved facilities. Transportation and disposal will be completed under appropriate manifests.
- Upon completion of triple rinsing procedures, the UST shall be certified as non-hazardous by a Marine Chemist or Certified Industrial Hygienist.
- Remove UST and transport to destruction facility and obtain certificates of destruction; remove and dispose of product piping and ancillary equipment.
- Soil samples will be collected by the City's Environmental Consultant at the frequency, depth and location required by the City of Burbank. Contractor shall provide a copy of the sampling requirements to the City's Environmental Consultant when obtained from the City. Samples will be analyzed on a 48 hour turnaround.
- Upon clearance from the regulatory agencies, the excavation will be backfilled.
- Perform compaction tests of backfill at area of removed tanks and prepare a compaction report.
- Provide all appropriate documentation for Closure Reports. Documentation shall include, but is not limited to all relevant permits and manifests, certificate of tank destruction and compaction reports

Shore and crib excavations if required to maintain their stability. Slope sides of excavations to comply with local codes and ordinances. Shore and brace where sloping is not possible because of space restrictions or stability of material excavated. Maintain sides and slopes of excavations in safe condition until completion of backfilling.

### **2.3 CONTAMINATED SOIL DISPOSAL**

**Procedures:** Submit a written proposed petroleum-contaminated soil and clean soil excavation and truck loading procedure to the Engineer for approval before work is started. The procedure shall include a detailed description of the methods and equipment to be used for each operation, the sequence of operations, soil testing and classification, air emission monitoring, coordination of truck loading with excavation, and the truck traffic pattern.

The procedure shall provide for a safe conduct of the work, protection of personnel and property, compliance with SCAQMD Rule 1166, coordination with other work in progress, and non-interference with facility operations.

Prior to submittal of this procedure, the Contractor shall investigate and verify the soil excavation and storage area allotted for the work, and the site traffic patterns.

**PERMITS.** The soil excavation, testing and truck loading process shall comply with the applicable Federal, State and Local Codes, and Contractor assumes responsibility for obtaining and paying for such permits that may be required.

A South Coast Air Quality Management District (SCAQMD) permit per Rule 1166.

**PAYMENT FOR CONTAMINATED SOIL.** The unit price bid per ton of contaminated soil shall include the costs for excavation, characterization/profiling, testing, removal and treatment of the soil and backfilling and compaction of the excavated areas.

**EXECUTION.** For the purpose of this bid, all excavated soil will be considered either petroleum-contaminated or clean. Excavated soil includes petroleum-contaminated or potentially petroleum-contaminated soil generated from the removal of underground storage tanks and piping. The petroleum-contaminated soil is assumed to primarily originate from gasoline and diesel fuel. All the soil is believed to be non-hazardous as defined by the State of California in CAC Title 22.

For the purpose of this project, any excavated soil that contains a level of total petroleum hydrocarbons of 100 parts per million of petroleum or any level of BTEX is classified as petroleum-contaminated. Any excavated soil that contains a level of total petroleum hydrocarbons less than 100 parts per million and non-detectable levels of BTEX is classified as clean.

All excavated soils that are found to be petroleum-contaminated shall be disposed of in a manner that will absolve the City of any liability. The Contractor shall be responsible for profiling the material in order to ensure acceptance at the selected treatment facility. Only facilities fully permitted in California that thermally treat soil to less than 10 ppm TPH will be considered. The Contractor will only use haulers for the petroleum contaminated soil who are registered hazardous waste haulers and shall submit the EPA haulers registration number to the Engineer. The treatment facility must provide a copy of the monitoring plan being followed for testing treated soil. At a minimum the City must be provided with documentation of test results for all treated soil by an independent State Certified Laboratory. The City reserves the right to approve or disapprove disposal site and remediation method.

The soil is to be excavated and moved to the designated storage area. Three separate zones will be set aside in the designated storage area. In the first zone soil will be stockpiled and tested to determine the level of contamination. The second zone will be for clean soil and the third zone will be for soil that is designated as petroleum-contaminated.

All soil in the designated storage area must be covered with 6 mil plastic sheeting when stored in either clean or contaminated area. It is the Contractor's responsibility to immediately replace the plastic sheeting if it becomes dislodged.

Samples, as required by the local enforcement agency, from each area of excavation shall be tested by an independent State of California Certified Laboratory. All of the Soil tests specified shall be performed at a minimum.

Lab results must be provided to the City prior to moving any soil from the initial stockpile area to either the clean or contaminated zones within the designated storage area. All clean and petroleum-contaminated soil must be removed from the storage area within 14 days of deposit. In the event the Contractor does not remove the soil within 14 days, the City reserves the right to remove the material with all costs to be borne by the Contractor.

If the soil is determined to be clean, it will then be moved to the area designated for clean soil and then disposed in a legal manner off site. Clean, stockpiled soil may be used as backfill. Any additional profiling that may be required of this clean soil will be at the expense of the Contractor.

If the soil is found to be petroleum-contaminated, it will be moved to the area designated as contaminated and stored in a legal manner prior to disposal. Any additional profiling of this petroleum-contaminated soil in order to secure approval for treatment is the responsibility of the Contractor.

**Soil Tests:** Soil tests shall be performed on excavated soils to confirm that the soils are "clean" or non-hazardous but petroleum contaminated.

The Contractor shall obtain the tests noted below. Costs for these tests shall be included in the contract price for disposal.

1. EPA Test #418.1 for total petroleum hydrocarbons. Perform test on representative samples for temporary stockpiles.
2. EPA Test #8020 for Benzene, Toluene, Ethylbenzene and Xylene (BTEX) and Methyl-tertiary Butyl Ether (MTBE). Test one sample for each 100 tons of soil from temporary stockpile.
3. EPA Test #8015 (d) modified for diesel. Test one sample for each 100 tons of soil from temporary stockpile.
4. EPA Test #8015 (g) modified for gasoline. Test one sample for each 100 tons of soil from temporary stockpile.
5. EPA Test #8260 for MTBE, gasoline constituents, chlorinated solvents and miscellaneous organic compounds.
6. EPA Test #8010 for Halogenated Volatile Organics.
7. Total lead (CCR Title 26 TTLC). Two test samples. If total lead is > 50 ppm, test sample for soluble lead (STLC).

Any other tests that may be ordered by the Engineer or as required by the regulatory agencies (these tests will be paid for as extra work). A copy of the test results with chain of Custody must be provided to the Engineer within seven days of sampling.

Contractor shall provide The City's Project Manager with weigh tickets from a certified weighmaster for each load of petroleum-contaminated or clean soil that leaves the site. These weigh tickets must be delivered to the Project Manager within 24 hours after leaving the site and will be used to compute the payment for performing the work specified herein above.

Full compensation for any trucking or construction delays which may be incurred following the above handling procedures shall be considered as included in the price/ton for excavation, hauling and disposal of petroleum contaminated or clean soil and no additional compensation will be considered.

# Development Review Agenda

BURBANK: FIVE  
-5 JUL 99 23 50

## REVISED

### FINAL AGENDA FOR REGULAR MEETING OF THE DEVELOPMENT REVIEW COMMITTEE

**JULY 8, 1999**

9:00 a.m. - Park & Recreation Conference Room  
Gary Yamada, Zoning Administrator

#### PRE-APPLICATION REVIEWS:

The following projects are proposed for application submittal. DRC members are requested to identify the submittal information required of these applications, and discuss any known conditions which pertain to the proposed sites.

#### DEVELOPMENT REVIEW APPLICATIONS:

1. DR NO. 99-8:  
472 E. San Jose Avenue  
Construct 3-Unit Apartment  
Gary Akopian, Applicant  
Bob Burdette, Project Planner

#### ADDITIONAL ITEMS:

Committee discussion of accessory appliances and screening, Burbank Municipal Code Section 31-1211(h).

John Cheng, Building Official  
Rick Pruetz, City Planner

#### OTHER ITEMS:

No items scheduled at this time.

**ALL COMMENTS, CONDITIONS, AND REQUIREMENTS FOR THIS PROJECT MUST BE SUBMITTED IN WRITING PRIOR TO OR AT THIS MEETING.**

DICK HARMON - PROJECT MGR.

FIRE DEPARTMENT

**PROVISIONAL  
HAZARDOUS MATERIAL UNDERGROUND STORAGE PERMIT**

- I. Permit Number 19 007 001 011171 0001
- II. Site Name/D.B.A. >>> City of Burbank Fire Station 13
- III. Facility Address >>> 2244 North Buena Vista Street  
Burbank, CA 91504

Permission is hereby granted under B.M.C. Section 15-179.600 to the above named facility to operate 1 tank(s).  
This provisional permit is subject to the follow requirements:

Part A - General conditions and limitations (attached).

Part B - Authorized hazardous material storage tank(s) list (attached).

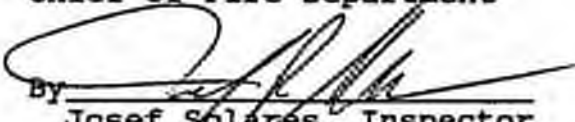

Part C - Specific conditions and limitations:

1. The permittee shall submit for approval and implement a leak detection program (LDP) and a tank monitoring program (TMP) prepared in accordance with Title 23, Chapter 3, Sub-chapter 16, Article 4 C.C.R. as adopted.
2. The following time schedule shall apply to submittal required by this provisional permit:
  - a. Tank integrity test results due by \_\_\_\_\_
  - b. Proposal for (LDP) and TMP due by May 1, 1991
3. Permit effective date March 21, 1991  
expiration date \_\_\_\_\_

Part D - Special conditions and limitations attached? Yes \_\_\_ No \_\_\_

This Provisional Permit is valid only for the continued operation of tanks providing suitable storage and expires 180 days from the date of issue. Permittee has until the expiration date to complete and approved LDP and to install and be in compliance with an approved TMP. Upon full compliance with the approved LDP and TMP and all other conditions and limitations, this Provisional Permit will be replaced by a full term Operational Permit for the remainder of the unexpired five year term from the effective date unless otherwise noted in Part D above.

Note in the "TANK" file:

May 28, 1957

New Fire Station #3, 2244 N. Buena Vista St.

There was installed a new 1500 gallon gasoline underground tank.

However, 500 gallons had been put in error into an old former tank.

*This statement is debatable - don't know if it  
is correct!*

KTW 12/7/61

*anyhow, 500 gal. gasoline  
got "lost".*

Mr. John Hamilton  
Public Works Department  
City of Burbank  
P.O. Box 6459  
Burbank, CA 91510

Dear Mr. Hamilton:

HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT (HMUSP)  
PROPOSED LEAK DETECTION PROGRAM (LDP)/TANK MONITORING PROGRAM (TMP)  
FACILITY AT: 2244 North Buena Vista Street, Burbank, Fire Station #13  
PERMIT NO. 00003307

This office has reviewed the proposed LDP/TMP submitted on September 2, 1987 for the subject facility.

You are hereby authorized to proceed with the LDP subject to any modifications or corrections indicated in red on the facility plot plan. Implementation of the TMP is further contingent upon negative observations (no apparent leakage or contamination) during LDP implementation.

This office shall be immediately notified and an interim report submitted within 10 days if prior to TMP implementation:

- Tank integrity test results indicate leakage of 0.05 gal/hr or greater for any storage tank. Such tank shall be evacuated immediately or may be retested within five (5) days. If results again indicate leakage of 0.05 gal/hr or greater, the contents of such tank must be evacuated immediately and the leak investigated further; and/or
- On-site soil sampling activities indicate existing contamination (odors, visual observations, indications from field instruments, etc.).

This office shall be immediately notified and an interim report submitted within 10 days if at any time during TMP implementation:

- Laboratory analysis of soil and/or groundwater samples indicates site contamination; and/or
- Final tank integrity test results indicate leakage.

The interim report shall contain:

1. Results of all completed LDP field tests, including tank integrity tests, soil and/or groundwater sample analysis, etc.

## INSTRUCTIONS

### HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT (HMUSP) PERMIT APPLICATION SUPPLEMENT

**\*\*DO NOT USE THIS FORM FOR CLOSURE, TRANSFER OR RENEWAL OF AN EXISTING HMUSP\*\***

- (A) Facility name, mailing address and facility address on new permit applications must correspond with information on Part II of the State Permit Application (SPA) form. Please correct mailing label information if affixed for an existing facility.
- (B) Use a separate application supplement for each permit activity. Check the new construction box only if there are no existing tanks and no previous HMUSP has been issued for this facility. Additional approval applications must be accompanied by a description of work and four (4) sets of plans and specifications as appropriate. Additional approval requests that change data previously supplied on Parts IV through VIII of the Hazardous Substance Storage Statement (HSSS) as filed with the California Water Resources Control Board or the SPA as filed with a County of Los Angeles HMUSP application shall include an updated SPA. The container number on the updated SPA must correspond with the previous number submitted.
- (C) Assessor parcel identification is required for new permit applications at existing facilities and new construction (no existing HMUSP) applications only.
- (D) The information required in Part D is the minimum necessary to allow issuance of a Provisional HMUSP. When a Provisional HMUSP has been issued for a facility, the owner will be required to submit for review and approval a facility plot plan, Leak Detection Program (LDP) and a Tank Monitoring Program (TMP) to be implemented in accordance with a timetable to be included within the Provisional HMUSP as conditions and limitations. New construction plans and specifications must show the location of and include details of all containers and monitoring devices proposed. A TMP must be approved and implemented prior to the issuance of a full term HMUSP.
- (E) A HMUSP application fee must accompany all applications. The state surcharge is required for first time HMUSP applications (not required for additional approvals). Specify the number of tanks at the facility.
- (F) Persons that have been notified to file for a HMUSP and do not store any hazardous materials underground should check the appropriate box and return this form to avoid any unnecessary follow-up mailings.

The storage of hazardous waste in an underground tank where the specific tank is named in a hazardous waste facility permit issued by the California Department of Health Services is not subject to the HMUSP requirements. Owners of such facilities must furnish the permit number for facilities where this exclusion is requested.

Final interceptors in industrial waste pretreatment systems, catch basins, refinery pipelines, lagoons, stormdrains, oil field gathering lines, well cellars, above ground storage tank spill containment, unlined pits or sumps, and piping not directly associated with a permitted facility are not subject to a HMUSP.

- (G) Existing facility and new construction HMUSP application supplements and SPA's must be signed by:
  - 1) A principal executive officer at the level of vice-president or by an authorized representative. The representative must be responsible for the overall operation of the facility where the tank(s) are located.
  - 2) A general partner proprietor.
  - 3) A principal executive officer, ranking elected official or authorized representative of a public agency.

Additional approval application supplements may be signed by a person under contract to and authorized by the owner/operator of a facility.

DEPARTMENT OF PUBLIC WORKS  
WASTE MANAGEMENT DIVISION

Mr. Carl Sjoberg  
County of Los Angeles Department of Public Works  
Waste Management Division  
Post Office Box 1614  
Alhambra CA 91802-1460

Dear Mr. Sjoberg:

I request the City of Burbank be granted a temporary exemption from the rule requiring monitoring devices on certain underground fuel tanks at Burbank fire stations.

The Burbank Fire Department is currently in the process of renovating or rebuilding all of our six fire stations and the work will include the removal and replacement of all existing underground fuel tanks. The new tanks, of course, will comply with all applicable codes.

Following is a tentative schedule for the removal of all Fire Department underground fuel tanks and their locations:

Station 16; 1600 North Bel Aire	May 1988 I-11168
Station 12; 644 N. Hollywood Way	July 1988 I-11170
Station 15; 1420 W. Verdugo Avenue	January 1989 I-11169
Station 14; 2305 W. Burbank Blvd	June 1989 I-1117a
Station 13; 2244 N. Buena Vista St.	October 1989 I-11171
Station 11; 353 East Olive Avenue	June 1990 I-11166

We will, of course, monitor and audit the fuel in each of the tanks during the interim period and will comply with any other procedures you deem prudent.

We appreciate your consideration.

Sincerely,

Curtis V. Reynolds  
Chief of Fire Department

LOS ANGELES COUNTY  
DEPARTMENT OF PUBLIC WORKS  
ADDITIONAL LDP/TMP REQUIREMENTS

The additional information or requirements checked below must be submitted to the Los Angeles County Department of Public Works, Waste Management Division, P.O. Box 4089, Los Angeles, CA 90051, in order to complete evaluation of the LDP/TMP proposal.

- 1. Plot plan to scale showing locations of tanks and associated piping, boring and monitoring well locations, buildings, adjacent streets, and north arrow.
- 2. Information pertaining to the tanks contradicts information previously submitted on the permit application form or hazardous substance storage statements. These contradictions must be corrected.
- 3. Number and location of soil and/or groundwater samples is not adequate.
- 4. Proposed sampling protocol.
- 5. Proposed sample analysis method(s).
- 6. Boring logs certified by a California registered geologist, California registered civil engineer with sufficient experience in soils, or a California certified engineering geologist.
- 7. Type of monitoring proposed is not appropriate for tank(s) number \_\_\_\_\_.
- 8. Documentation as to depth of groundwater at facility.
- 9. Monitoring well specifications and cross section showing well construction.
- 10. Monitoring well specifications do not conform to Los Angeles County guidelines for the groundwater condition.
- 11. Manufacturer and model number of monitoring sensor or device(s).
- 12. Manufacturer and model number of pressure line monitoring system.
- 13. Manufacturer and model number of overfill protection device.
- 14. Tank integrity test results and data sheets.
- 15. Manufacturer and model number of Tank Level Monitor (TLM) system.
- 16. Pressurized pipelines must be shown on the plot plan.
- 17. Monitoring for pressurized pipelines is required.
- 18. Other: Specify whether the pipe system operates under suction or pressure. If pressure then monitoring system must be proposed.

Project No. 13904

Dear Mr. Esfandi:

**SUBJECT: LEAK DETECTION/TANK MONITORING PROGRAM (LDP/TMP)  
CITY OF BURBANK, FIRE STATION NO. 13  
2244 NORTH BUENA VISTA STREET, BURBANK, CA  
AGENCY FILE NO. I-11171-3E**

This letter serves to amend our LDP/TMP proposal for the City of Burbank, Fire Station No. 13, dated May 28, 1987 and addresses the items outlined in your Additional LDP/TMP Requirements sheet and cover letter dated August 11, 1987.

1. The tank size of 1,000 gallons as reported on the permit application is incorrect. The size of 1,500 gallons as included in our report is the correct size of the tank.
2. An additional test boring has been added for a total of 2 borings. A revised Drawing No. 2 is included with this letter.
3. The piping system operates under suction as stated on page 1 of our report.

If you have any questions concerning this additional information please call me at (818) 998-7197.

Very truly yours,

ENVIROPRO, INC.

Project No. 13904-09

2. Verification of groundwater depth.
3. Site investigation proposal to define limits of contamination.

A final report shall be submitted upon completion of the LDP and TMP containing minimally the following information:

1. Tank integrity test results (unless previously submitted) containing numerical leak rates, calculations and other technical data generated during the test.
2. All soil and/or groundwater analytical results certified by the laboratory performing the tests and indicating constituents and properties analyzed for, testing methods employed and chain of custody documentation.
3. Locations and depths of sampling points, persons who obtained the samples and method used for obtaining the samples.
4. Verification of groundwater depth (if applicable).
5. A revised plot plan indicating the final location of all required monitoring wells if the proposed location and/or number of wells were modified by this office, or changed in the field.
6. Soil boring logs.
7. If not included within the original LDP proposal, manufacturer of monitoring system and type of sensors, and manufacturer and model number of the product-tight fill box or overfill protection.
8. Owner's signed statement verifying that the tank monitoring system has been installed and is operational.

A site inspection may be required prior to issuance of the operational permit to evaluate and test the monitoring system installation.

If you have any questions concerning this matter, please contact  
Mr. David Esfandi at (213) 226- 4433.

<p align="center"><b>*NOTICE OF DETERMINATION*</b> UNDERGROUND STORAGE TANK MAINTENANCE FEE LAW You are hereby notified of an amount due from you as shown below:</p>	

IMPORTANT! ** READ INSTRUCTIONS BEFORE COMPLETING **	A Number Of Tanks	B Rate Of Fee	C Total Fees Due (Col A x B)
1. As Determined (October 3, 1989).	1	\$200.00	\$ 200.00
2. Add: Tanks listed as exempt by the Water Board which you have determined are subject to the fee.		\$200.00	
3. Add: Tanks that were not listed by the Water Board but you have listed as subject to the fee.		\$200.00	
4. Subtract: Incorrectly identified tanks.	(-)	\$200.00	(-)
5. Total number of tanks and fees due as reported. (Add Lines 1, 2, 3, minus Line 4 in Columns A and C)		\$200.00	\$
6. Penalty of 25% (.25) if payment is made after 3/31/90.			\$
7. TOTAL AMOUNT DUE AND PAYABLE. (Add Lines 5 and 6 in Column C)			\$

\*\*FEES ARE DUE ON OR BEFORE 3/31/90\*\*

**GENERAL**

Senate Bill 299 (Chapter 1442, Statutes of 1989) provides that every owner, as of October 3, 1989, of an underground storage tank containing petroleum, who is issued a permit pursuant to Section 25284 of the Health and Safety Code, is required to pay an annual maintenance fee of \$200.00 for each tank. The fee is to be collected by the State Board of Equalization (Board) based on permit information provided by the Water Resources Control Board (Water Board). The amount of the fee has been determined based on all the tanks, except chemical tanks, for which you hold a permit.

**DEFINITIONS**

"Owner" is the owner, as of October 3, 1989, of an underground storage tank containing petroleum. "Owner" means any person including any city, county, district, agency, or department thereof. "Owner" does not include the state or federal government.  
"Petroleum" is defined as crude oil, or any fraction thereof, which is liquid at standard conditions of temperature (60 degrees Fahrenheit) and pressure (14.7 pounds per square inch).

**INSTRUCTIONS**

Please refer to the reverse side of this form for a listing of all your tanks (including chemical tanks) as recorded by the Water Board. Please review the list to insure that all tanks for which a fee has been determined have been properly identified. If you disagree with the identification, please report your corrections on the listing. The following instructions apply:

- AS DETERMINED - The tanks marked in this column were used to compute fees due.
- ADDS - Place a check in the add column for each additional tank for which the fee is due. These can be either tanks you have added in the spaces provided or tanks already listed for which no fee is indicated as being determined.
- DELETES - Enter a check for each tank which WAS IDENTIFIED by the Water Board but which you have determined IS NOT SUBJECT to the fee. You must provide a separate explanation and supporting documentation for each tank you delete. Deletions are subject to review and if found to be improper, you will receive a subsequent billing.

Bring total "adds" forward to Line 2 or Line 3 and total "deletes" forward to Line 4 in Column A above.

<p align="center"><b>CERTIFICATION:</b> I hereby certify that this determination, including any accompanying listing, and statements, has been examined by me and to the best of my knowledge and belief is true, correct and complete.</p>

**WELL INVESTIGATION PROGRAM - RECLASSIFICATION OF SITE PRIORITIES  
(FILE NO. 104.1291)**

Your facility had previously been investigated by Regional Board staff and put on a hold (Priority 3) for further evaluation in the future to determine whether an additional subsurface investigation was needed after reviewing work on adjacent sites.

On further review of file records and other information, we have determined that "no further action" is required at your site with respect to the Well Investigation Program (Priority 4). However, you are requested to notify this Board of any change in your operations including storage and handling of chemicals or processing and disposal of any waste.

Please note that this letter in no way releases you from any chemical and/or waste handling requirements of this or any other agency.

If you have any questions regarding this matter, please contact Mr. Yue Rong at (213) 266-7604.

## 1.0 INTRODUCTION

This report presents a proposed leak detection program and tank monitoring program for the City of Burbank Fire Station No. 13 at 2244 Buena Vista Street, Burbank, California. Fire Station No. 13 is maintained by the Burbank Public Works Department and contains one underground storage tank that is subject to regulation under Title 11, Division 4 of the Los Angeles County Code.

A plot plan for Fire Station 13 showing the location of the underground storage tank is shown in Drawing 1. The underground tank has a capacity of 1,500 gallons and stores diesel fuel to supply the City motor pool. A suction pumping system is used to dispense the product. The tank dimensions are: diameter - 64", length - 9 feet. The bottom elevation of the tank is about 10 feet below grade.

Enviropro, Inc. is currently working under contract with the City of Burbank to provide the following services:

- 1.1 Review all precision tank test results to ensure compliance with Los Angeles County requirements. Test results are discussed in Section 4.1 of this report.
- 1.2 Develop Leak Detection Programs and Tank Monitoring Programs for all City owned facilities with underground tanks and submit to the Los Angeles County Department of Public Works for review and approval.
- 1.3 Develop a training program for City personnel pertaining to on-going monitoring and inventory control requirements.

## 2.0 SITE LOCATION

The Police Services Facility is located near the intersection of Hollywood Way and Verdugo Avenue in the southwest section of the City of Burbank (see Figure 1). The City of Burbank is situated in the southeastern part of the San Fernando Valley, bounded on the north by the Verdugo Mountains and on the south by the Santa Monica Mountains.

### 3.0 LOCAL GEOLOGY/HYDROGEOLOGY

The site lies 3.25 miles northwest of the Los Angeles River and 1.1 miles southwest of the Verdugo Mountains. The cement lined channel of the Burbank Western Channel, a tributary to the Los Angeles River, lies .1 mile to the northeast of the Fire Station.

The Fire Station is at an elevation of approximately 657 feet. Ground water below the site is at an elevation of approximately 520 feet. Therefore, the distance from the surface to ground water is approximately 137 feet (see Figure 2).

Hydrologically, the San Fernando Valley is divided into 4 hydrologic subareas, with Fire Station 13 being within the San Fernando subarea. The San Fernando subarea has been exploited for its ground water for many years. Water removed from the southeastern portion of the basin has been used as a source for drinking water by various water municipalities.

In the vicinity of the Fire Station, Recent Alluvium is found on the ground surface. This geological unit consists of sand, gravel, and clay. Infiltration rates of surface waters are high near the location of the Fire Station. Below the Recent Alluvium is the Older Alluvium. It is a sand and gravel sequence derived from granitic and metamorphic material eroded from the San Gabriel and Verdugo Mountains. The Older Alluvium in the southeastern part of the San Fernando hydrologic subarea has good ground water storage and flow capabilities.

Near the site, faulting does not appear to influence the hydrological characteristics of the subsurface. Therefore, surface input near the location of the Fire Station could be rapidly incorporated into the ground water aquifers which are currently being pumped.

### 4.0 LEAK DETECTION PROGRAM

#### 4.1 Precision Tank Testing Results

The underground tank was precision tested on August 22, 1986 using the Hunter Environmental Services, Leak Locator testing system. The calculated leak rate for the high level test was -0.001 gallons per hour.

The underground storage system passes the 0.05 gallon per hour criteria established by NFPA 329 for tank tightness. Please refer to Appendix A for the precision tank testing report.

#### 4.2 Test Boring Location

A test boring will be drilled adjacent to the underground tank for the purposes of collecting soil samples and constructing a monitoring well. The boring will be drilled to a vertical depth of 40 feet, and soil samples will be collected at vertical depths of 5, 10, 20, 30 and 40 feet.

A single test boring is proposed. To increase the likelihood of intercepting soil contamination, the test boring will be slant drilled to intercept a point beneath the center of the tank.

Drawing 2 shows the location of the test boring. Figure 3 shows a cross-section of a typical slant boring, including a range of drilling angles and sampling locations.

#### 4.3 Subsurface Utility Check

Before the boring is drilled, the following precautions will be exercised to avoid contact with any underground utilities during drilling:

1. The boring will not be established any closer than three (3) feet from any underground tank and one (1) foot from any piping.
2. Prior to drilling, a utility check will be performed by inserting a small diameter metal rod into the soil to be drilled. The rod will be used to verify the absence of underground utilities prior to advancing the drill auger. A check will be done every 2-3 feet until a depth of 8 feet is reached, or until the City's consultant feels comfortable that utilities are not present. The drawings provided with this document serve as a general guide for drilling locations. Enviropro, Inc. does not guarantee these drawings to accurately depict the precise location of tanks, pipings and other subsurface utilities/structures.
3. In addition to these precautions, for test borings adjacent to any pipeline (if

applicable), the pipeline will be precisely located using electronic metal detection equipment or equivalently effective procedures, prior to drilling.

#### 4.4 Drilling Procedures

All drilling will be conducted by qualified personnel who have demonstrated previous experience in drilling operations involving environmental soil sampling and well construction. Based upon geologic review of nearby borings, it is anticipated that a hollow stem auger drill will be usable; however, operators should be familiar with alternative drilling procedures using either air rotary or percussion drills should geologic conditions dictate their use. The drill rig shall have a minimum depth rating of 150 feet with an 8-inch auger.

The test boring shall be slant drilled using a 7"-8" hollow-stem diameter auger at the location shown in Drawing 2. The test boring will be drilled to a vertical depth of 40 feet. Drilling angle of the slant boring will be set to intersect a point beneath the bottom edge of the tank. The maximum drilling angle shall be 15°.

During the drilling and sampling operation, the borings will be monitored for organic vapors with a portable photoionization analyzer. The gas analyzer will provide information about subsurface vapors to give an indication of potential soil contamination. If soil contamination is suspected at depths reaching 40 feet, drilling and sampling will be continued until the plume boundary is passed, or ground water is reached.

#### 4.5 Sampling Procedures

Soil samples will be collected from the test boring at vertical depths of 5, 10, 20, 30, and 40 feet below the ground surface. These samples will be collected with a split-spoon sampler using nonreactive liners (stainless steel sampling tubes). To eliminate the possibility of cross-contamination, a high pressure water/steam cleaner will be used to thoroughly clean the drilling and sampling equipment between collection of each sample.

After collection, all soil samples will be immediately wrapped with aluminum foil, placed into a sealable water tight plastic bag and stored in a refrigerated ice chest during transport. Each sample will be labeled with an identification number, sampling location, and depth. Soil samples will be transported according to EPA protocol, including chain-of-custody documentation and reporting.

#### 4.6 Disposal of Cuttings

Auger cuttings and sample spoils from the test boring will be placed into a separate approved container for storage. Based upon laboratory results from the chemical analysis of the soil samples, the soil refuse will be disposed in an appropriate manner. Contaminated refuse will be transported to an approved disposal facility. Noncontaminated soil can be used as fill material or transported to a public disposal site.

#### 4.7 Laboratory Analysis

Soil samples will be transported in a refrigerated ice chest to a state certified laboratory for analysis. The samples will be transported to the laboratory on the same day as sampling unless time constraints prevent immediate transport. In this case, soil samples shall be stored at 4°C or less during the interim and the location and duration of storage shall be documented on the chain-of-custody papers. Composite samples will be analyzed using gas chromatography equipped with flame ionization detection in accordance with EPA method 8015. The detection limit shall be 1 ppm or less for all soil analysis.

A single composite sample will be derived from all soil samples collected from the test boring. The compositing procedure will use a cork bore to extract equal volumes from each of the soil samples, which are then placed directly into a purge and trap apparatus. The original samples will be retained under refrigerated conditions in the event that discrete analysis of the individual samples is required. If pollution is detected in any composited samples, the Los Angeles County Public Works Department shall be immediately notified to determine if discrete analysis is required. Analysis of the composite samples shall be completed within 7 days after collection. This

will allow sufficient time for discrete analysis under EPA protocol, if required. This second analysis (if required) shall be performed within 14 days of the original sampling date.

## 5.0 Tank Monitoring Program

After site and tank integrity has been established, a monitoring system will be installed. The monitoring system will provide continuous monitoring of the tank farm and will give visual and audible warnings if hydrocarbon vapors are present in the monitoring wells.

### 5.1 Monitoring Well Construction Standards

The test boring will be converted to vadose zone monitoring wells. A cross-sectional view of a typical monitoring well is shown in Figure 4.

Construction criteria for the monitoring well shall be as follows. The test boring will be filled with concrete up to a depth near the bottom of the tank. A 2-inch PVC well casing will be installed from ground level to a depth equal with the tank backfill or one-foot below the tank bottom, whichever is deepest. The casing slots will extend from the bottom of the well casing to a depth of 5-feet below grade or to a level equal to the midpoint of the tank, whichever is shallowest. Blank casing shall be used from this point up to grade level (Figure 4). The well casing will be capped at the bottom with either a threaded or slip jointed cap. In no case shall glues or adhesives be used to attach the cap.

A gravel pack to fill the annular space shall extend along the length of the slotted well casing. The particle size of the gravel pack shall be of sufficient size to prevent infiltration into the well casing. A one-foot bentonite seal shall be installed above the gravel pack followed by an annular seal of cement grout to fill the remaining annular region. After the cement grout seal is set, the borehole opening shall be covered with plywood or similar material and marked and secured to prevent accidental injury to people and/or damage to property.

The well head assembly and well cover shall not be installed until after the laboratory analysis has been completed and evaluated. If pollution is

detected in the environment, all project work shall be temporarily halted until the Los Angeles County Public Works Department has evaluated all data and has made a determination of further requirements. If no pollution is detected or if the County has determined that no additional studies are required, then the well head and well cover shall be installed.

The well head assembly shall be constructed as shown in Figure 5. The well cover shall be precast, water tight, locking and set in concrete to protect the well-head. The manhole cover will be traffic rated for 18-wheel truck loads if subject to vehicular traffic. The well shall be identified with pertinent information to include well identification number, type of monitoring device installed, casing diameter, depth of well and location of the perforated interval. This information should be printed on a metal plate attached to the inside of the well cover in a readable form.

#### 5.2 Continuous Electronic Monitoring Equipment

A Los Angeles County approved monitoring system will be installed to provide continuous vadose zone monitoring adjacent to the underground tanks. An alarm panel capable of providing both audible and visual warnings shall be mounted inside the fire station garage. The alarm panel will be installed by a certified electrician. A representative panel location and wiring configuration is shown in drawings 2; the exact specifications will be coordinated with City of Burbank officials after test borings have been established.

Direct burial type cable shall be used between the monitoring probes and the alarm panel, except inside the building where electrical conduit shall be used. All wiring shall be buried a minimum of 2 inches below existing grade level. The vapor sensors will be suited for detection of organic vapors. The operational alarm point of the vapor sensors will be determined by the City's consultant, based upon laboratory results of the soil samples.

Manufacturers of monitoring systems which are currently approved by Los Angeles County are listed below:

Emco Wheaton  
Genelco (Soil Sentry)  
Universal Sensors and Devices (Leak Alert)  
US Industrial

### 5.3 Overfill Protection

The fill pipe for the underground tank will be retrofitted with Los Angeles County approved overfill protection devices. Manufacturers of currently approved overfill protection devices are:

CNI Manufacturing  
Emco Wheaton  
Pomeco Corp.  
Skyway Container Rite Products

### 5.4 Inventory Control

An inventory control program will be developed by Enviropro, Inc. and implemented for all tanks.

The exact manufacturer of the vapor monitoring, and overfill protection equipment to be used in this program has not been selected at this time. This work plan, once approved, will be used to solicit bids from qualified vendors to conduct the work described herein. The bid evaluation procedure, in addition to recommendations from Enviropro, Inc., will establish the type of equipment used. The County of Los Angeles will be notified in writing as to the type and manufacturer of equipment selected. The manufacturer(s) of equipment selected will be from those outlined in Sections 5.2-5.3 above.

## 6.0 Program Implementation

Upon approval of this work plan by the Los Angeles County Public Works Department, the leak detection program will be implemented. If no environmental contamination is found during the leak detection program, the tank monitoring program will be implemented without interruption. Upon completion, a final report detailing all field procedures and laboratory results will be assembled and submitted to the County. This report will serve to demonstrate the City of Burbank Fire Station No. 13 tank facility's compliance with all Los Angeles County regulatory guidelines. Upon County approval of the final report, an operational hazardous materials underground storage permit will be issued.

If environmental contamination is found during the leak detection program, an interim report will be prepared and submitted to the County. This report will describe all field procedures and laboratory results, and will discuss recommendations for further remedial investigation (if necessary) or remedial action which are consistent with the degree of contamination present.

As part of the program implementation, completion and reporting, Enviropro, Inc. will perform the following tasks and provide the following services for the City of Burbank:

- 6.1 Provide field supervision services to ensure that all work is conducted as specified.
- 6.2 Prepare and submit to Los Angeles County any interim reports necessary during program implementation.
- 6.3 Conduct field inspections of completed work.
- 6.4 Prepare "as built" drawings as required after completion of field work.
- 6.5 Prepare and submit to the County of Los Angeles a final report of compliance verifying completion of all required work.

# HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT

## PART A — GENERAL CONDITIONS AND LIMITATIONS

### TERM OF PERMIT

1. The combined provisional and full term operational permits shall be valid for a maximum period of five (5) years from the effective date. However, if the Department of Public Works (DPW) finds that the life expectancy of a facility is less than five (5) years, the DPW may adjust the term of the permit to reflect such a condition.

### FEES

2. All fees shall be due and payable on the billing date established by the DPW. Fees not paid within 30 calendar days from the billing date shall be considered delinquent. Delinquent fees shall be subject to a 10 percent penalty fee for each 30 day period beyond the billing date that the fee is due. Permits for which the annual permit fee installment is delinquent for 90 days or more are subject to suspension.

### REPORTS AND RECORDS

3. At least annually and due by the anniversary of the effective date of this permit, a written report must be submitted to the Department of Public Works, Waste Management Division, P.O. Box 4089 Terminal Annex, Los Angeles, CA 90051 detailing (but not limited to) the following:
  - a. Any changes in the type of hazardous materials stored within the facility.
  - b. Any changes in the uses of the underground facility.
  - c. Changes or modifications to monitoring procedure.
  - d. A detailed account of any unauthorized discharges, and the remedial measures employed.
  - e. Any modifications to the facility except for routine required maintenance.

In the event there has been no change of operation nor unauthorized release, a negative declaration to that effect may be submitted.

The report or negative declaration shall be certified by the permittee or an authorized representative who is responsible for operations at the facility.

This report is required by local agencies to satisfy Section 25286(c) of the State of California Health and Safety Code. A report form will be made available to owners and operators to comply with this requirement. The report shall be delinquent 30 days after its due date and as such may result in suspension or revocation of the permit.

4. Every permittee shall provide testing, monitoring (if applicable), and inspections in compliance with this permit and shall maintain records adequate to demonstrate compliance therewith.
5. All required records shall be maintained by the permittee and made available for inspection for a period of time not less than three (3) years from the date of the required annual report for the year during which the testing, monitoring or inspection was performed. Said records shall be made available to the DPW, County Health Officer or Forester and Fire Warden during normal working hours and at any time upon reasonable notice.

### RENEWALS AND EXTENSIONS

6. If this is a provisional permit, it may be extended to a maximum of one (1) additional year upon written application stating the reasons for such a request and upon approval by the Director of Public Works.
7. Every application for the renewal of a operational permit or extension of a provisional permit shall be made at least 30 days prior to the expiration date of such permit. If a timely application for renewal has been submitted, the permit shall remain in effect until the DPW has made a decision and any administrative appeal has been exhausted.

### APPEALS

8. Any person dissatisfied with the decision of the DPW may appeal the decision, in writing, to the Appeals Board, setting forth with particularity the ground or grounds for the appeal. Such appeal shall be submitted within 30 days after notice of the decision has been given.

### ADDITIONAL APPROVALS AND REPAIRS

9. Additional approvals shall be required for any of the following actions:
  - a. Tank repair.
  - b. Modifications.
  - c. Change or addition of hazardous materials stored.
  - d. Change of approved monitoring system.
10. Procedures for an application for a permit shall also apply to an application for an additional approval. Each application for an additional approval shall be accompanied by the appropriate fee and supporting information.
11. Any substantial modification or repair of a facility other than minor repairs or emergency repairs shall be in accordance with plans to be submitted to the DPW as an additional approval.
12. Permittee shall carry out routine maintenance, ordinary upkeep and minor repairs in a careful and safe manner. No permit will be required for such maintenance, upkeep and repairs.
13. Permittee may make emergency repairs to a facility in advance of seeking an additional approval whenever an immediate repair is required to prevent or contain an unauthorized discharge or to protect the integrity of the containment. However, within five (5) working days after such emergency repairs have been started, permittee shall seek additional approval by submitting drawings or other information adequate to describe the repairs to the DPW.

### CLOSURES, DECONTAMINATION AND NEW CONSTRUCTION

14. Replacement of tanks at an existing facility shall be considered a closure of the tanks to be replaced and a new installation of tanks, and all fees shall be assessed accordingly.
15. No tank shall be abandoned. Tanks which are temporarily out of service, and are intended to be returned to use, must continue to be monitored and inspected. Any tank which is not being monitored and inspected must be closed or removed in a manner approved by the DPW.
16. Prior to any permanent or temporary closures being initiated, an Application for Closure form, the appropriate fee and required supporting information shall be filed with the DPW.
17. Plans for the decontamination of a facility shall be submitted to the DPW for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies include the California Regional Water Quality Control Board, the Los Angeles County Department of Health Services and the South Coast Air Quality Management District.
18. The installation of a new tank shall require submittal to the DPW of an application for new construction, the appropriate new construction plan clearance fee and supporting information as required by the DPW.

### TRANSFERS

19. A Hazardous Materials Underground Storage Permit may be transferred to a new owner of the same facility provided:
  - a. The new owner accepts full responsibility for all obligations under this permit at the time of the transfer of the facility.
  - b. The transfer shall be documented on a form provided by the DPW within 30 days of transfer of ownership.
  - c. The appropriate fee is paid.

#### UNAUTHORIZED DISCHARGES

20. As soon as any person in charge of a facility or responsible for emergency response for a facility has knowledge of any confirmed or unconfirmed unauthorized discharge of a hazardous material, such person shall take all necessary steps to ensure the discovery, containment, and cleanup of such discharge and shall notify the DPW of the occurrence as required.
21. Any owner or operator who has knowledge of a confirmed unauthorized discharge shall immediately notify the DPW.
22. Within the jurisdiction of the Los Angeles County Fire Department, an unauthorized discharge shall also be reported to the Los Angeles County Forester and Fire Warden, Fire Prevention and Conservation Bureau.
23. The permittee shall institute and complete all actions necessary to remedy the effects of any unauthorized discharge, whether sudden or gradual, and supply information on such actions to the DPW.
24. The continued use of, and permit approval for, existing facilities is subject to review and modification or termination by the DPW whenever there has been any unauthorized discharge. In determining whether continued underground storage in such facility is suitable, the DPW shall consider the age of the facility, the methods of containment, the methods of monitoring, the feasibility of the required retrofit, the concentration of the hazardous materials contained, the severity of potential unauthorized discharge and the suitability of other long term preventive measures.

#### EVALUATIONS AND INSPECTIONS

25. Whenever the approval or satisfaction of the DPW may be required for a design, monitoring, testing or other technical submittal by a permittee, the DPW may require such permittee, at the permittee's sole cost and expense, to retain a suitable qualified independent engineer, chemist or other appropriate professional consultant acceptable to the DPW, for the purpose of evaluating and rendering a professional opinion respecting the adequacy of such submittal.

26. The DPW may conduct inspections for the purpose of ascertaining compliance by the permittee, and effecting corrections of any conditions which would constitute any violation of any statute, code, rule or regulation affecting the underground storage of hazardous materials.
27. Whenever necessary for the purpose of investigation or enforcement, or whenever a representative of the DPW, County Health Officer, or Forester and Fire Warden has reasonable cause to believe that there exists in any structure or upon any premises any condition which constitutes a violation, said representative may enter such structure or premises at all reasonable times to inspect the same, or to perform any duty imposed by law.
28. The permittee shall conduct regular inspections of the facility to assure compliance with this permit and shall maintain logs or file reports in accordance with this permit.
29. The DPW may require the periodic employment of special inspectors to conduct an audit or assessment of permittee's facility to make a hazardous material safety evaluation and to determine compliance.
30. Permittee shall, within 30 days of said evaluation, file with the DPW a plan to implement all recommendations, or shall demonstrate to the satisfaction of the DPW why such recommendations shall not be implemented.
31. The DPW may require that any regular or special inspection by the permittee be made in the presence of a representative of the DPW. The DPW may further require advance notice of not less than 72 hours as to the availability of equipment, material and personnel required to conduct such inspections.

#### SUSPENSIONS AND REVOCATIONS

32. This permit is subject to suspension or revocation if conditions exist which would justify denial of a permit or if permittee fails to correct unsatisfactory conditions.
33. Failure to adhere to all applicable conditions and limitations of this permit shall constitute a willful violation of Title 11, Division 4 of the Los Angeles County Code and may result in civil or criminal penalties, revocation of this permit, or both.

## UNDERGROUND STORAGE TANK INTEGRITY RESULTS

THE EZY-CHEK LEAK DETECTION SYSTEM WAS USED IN THE TESTING. THE SYSTEM IS CAPABLE OF DETECTING A LEAK RATE OF .05 GALLONS PER HOUR, BUT THIS IS NOT TO BE CONSTRUED AS A PERMISSIBLE LEAK RATE, BUT AS THE ACCURACY TOLERANCE OF THE SYSTEM. TTI ASSUMES NO LIABILITY FOR ANY PRODUCT LEAKAGE. FINAL RESULTS ARE IN GALLONS PER HOUR.

BURBANK, CA 91504  
File Number: 104.1291

Dear Owner/Operator,

The California Regional Water Quality Control Board, Los Angeles Region ("Regional Board") staff has conducted an assessment of your facility to determine the extent of solvent usage and to assess past and current chemical handling, storage and disposal practices. Your company is among those in the San Fernando Valley which have received the Regional Board's "No Further Action" letters based on one or more of the following categories: 1) information provided in your pre-inspection questionnaire disclosed little or no solvent use; 2) the results of a staff inspection disclosed no solvent use; or 3) completed assessment work indicated no solvent contamination in the soil.

The purpose of this letter is to inform you that, based on the information provided to U.S. EPA by the Regional Board to date, you will not be asked by the U.S. EPA or the Regional Board to participate in regional groundwater cleanup projects currently planned for San Fernando Valley. Your company is no longer part of the U.S. EPA Superfund process, and the Regional Board and the U.S. EPA plan no further action concerning your facility.

You may be contacted by those potentially responsible parties ("PRPs") that have been asked to participate in the groundwater cleanup efforts. In the event you are contacted by PRPs, please feel free to contact the appropriate Regional Board or U.S. EPA staff for additional information or assistance. The telephone numbers of Regional Board and U.S. EPA staff are provided on the enclosed contact list.

Sincerely,

*Keith A. Takata*

FIRE CHIEF

August 10, 1998

Boys and Girls Club  
2244 N Buena Vista St  
Burbank CA 91504

Subject: **Hazardous Materials Inventory Disclosure Statement**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

Section 25505(d) of the California Health and Safety Code requires all businesses that store, use or handle hazardous materials in quantities that meet or exceed the thresholds established in Section 25503.5, must submit a completed hazardous materials inventory disclosure statement annually. Our records indicate that you meet these requirements.

Enclosed you will find the new Hazardous Materials Inventory Disclosure Statement. The Hazardous Materials Inventory Disclosure Statement is currently a part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions and complete the appropriate forms. Return the **ORIGINAL** carefully completed form to the Burbank Fire Department by September 30, 1998. Failure to submit a properly completed inventory form by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. **BE SURE TO RETAIN A COPY FOR YOUR RECORDS.**

If you have any questions or if we can be of any assistance, contact the Fire Prevention Bureau at (818) 238-3473.

Thank you for your cooperation.

(Please read before signing)

I hereby acknowledge that I have read this application and that the information stated herein is true. I agree to comply with all ordinances and State laws relating to electrical wiring.

I hereby certify that I am properly registered and/or licensed as required by the City of Burbank and/or State of California, or that I am the legal owner of the above described property, and I certify that in the performance of the work for which this permit is issued I shall not employ any person who does not possess these contractors licenses required by law.

I further certify that I shall not employ any person to perform any work hereunder so as to become subject to the California Workers' Compensation Laws, or that if I employ any person to perform work hereunder, I will maintain a current policy of Workers' Compensation Insurance pursuant to the laws of the State of California during the life of this permit. No work will commence hereunder by any other person, partnership, association or corporation that employs others until they first file their own copy of a current Certificate of Workers' Compensation Insurance with the City of Burbank.

I understand and agree that should I fail to comply with the above, this permit shall be deemed revoked.

RESOLUTION NO. 2377

**A RESOLUTION OF THE PLANNING BOARD OF  
THE CITY OF BURBANK APPROVING  
CONDITIONAL USE PERMIT NO. 93-27**

**(2244 N. Buena Vista Street - Boys and Girls Club of Burbank  
and the City of Burbank, Applicants)**

**THE PLANNING BOARD OF THE CITY OF BURBANK FINDS:**

A. The Planning Board of the City of Burbank at its special meeting of December 20, 1993, held a public hearing on Conditional Use Permit No. 93-27, as applied for by the Boys and Girls Club of Burbank and the City of Burbank authorizing the operation of the Boys and Girls Club of Burbank on the vacated Fire Station property, located at 2244 N. Buena Vista Street, Burbank, California, R-3, Multi-family Residential zone.

B. Said hearing was properly noticed in accordance with the provisions of Section 31-1942 of the Burbank Municipal Code.

C. The Planning Board considered the report and recommendations of the City Planner and the evidence presented at such hearing.

**THE PLANNING BOARD OF THE CITY OF BURBANK RESOLVES:**

1. Conditional Use Permit No. 93-27 is hereby approved subject to the applicant complying with all requirements of the Burbank Municipal Code and the conditions set forth in Exhibit "A" to this Resolution. In conditionally approving the application, the Planning Board specifically finds:

- a. The proposed use at the above location and as set forth in the application is authorized by Chapter 31 of the Burbank Municipal Code as a use permitted in the zone subject to a conditional use permit;
- b. The proposed use will not be detrimental to existing uses or to uses specifically permitted in the zone;
- c. The proposed use will be compatible with other uses on the same lot and in the general area in which said uses will be located;
- d. The site is adequate in size and shape to accommodate the proposed use and all of the yards, setbacks, walls, fences, landscaping, and other features required to adjust the use to the existing or future uses permitted in the neighborhood;

- e. The site relates to streets and highways properly designed and improved to carry the type and quantity of traffic generated or to be generated by the proposed use;
- f. The conditions imposed by this Resolution are necessary to protect the public health, convenience, safety, and welfare; and
- g. The proposed use at the location set forth in the application will not have a significant effect on the environment.

2. The Secretary to the Planning Board shall mail a copy of this Resolution to the applicant and report this decision to the Council in accordance with Section 31-1946(b) of the Burbank Municipal Code.

PASSED and ADOPTED this 20th day of December, 1993.

CITY PLANNING BOARD

  
Chairperson

STATE OF CALIFORNIA  
COUNTY OF LOS ANGELES  
CITY OF BURBANK

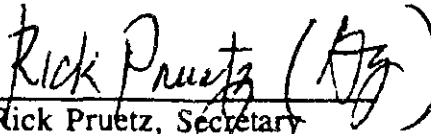

I, Rick Pruetz, Secretary of the Planning Board of the City of Burbank, certify that this Resolution was adopted by the City Planning Board at its regular meeting held on the 20th day of December, 1993 by the following vote:

AYES: Wagner, Hill, Gerred, Wheeler

NOES: None

ABSENT: Mathews

ABSTAINED: None

  
Rick Pruetz, Secretary

**- IMPORTANT DECLARATION -  
(PLEASE READ BEFORE SIGNING)**

I hereby acknowledge that I have read this application and that the information stated herein is true. I agree to comply with all ordinances and State laws regarding Fire and Life Safety Systems.

I hereby certify that I am properly registered and/or licensed as required by the City of Burbank and/or State of California, or that I am the legal owner of the above described property, and I certify that in the performance of the work for which this permit is issued I shall not employ any person who does not possess these Contractors licenses required by law.

I further certify that I shall not employ any person to perform any work hereunder so as to become subject to the California Workers' Compensation Laws, or that if I employ any person to perform work hereunder, I will maintain a current policy of Workers' Compensation Insurance pursuant to the laws of the State of California during the life of this permit. No work will commence hereunder by any other person, partnership, association or corporation that employs others until they first file their own copy of a current Certificate of Workers' Compensation Insurance with the City of Burbank.

I understand and agree that should I fail to comply with the terms of this permit shall be deemed revoked.

Re: Building 57, Boys and Girls Club  
2244 North Buena Vista Street, Various Areas  
Burbank, California 91504

Pursuant to your request, A-Tech Consulting, Inc. (A-Tech) has completed a Limited Asbestos Assessment of various areas of the Building 57, Boys and Girls Club located at 2244 North Buena Vista Street, in Burbank, California. The following report summarizes the findings of this inspection. Please direct all questions for this project to A-Tech's CSST or CAC who performed the sampling at (800) 434-1025 or pm@atechinc.net.

## **1.0 INTRODUCTION**

A-Tech was contacted by Mr. Dean Pearson with City of Burbank, Public Works Department to confirm the presence or absence of asbestos in various areas of the Building 57, Boys and Girls Club located at 2244 North Buena Vista Street, (subject property), in Burbank, California. The assessment was conducted by Miri Khalaf - CAC #22-7126 under the supervision of Robert Williams - CAC #96-1980 with A-Tech on May 05 and 08, 2023. This report is not intended to be a comprehensive assessment.

## **2.0 SCOPE OF ASSESSMENT**

This limited asbestos assessment was performed to identify visible and/or readily accessible suspect friable and non-friable Asbestos-Containing Building Materials (ACBMs) at a subject property. The intent of this assessment was to satisfy all regulatory requirements for renovation and/or demolition. Friable ACM, as defined by the U.S. Environmental Protection Agency (EPA) and South Coast Air Quality Management District (SCAQMD), Rule 1403, is a material that, when dry, can be easily pulverized, crushed or reduced to powder by hand pressure. Non-friable ACBM that can potentially be broken, crumbled, pulverized or reduced to powder in the course of demolition or renovation activities are classified as Class I or Class II, non-friable ACBM. These assessments are typically accomplished by, and limited to, an in-depth site reconnaissance, a review of readily available building records, and a review of readily available asbestos Operation and Maintenance (O&M) plans. In the event that suspected or known ACBMs exist at a given site, samples of the potential ACBMs may be collected for subsequent laboratory analysis.

This inspection was limited to representative locations in the project area that may be affected by the renovation activities. Limited intrusive and/or non-destructive sampling was conducted as a part of the scope of services performed. If additional suspect materials are observed by the contractor, abatement contractor, building owner and/or its representatives, A-Tech should be notified to conduct additional testing. Certain materials may not have been visible/accessible during the initial assessment such as subsurface materials, live electrical equipment, materials in pipe chases, barrier paper under wood, sub-slab membranes, materials under the building structure, in wall and ceiling cavities, etc.

This Limited Asbestos Assessment was conducted in accordance with the scope of services authorized by Mr. Dean Pearson with Building 57, Boys and Girls Club in accordance with current regulatory guidelines.

### 3.0 PREVIOUS ASSESSMENT/HISTORICAL DATA

No prior asbestos related documentation for the subject property was reviewed or made available.

### 4.0 VISUAL INSPECTION AND SAMPLING/ANALYTICAL METHODOLOGY

To identify suspect friable and non-friable ACBM, as required under California law, a California Occupational Safety Health Administration (CAL-OSHA) Certified Site Surveillance Technician (CSST) and/or Certified Asbestos Consultant (CAC) is required to conduct visual and/or bulk assessments of a subject property.

During this assessment, A-Tech identified homogenous areas of suspected ACBMs for purpose of sampling in accordance with current CAL-OSHA/EPA (AHERA) requirements. These areas were defined with respect to similarities in appearance, age, use, type, color, and/or texture. The condition and estimated quantity of the suspected materials were also assessed. Based upon A-Tech Consulting, Inc.'s observations, ten (10) homogeneous suspect asbestos containing building materials were identified. Only pre-selected materials delineated by City of Burbank, Public Works Department were sampled during this inspection. Please refer to Appendix A for a complete list of sampled materials.

To evaluate the presence of asbestos in these suspected ACBMs, A-Tech obtained thirty-two (32) bulk samples, which appeared to represent each homogeneous area (see tables). However, some of the samples analyzed may have multiple layers of material, which the laboratory is required to separate and analyze independently. The total amount of samples analyzed was fifty (50). Regarding multiple layered materials, if one layer tests positive for asbestos content, the entire sample is considered positive.

Materials containing greater than one-tenth of one percent ( $>0.1\%$ ) asbestos by weight is considered positive in this report and defined as asbestos containing construction material (ACCM), and anything  $>1\%$  is an asbestos containing material.

Following Asbestos Hazard Emergency Response Action (AHERA) inspection methodology, the inspector identifies each suspect material and categorizes it into one of three established material types: surfacing, thermal system or miscellaneous (See Attached Table: Asbestos Bulk Sample Analysis for Individual Sample Identification). The following describes the characteristics for these three categories:

- *Surfacing material* - means material in a building that is sprayed on, trowelled on, or otherwise applied to surfaces such as acoustical plaster on ceilings, fireproofing materials on structural members, or other materials on surfaces for acoustical, fireproofing, or other purposes.
- *Thermal system insulation* - means material in a building applied to pipes, fittings, boilers, breeching, tanks, ducts, or other interior structural components to prevent heat loss or gain, or water condensation, or for other purposes.
- *Miscellaneous material* - means interior building material on structural components, structural members or fixtures, such as floor and ceiling tiles, and does not include surfacing material or thermal system insulation.

Amended water-spray wet methods were used during the collection of each friable sample, such as suspended ceiling tiles. Whenever possible A-Tech does not conduct destructive sampling (with the exception of vacant buildings to be demolished). For example, samples of floor tile were collected by taking a small chip out of a corner or area that was already damaged.

After collecting each sample, the sampling equipment was cleaned with a moist towelette. Each sample was sealed in a sample container and assigned a discrete sample identification number.

## 5.0 LABORATORY ACCREDITATION & ANALYTICAL PROCEDURES

The thirty-two (32) samples obtained from the subject property were delivered to Eurofins EPK Built Environment Testing, LLC located at 1010 N. Central Avenue, Suite 390, Glendale, California 91202 (866) 888-6653 (under chain-of-custody procedures) for analysis. This laboratory is a fully accredited laboratory by the National Institute of Standards and Technology (NIST) through participation in the National Voluntary Laboratory Accreditation Program (NVLAP) lab code #200945-0.

On May 09, 2023, the samples were analyzed for asbestos by PLM, using dispersion staining in accordance with U.S. EPA Procedures outlined in 40 CFR 763, Subpart F, Appendix A (AHERA). The laboratory analyst using a stereomicroscope made asbestos volume estimates. Utilizing the PLM 600R/R-93/116 method, the result given is a semi-quantitative result (down to <1%) which reflects a calibrated visual estimate from an analyst using both Polarized Light Microscopy and Stereomicroscopy.

On May 11, 2023, at the request of Mr. Dean Pearson, the point counting analytical method was utilized for the five (5) Brown with Black and White Spots Speckled Mosaic Terrazzo sample(s) collected from the subject property, which were detected at <1% Chrysotile asbestos content. The laboratory analyst point counted these samples using EPA 600/R-93/116 method with 1,000 point count.

## 6.0 ASBESTOS IDENTIFICATION

Based upon the analytical results, asbestos is present in five (5) of the samples analyzed, of which all the samples were considered to be non-friable materials. These samples were obtained from the Brown with Black and White Spots Speckled Mosaic Terrazzo.

Based upon the analytical results, asbestos is present in the following material:

<u>Sample Number</u>	<u>Material</u>	<u>Sample Location</u>	<u>Asbestos Type - Percentage</u>	<u>Est. Qty.</u>
231698-A-001A	Brown with Black and White Spots Speckled Mosaic Terrazzo	Main Room 101	<b>Black/White Flooring</b> Chrysotile - <1% Point Count - 0.1%	1,500 SF
231698-A-001B	Brown with Black and White Spots Speckled Mosaic Terrazzo	Main Room 101	<b>Black/White Flooring</b> Chrysotile - <1% Point Count - <0.1%	See 001A
231698-A-001C	Brown with Black and White Spots Speckled Mosaic Terrazzo	Storage Room 104	<b>Black/White Flooring</b> Chrysotile - <1% Point Count - 0.3%	See 001A
231698-A-001D	Brown with Black and White Spots Speckled Mosaic Terrazzo	Storage Room 104	<b>Black/White Flooring</b> Chrysotile - <1% Point Count - <0.1%	See 001A
231698-A-001E	Brown with Black and White Spots Speckled Mosaic Terrazzo	Storage Room 117	<b>Black/White Flooring</b> Chrysotile - <1% Point Count - 0.2%	See 001A

A summary of all suspect materials sampled, friability evaluations, condition ratings and material accessibility for the positive samples is presented on the attached Tables. Note: Quantity is based on the projected scope of work.

The homogenous locations for the material containing asbestos are as follows:

<u>Material</u>	<u>Location(s)</u>
Brown with Black and White Spots Speckled Mosaic Terrazzo	Main Room 101, Floor Storage Room 104, Floor Storage Room 117, Floor

On May 11, 2023, the analytical results for the point counting of the five (5) Brown with Black and White Spots Speckled Mosaic Terrazzo samples identified <0.1 % Chrysotile asbestos content for samples A-001B and A-001D; 0.1 % Chrysotile for sample A-001A; 0.2 % Chrysotile for sample A-001E; and 0.3 % Chrysotile for sample A-001C.

Asbestos content of less than 1% (which is the federal standard utilized by testing laboratories) is detectable only in trace quantities utilizing PLM methods. The California (CAL/OSHA) definition of ACM is materials that contain greater than 0.1% of asbestos or any detectable asbestos must comply with all applicable provisions. A more definitive analytical method, such as Point Counting (required by SCAQMD/EPA for non-friable materials) or Transmission Electron Microscopy (TEM) analysis, which is capable of detecting asbestos below 1% and analysis of materials that are difficult to analyze through routine PLM analysis is available upon request. TEM analysis is often recommended in samples such as floor tile, which is found to be negative for asbestos content through PLM analysis.

## **7.0 BUILDING & MATERIAL CONDITION**

Per our visual observation, the facility structure appears to be in good condition with no structural damage.

The building materials identified as ACBM's are in intact condition and are considered to be non-friable (See Appendix A. Asbestos Bulk Analysis for detailed information).

Intact ACBM: ACBM with no visible damage or deterioration in less than 1% percent of the material and/or covering.

## **8.0 RECOMMENDATIONS**

Proper protective equipment, wet method and respiratory protection, according to CAL-OSHA California Title 8 CCR 1529, must be utilized for this project to ensure worker exposure does not exceed the PEL. However, due to the material being <1%, SCAQMD notification requirements and EPA-RCRA disposal requirements do not apply for the Brown with Black and White Spots Speckled Mosaic Terrazzo.

There are potential liabilities associated with the presence, and removal of ACCM. Precautionary measures, as outlined herein, should be taken in accordance with the guidelines set forth by the EPA, the Occupational Safety and Health Administration (OSHA) and other regulatory agencies.

**The following are required work practices for all materials that are >0.1% but <1% asbestos containing:**

1. The recommended abatement process is to conduct the removal of the asbestos containing construction material (ACCM), following all OSHA, PPE and Worker Protection requirements.
2. Follow proper engineering and containment controls.
3. Utilize wet methods, or wetting agents, to control employee exposures during asbestos handling, removal, cutting, and cleanup, except where employers demonstrate that the use of wet methods is infeasible due to for example, the creation of electrical hazards and equipment malfunction.
4. Conduct prompt clean-up and disposal of wastes and debris contaminated with asbestos in leak-tight containers.
5. Utilization of high-speed abrasive disc saws are only allowed when equipped with point of cut ventilator or enclosures with HEPA filtered exhaust air.
6. Compressed air used to remove asbestos, or materials containing asbestos is prohibited, unless the compressed air is used in conjunction with an enclosed ventilation system designed to capture the dust cloud created by the compressed air.
7. It is prohibited to utilize employee rotation as a means of reducing employee exposure to asbestos.

**If any further suspect asbestos containing materials are discovered and are to be impacted as part of the renovation activities, they must be sampled for asbestos content prior to being impacted.**

## 9.0 LIMITATIONS

The conclusions presented in this report are professional opinions based solely upon visual observations at the site and laboratory analysis of the tested samples. They are intended exclusively for the purpose outlined herein, and for the site location and project indicated.

This assessment report is not specifications for asbestos abatement and it should not be used as a stand-alone asbestos abatement bid document. Recognizing that even the most comprehensive assessment may fail to detect ACBM/ACCM at a particular site, this study was not intended to identify all potential ACBM/ACCM present in the building or at the site for such reasons as the possible existence of buried, covered and inaccessible areas and features. A-Tech does not warrant that all sub-surface, wall cavity or other inaccessible materials were tested. A-Tech did not test any live electrical components or disassemble operational building equipment such as fans or HVAC components. These components may contain untested suspect ACBM/ACCM's. If any suspect ACBM/ACCM's not tested herein are discovered, they must be tested prior to impact.

Samples were collected from materials of similar appearance, age, use, type, color and/or texture. However, this does not guarantee that they are of the same composition. No guarantee is expressed or implied that all ACBM/ACCM has been identified. **Asbestos quantities are estimates only (see Asbestos Tables-Est. Qty.) Exact quantities should be verified by the abatement contractor prior to removal.**

A-Tech assumes no responsibility for the identification of suspect asbestos containing materials, which are not included in this assessment, concealed and/or inaccessible (i.e. locked rooms, under carpet, etc.) However, A-Tech makes every attempt possible to inspect all designated areas for asbestos containing materials (i.e. check under carpeting, inspect attic, crawl space, etc.).

Services performed by A-Tech were conducted in a manner above the care and skill ordinarily and currently exercised by members of the same profession that even the most comprehensive scope of services might fail to detect environmental liabilities on a particular site. Therefore, A-Tech cannot act as insurers and cannot "certify" that a site is free of environmental contamination.

No expressed or implied representation or warranty is included or intended in our reports, except that our services were performed, within the limits prescribed by the Scope of Services, with the customary thoroughness and competence of our profession.

This report is intended for the sole use of the contracted Client and its authorized representatives. The exchange of information was unique between A-Tech and the client regarding the mutually agreed upon scope of service. Unless explicitly authorized in this report, no third party is beneficiary to the contract or findings of this report. The unauthorized use or reliance of this document or the findings, conclusion or recommendations presented herein, by any other party or parties is at the sole risk of any such third party. For the same reasons, no warranties or representations, expressed or implied in this report, are provided to any such third party.

Information and opinions presented herein apply to the existing and reasonable foreseeable site conditions at the time of our investigation. They cannot necessarily apply to site changes of which this office is unaware and have not had the opportunity to review. Changes in the conditions of this property may occur with time due to natural processes or works of man on the subject property or on adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part by changes beyond our control.

A-Tech trusts that the information presented herein provides the data you require. Should you have any questions or comments please contact A-Tech Consulting, Inc. at (800) 434-1025.

Respectfully submitted,  
A-Tech Consulting, Inc.

---

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. The results relate only to the samples as received and tested. The results include an inherent uncertainty of measurement associated with estimating percentages by polarized light microscopy. Measurement uncertainty data for sample results with >1% asbestos concentration can be provided when requested.

Eurofins EPK Built Environment Testing, LLC ("the Company"), a member of the Eurofins Built Environment Testing group of companies, shall have no liability to the client or the client's customer with respect to decisions or recommendations made, actions taken or courses of conduct implemented by either the client or the client's customer as a result of or based upon the Test Results. In no event shall the Company be liable to the client with respect to the Test Results except for the Company's own willful misconduct or gross negligence nor shall the Company be liable for incidental or consequential damages or lost profits or revenues to the fullest extent such liability may be disclaimed by law, even if the Company has been advised of the possibility of such damages, lost profits or lost revenues. In no event shall the Company's liability with respect to the Test Results exceed the amount paid to the Company by the client therefor.

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by any agency of the federal government. The Company reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.

When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.

‡ A "Version" indicated by "-x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

*Laboratory Reports-Asbestos Analysis  
of Bulk Materials via EPA 600/R-93/116  
Method with 1,000 Point Count and  
Chain of Custody*

Report for:

**Mr. Robert Williams**  
**A-Tech Consulting, Inc**  
1640 N. Batavia Street  
Orange, CA 92867

---

Regarding: Eurofins EPK Built Environment Testing, LLC  
Project: 231698-BPW Building 57, Boys And Girls Club; 2244 North Buena Vista Street, Burbank, CA 91504  
EML ID: 3253912

Approved by:

Dates of Analysis:

Asbestos-EPA 1000 point count: 05-11-2023

Approved Signatory  
Roshanak Kalantari

Service SOPs: Asbestos-EPA 1000 point count (EPA 40CFR App E to Sub E of Part 763 & EPA METHOD 600/R-93-116, SOP EM-AS-S-1262)  
NVLAP Lab Code 200945-0

---

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. Due to the nature of the analyses performed, field blank correction of results is not applied. The results relate only to the samples as received and tested.

Eurofins EPK Built Environment Testing, LLC ("the Company"), a member of the Eurofins Built Environment Testing group of companies, shall have no liability to the client or the client's customer with respect to decisions or recommendations made, actions taken or courses of conduct implemented by either the client or the client's customer as a result of or based upon the Test Results. In no event shall the Company be liable to the client with respect to the Test Results except for the Company's own willful misconduct or gross negligence nor shall the Company be liable for incidental or consequential damages or lost profits or revenues to the fullest extent such liability may be disclaimed by law, even if the Company has been advised of the possibility of such damages, lost profits or lost revenues. In no event shall the Company's liability with respect to the Test Results exceed the amount paid to the Company by the client therefor.

### ASBESTOS POINT COUNT REPORT

Location:	231698-A-001A 1st Floor, Main Room 101, Brown with Black and White Spots Speckled Mosaic Terrazo		
Total Points Counted:	1000		
Lab ID-Version‡:	15785257-1		
<b>Sample Layers</b>	<b>Asbestos Type</b>	<b>Asbestos Points Counted</b>	<b>Asbestos Concentration (%)</b>
Black/White Flooring	Chrysotile	1	0.1
<b>Layer Totals:</b>		1	0.1

Location:	231698-A-001B 1st Floor, Main Room 101, Brown with Black and White Spots Speckled Mosaic Terrazo		
Total Points Counted:	1000		
Lab ID-Version‡:	15785258-1		
<b>Sample Layers</b>	<b>Asbestos Type</b>	<b>Asbestos Points Counted</b>	<b>Asbestos Concentration (%)</b>
Black/White Flooring	Chrysotile	0	< 0.1
<b>Layer Totals:</b>		0	NA

**Comments:** Asbestos was detected, but no points counted.

Location:	231698-A-001C 1st Floor, Main Room 104, Brown with Black and White Spots Speckled Mosaic Terrazo		
Total Points Counted:	1000		
Lab ID-Version‡:	15785259-1		
<b>Sample Layers</b>	<b>Asbestos Type</b>	<b>Asbestos Points Counted</b>	<b>Asbestos Concentration (%)</b>
Black/White Flooring	Chrysotile	3	0.3
<b>Layer Totals:</b>		3	0.3

The analytical sensitivity is 1 asbestos point. The limit of detection is 1 asbestos point divided by the total number of points counted and multiplied by 100.

The results relate only to the items tested. Interpretation is left to the company and/or persons who conducted the field work. The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by any agency of the federal government.

All samples were received in acceptable condition unless otherwise noted. The Company reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.

‡ A "Version" indicated by -"x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

## ***Inspector Certifications***

State of California  
Division of Occupational Safety and Health  
**Certified Asbestos Consultant**

**Miri Khalaf**

Name

Certification No. **22-7126**

Expires on **06/24/23**

This certification was issued by the Division of Occupational Safety and Health as authorized by Sections 7160 et seq. of the Business and Professions Code.

BE IT KNOWN TO ALL CONCERNED THAT

**Miri Khalaf**

HAS SUCCESSFULLY COMPLETED A

**NIOSH 582 EQUIVALENCY COURSE**

The course included: Airborne Fiber Sampling, Temperature & Pressure Corrections of Air Sample Flow Rates, Calibration & Alignment of Optical Microscopy, Evaluation of Air Sampling Data and NIOSH Method 7400 Filter Counting Rules.

ON

September 28, 2019

Certificate No. **ATCH-N582-1625**

Instructor: **Jonas LaPrease**

1748 W. Katella Avenue, Suite 111, Orange, CA 92667  
Phone (714) 434-6360 & Fax (714) 223-6360

124 South Lake Street  
Burbank, California 91502

Attn: Mr. Dean Pearson

Re: Building 57, Boys and Girls Club  
2244 North Buena Vista Street, Various Areas  
Burbank, California 91504

Pursuant to your request, A-Tech Consulting, Inc. performed a Limited XRF-Lead Assessment at various areas of Building 57, for the Boys and Girls Club, located at 2244 North Buena Vista Street, in Burbank, California. The following report summarizes all findings and results of this inspection.

## **1.0 INTRODUCTION**

A-Tech was contacted by Mr. Dean Pearson with City of Burbank, Public Works Department to confirm the presence or absence of lead. This report presents the results for the Limited XRF-Lead Assessment throughout Building 57, for the Boys and Girls Club located at 2244 North Buena Vista Street, (subject property/site), in Burbank, California. The limited inspection was performed in accordance with Environmental Protection Agency (EPA) and California Occupational Safety and Health (CAL-OSHA) requirements, utilizing United States Housing and Urban Development (HUD) protocols. The scope of services, inspection methodology and results are presented herein. The sampling was conducted by Miri Khalaf – CDPH Inspector/Assessor LRC#00009209 on May 05 and 08, 2023. This report does not represent a HUD level inspection. This report is not intended to be a comprehensive assessment.

## **2.0 SCOPE OF ASSESSMENT**

The purpose of this Limited XRF-Lead Assessment is to identify and assess lead containing material (LCM) present at the subject property with the potential for impact during upcoming renovation and/or demolition activities. The intent of the assessment is to ascertain the presence of lead-based paint at or above 1.0 mg/cm<sup>2</sup>. All inspections conducted in Los Angeles County will adhere to the more stringent level of 0.7 mg/cm<sup>2</sup> as required per the Los Angeles County Department of Public Health (DPH) regulatory action levels.

## **3.0 PROPERTY DESCRIPTION/HISTORICAL DATA**

The subject property inspected consists of a single-story, commercial building with drywall/plaster interior and stucco/concrete exterior, built on a concrete slab foundation. At the time of the inspection, it was observed that the surfaces tested in the inspected areas are in intact condition. The build date is unknown.

## **4.0 INSPECTOR'S QUALIFICATIONS**

The inspector who conducted the site sampling/assessment is a state certified California Department of Public Health (CA-DPH) Lead Inspector/Risk Assessor, has completed an EPA sponsored curriculum in the Lead Inspector and Risk Assessor Training, and has attended the manufacturer's radiation safety course for operation and handling of the XRF instrument.

## **5.0 TESTING METHODOLOGY**

The method employed for testing painted surfaces was with an X-ray fluorescence (XRF) analyzer. A-Tech Consulting, Inc. utilized a Viken Pb200i X-Ray fluorescence (XRF) lead paint analyzer to sample paint for lead content. XRF Instrument serial #2968 was used for this project. The instrument was calibrated to the manufacturer's specifications and was also periodically verified against the National Institute of Standards and Testing (NIST) Standard Reference Material (SRM) 2579 lead film (1.0 mg/cm<sup>2</sup>). The instrument was in-control at all times for the wood zero standard and NIST SRM lead standard.

A visual inspection consisting of a walkthrough of the subject site was conducted to determine the presence of suspect LCM components that were readily accessible and/or exposed. This included the identification of suspect lead-based painted components, ceramic tile, glazed components, etc. and the determination of the condition of those components. All coated surfaces, including but not limited to painted, varnished, and glazed surfaces, were tested for lead content.

## **6.0 TESTING PROTOCOL**

Testing was conducted in accordance with Chapter 7 of the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing as published by HUD in 2012. XRF readings were obtained on representative painted surfaces on each building component in each room equivalent. The HUD definition of lead-based paint is equal to or greater than 0.7 mg/cm<sup>2</sup>. All XRF readings below the regulatory definition are considered negative and all readings at and above this level are considered positive.

## **7.0 SUMMARY OF RESULTS**

According to the XRF findings, no components tested positive for the presence of lead at or above 0.7 mg/cm<sup>2</sup>. Please refer to Attachment A, Lead XRF Table for detailed sample information.

## **8.0 CONCLUSIONS AND RECOMMENDATIONS**

CAL-OSHA considers levels at 1.0 mg/cm<sup>2</sup> (5,000 ppm HUD) and greater to be an exposure risk to lead containing material and can result in a substantial worker exposure during construction, demolition, etc. CAL-OSHA's current level for objective data/negative determination is 600 ppm. However, anyone performing trigger tasks, regardless of the level of lead, as outlined in 29 CFR 1926.62 and Title 8 CCR 1532.1 can reasonably assume risk of lead exposure. Work activities which may lead to any amount of lead exposure must be conducted in accordance with safe lead work practices, current regulatory guidelines, and current proper protective equipment protocols. Additionally, this was not a comprehensive assessment of the building and any stabilization and/or removal of materials or areas not assessed would require additional sampling.

## **9.0 LIMITATIONS**

The conclusions presented in this report are professional opinions based solely upon visual observations at the site and laboratory analysis of the tested samples. They are intended exclusively for the purpose outlined herein, and for the site location and project indicated.

This limited inspection was planned, developed, and implemented based on A-Tech's scope of services approved by the client. This limited inspection was conducted in compliance with current regulatory protocols. A-Tech utilized state-of-the-art-practices and techniques in accordance with regulatory standards, while performing this limited inspection. A-Tech's evaluation of the relative risk of exposure to lead, identified during this limited inspection, is based on conditions observed at the time of the limited inspection.

A-Tech cannot be responsible for changing conditions that may alter the relative exposure risk or for future changes in accepted methodology. The floor plans and actual test results for each of the tested areas are contained within this report. Lead quantities are estimates only (see Lead Tables-Est. Qty.) Exact quantities should be verified by the abatement contractor prior to stabilization/removal.

This assessment report is not specifications for lead abatement and it should not be used as a stand-alone lead abatement bid document. Recognizing that even the most comprehensive assessment may fail to detect lead at a particular site, this study was not intended to identify all potential LCM's present in the building or at the site for such reasons as the possible existence of buried, covered and inaccessible areas and features. A-Tech does not warrant that all sub-surface, wall cavity or other inaccessible materials were tested. A-Tech did not test any live electrical components or disassemble operational building equipment such as fans or HVAC components. These components may contain untested suspect LCM's. If any suspect LCM's not tested herein are discovered, they must be tested prior to impact.

A-Tech assumes no responsibility for the identification of suspect LCM's, which were not included in the client's scope of work or were concealed and/or inaccessible (i.e. locked rooms, under carpet, etc.) However, A-Tech makes every attempt possible to test all designated areas for lead (i.e. check under carpeting, inspect attic, crawl space, etc.). A-Tech assumes no responsibility for the identification of "atypical" LCM, used in the construction trade.

There are potential liabilities associated with the presence, and removal, of LCM. Precautionary measures, as outlined herein, should be taken in accordance with the guidelines set forth by the EPA, CAL-OSHA and other regulatory agencies.

Services performed by A-Tech were conducted in a manner above the care and skill ordinarily and currently exercised by members of the same profession that even the most comprehensive scope of services might fail to detect environmental liabilities on a particular site. Therefore, A-Tech cannot act as insurers and cannot "certify" that a site is free of environmental contamination.

No expressed or implied representation or warranty is included or intended in our reports, except that our services were performed, within the limits prescribed by the Scope of Services, with the customary thoroughness and competence of our profession.

This report is intended for the sole use of the contracted Client and its authorized representatives. The exchange of information was unique between A-Tech and the client regarding the mutually agreed upon scope of service. Unless explicitly authorized in this report, no third party is beneficiary to the contract or findings of this report. The unauthorized use or reliance of this document or the findings, conclusion or recommendations presented herein, by any other party or parties is at the sole risk of any such third party. For the same reasons, no warranties or representations, expressed or implied in this report, are provided to any such third party.

Information and opinions presented herein apply to the existing and reasonable foreseeable site conditions at the time of our investigation. They cannot necessarily apply to site changes of which this office is unaware and have not had the opportunity to review. Changes in the conditions of this property may occur with time due to natural processes or works of man on the subject property or on adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part by changes beyond our control.

A-Tech representatives are prepared to meet with your staff, to further discuss this project, upon your request. A-Tech trusts that the information presented herein provides the data you require. Should you have any questions or comments please contact A-Tech Consulting, Inc. at (800) 434-1025.

Respectfully submitted,  
A-Tech Consulting, Inc.

**APPENDIX J - PROFESSIONAL QUALIFICATIONS**

---

---

# David A. Jonas

Project Manager

---

## EDUCATION

Bachelor's Degree, Ecology, Behavior and Evolution  
University of California, San Diego 1995

## REGISTRATIONS

NREP Registered Environmental Property Assessor #569136

## CERTIFICATE COURSES

40-Hour Hazardous Waste Operations Training  
8-Hour Hazardous Waste Operations Training Refresher Course

## CAREER HISTORY

2006 – Present: CCI (environmental and waste management consulting)  
2001 – 2006: Ceres Associates (environmental and waste management consulting)

## SUMMARY OF QUALIFICATIONS

Mr. Jonas has twenty years of experience conducting environmental projects, including Phase I Environmental Site Assessments (ESAs) and Phase II Subsurface Investigations, on various types of sites including commercial, industrial, agricultural, and residential properties throughout the United States. Mr. Jonas is familiar with real property environmental due diligence and environmental liability including All Appropriate Inquiry (AAI) and ASTM E1527-05 regulations. Mr. Jonas has experience providing environmental risk assessment for both the lender and borrower involved in real estate transactions, in the design and performance of various soil, soil gas, and groundwater sampling and remediation projects, and in the management and coordination of underground storage tank (UST) removals and closures. Mr. Jonas has experience managing a variety of subcontractors such as drillers, laboratories, geophysical survey companies, and hazardous waste hauling companies, and has significant experience working with Federal, State, County, and local regulatory agencies. Mr. Jonas has received training in the health and safety aspects of hazardous waste operations including the initial 40-Hour Hazardous Waste Operations Training and the subsequent yearly 8-Hour Hazardous Waste Operations Training refresher courses. Mr. Jonas has also received training in identifying, sampling, and remediating microbial contamination from a national analytical laboratory.

# Ken Durand

Senior Geologist

**CERTIFICATIONS** 40-Hour Hazardous Waste Operations Training  
8-Hour Hazardous Waste Operations Training Refresher Course

## CAREER HISTORY

2006 – Present: CCI (environmental and waste management consulting)  
1998 – 2006: Ceres Associates (environmental and technology consulting sales)  
1992 – 1998: Enecotech, Inc. (environmental consulting)  
1984 – 1992: Kleinfelder, Inc. (environmental consulting)  
1981 – 1984: Orange County (California) Environmental Management Agency (Flood Control)

## SUMMARY OF QUALIFICATIONS

Mr. Durand has over 30 years of experience conducting geotechnical, geological, hydrological, water resources, and environmental investigations. Mr. Durand is a professional geologist, a certified hydrogeologist, and a registered environmental assessor. Because of this diverse expertise, Mr. Durand has performed a wide range of projects in the fields of geology, hydrology, hydrogeology, environmental, and waste management. These projects have included Phase I Environmental Site Assessments, soil, groundwater, and soil gas investigations, and hydrogeological studies.

## 1.0 PROPERTY DESCRIPTION

---

---

### 1.1 PROPERTY LOCATION

CCI conducted a Phase II Environmental Site Assessment (ESA) at 2244 North Buena Vista Street, Burbank, Los Angeles County, California (Property). The Property is located adjacent to the east side of North Buena Vista Street and to the south of the intersection of North Buena Vista Street and North San Fernando Boulevard (refer to Figure 1 in Appendix A).

### 1.2 PROPERTY HISTORY

CCI completed a Phase I ESA of the Property on August 29, 2023. According to the report, the Property is approximately 1.47 acres in area and has been developed with one main building totaling approximately 5,000 square-feet in size. The single-story, concrete tilt-up building was constructed on the west-southwest portion of the Property in 1956. Prior to 1956, a residential structure and detached automobile garage were located on the south portion of the Property. These buildings were constructed in 1950. Prior to 1950, the Property consisted of undeveloped land since at least 1928.

The Property was vacant. The previous occupant of the Property was the Boys and Girls Club of Burbank which operated between approximately 1995 and 2020. Prior to the Boys and Girls Club, the Property was used as a City of Burbank Fire Station between 1956 and 1994.

CCI did not observe evidence of current underground storage tanks (USTs) on the Property. Historically, according to information reviewed from the Burbank Fire Department (BFD), one, steel, 1,500-gallon, diesel fuel UST and associated dispenser/piping were removed from the Property in 1999. The UST was associated with the former Fire Department facility and was installed in 1957. The information did not include any soil sampling results associated with the UST removal or a closure letter for the removed UST. The file information also contained a 1987 work plan for a leak detection program/tank monitoring plan. However, information was not found indicating that the work plan had been implemented.

The northeasterly-adjacent site of the Property is occupied by a gasoline station and a dry cleaning facility. The gasoline station has operated since approximately 1952 and the dry cleaning facility has operated since approximately 1969. The gasoline station is a case-closed leaking underground storage tank (LUST) site which impacted the soil, soil vapor, and groundwater matrices beneath the site. The dry cleaning facility has historically used tetrachloroethene (PCE) on the site. Given the south-southeasterly groundwater flow direction in the area of the Property, it is considered possible that the operations of the gasoline station and dry cleaning facility have adversely impacted the subsurface environment beneath the Property.

According to the Overview and Details Maps provided in the environmental database report reviewed by CCI for this Phase I ESA, the Property is located within the contaminated groundwater plume associated with the San Fernando Valley (Area 1) National Priorities List (NPL) site. The groundwater plume includes elevated concentrations of PCE and trichloroethene (TCE). In addition,

CCI reviewed the most recent groundwater contamination plume maps available on the US EPA website for the San Fernando Valley (Area 1) NPL site. According to the maps reviewed, the Property is located within the boundaries of the contaminated groundwater plumes. Based on this information, a vapor encroachment condition (VEC) for the Property cannot be ruled out. Current and historical Property operations are not suspected of posing a VEC for the Property.

### 1.3 SCOPE OF WORK COMPLETED

The scope of work conducted as part of this Phase II ESA included the evaluation of soil, soil vapor, and indoor air conditions through the installation of soil borings and soil vapor probes and the collection and analysis of select soil, soil vapor, and indoor air samples. The following provides a summary of the tasks performed:

1. On September 28, 2023, CCI notified Dig Alert of the proposed sampling activities at the Property (Ticket No. A232710075-00A).
2. Prepared a Health and Safety Plan (H&SP) for use by CCI, as well as subcontractors, for the fieldwork activities conducted during this Phase II ESA.
3. Conducted a geophysical survey on the Property on September 25, 2023. The purpose of the geophysical survey was to clear the soil boring locations of underground utilities and to attempt to identify the former location of the UST removed in 1999. The geophysical survey was conducted by SoCal Locators (SoCal) of Fontana, California.
4. Conducted the soil boring and soil vapor probe installation activities on October 2, 2023, using a direct-push sampling rig. The soil boring and soil vapor probe installation activities were conducted by Strongarm Environmental Field Services (SEFS), of Fullerton, California.
5. Nine (9) soil borings (SV1 - SV5 and SB6 - SB9) soil borings were advanced on the Property during this Phase II ESA. Please refer to Figure 2 in Appendix A for a map showing the soil boring locations. The soil borings were advanced to total depths of either 7-feet below ground surface (bgs) or 15-feet bgs. Soil samples were collected from soil boring locations SB6 - SB9 at depths of 5-feet, 7-feet, 10-feet, and/or 15-feet bgs.
6. The soil samples were delivered to Jones Environmental, Inc. (Jones), a State of California certified environmental laboratory located in Santa Fe Springs, California, for analysis. Select soil samples were analyzed for volatile organic compounds (VOCs) using United States Environmental Protection Agency (US EPA) method 8260B and total petroleum hydrocarbons carbon chain identification (TPH CC ID) using US EPA method 8015M.
7. Soil borings SV1 - SV5 were converted into temporary soil vapor probes. Soil samples were not collected from these soil borings. Temporary soil vapor probes were installed in each of these soil borings at a depth of 5-feet and 15-feet bgs. The temporary soil

vapor probes were allowed to equilibrate for at least two (2) hours prior to sampling.

8. On October 2, 2023, soil vapor samples were collected by Jones from the temporary soil vapor probes in general accordance with Department of Toxic Substances Control (DTSC) sampling guidance. The soil vapor samples were collected into Tedlar bags and were delivered to Jones for analysis. The soil vapor samples were analyzed for VOCs using US EPA method 8260B.
9. Between October 2 and 3, 2023, area air samples were collected from four (4) indoor locations and one (1) outdoor location on the Property (refer to Figure 2 in Appendix A). The air samples were collected in evacuated 6-liter Summa<sup>®</sup> canisters provided by Jones Environmental Laboratories (Jones), based in Santa Fe Springs, California. Each Summa<sup>®</sup> canister was equipped with an air flow regulator so that the air sample would be collected uniformly over the 24-hour sampling period. Once the 24-hour sampling period was completed, the Summa<sup>®</sup> canisters were transported directly to Jones for analysis. At Jones, the air samples were analyzed by gas chromatograph with mass spectrophotometry (GC/MS) for VOCs. The air samples were processed in accordance with the US EPA method TO-15.
10. Backfilled the soil borings and completed the ground surface to best match the existing ground surface.
11. Prepared this report documenting the completed fieldwork activities and the analytical laboratory results.

---

---

## 2.0 ASSESSMENT ACTIVITIES

---

---

### 2.1 PRE-FIELDWORK ACTIVITIES

Prior to initiating the assessment activities, the underground utility notifications were performed in accordance with underground utility notification requirements (Dig Alert ticker confirmation number: A232710075-00A). A geophysical survey was also conducted on the Property for further clearance of underground utilities at the proposed soil boring locations as well as to attempt to identify the former location of the UST removed in 1999. An area on the northwest portion of the rear yard area was suspected to be a former UST location based on the results of the geophysical survey. The geophysical survey was conducted by SoCal of Fontana, California.

A Property specific H&SP was prepared for the project. Prior to initiating the fieldwork activities, the H&SP was reviewed by field personnel and maintained on the Property during the field activities.

### 2.2 SOIL SAMPLING ACTIVITIES

On October 2, 2023, nine (9) soil borings (SV1 - SV5 and SB6 - SB9) were advanced on the Property (refer to Figure 2 for a map of the soil boring locations). Soil borings SV1 -SV5 were advanced to total depths of 15-feet bgs. These soil borings were advanced for the purpose of installing temporary soil vapor probes (refer to Section 2.3). Soil samples were not collected from these soil boring locations. Soil boring SB6 was advanced to a total depth of 7-feet bgs. Soil samples were collected from this soil boring at depths of 5-feet and 7-feet bgs. Soil borings SB7 - SB9 were advanced to total depths of 15-feet bgs. Soil samples were collected from these soil borings at depths of 5-feet, 10-feet, and 15-feet bgs.

Soil borings SV1 - SV5 and SB7 - SB9 were advanced using a track-mounted, direct-push, Geoprobe® sampling rig. The Geoprobe® sampling rig utilizes direct push technology to collect soil samples from specific subsurface depths without generating soil cuttings. The Geoprobe® sampling system consists of a series of 1.5-inch diameter hollow stainless steel rods which were hydraulically driven into the ground using a pneumatic hammer. Soil samples were not collected from soil borings SV1 - SV5. For soil borings SB7 - SB9, soil samples were collected by driving an approximately 4-foot long stainless steel sample sleeve attached to the end of the steel rods into soil at a specified sample depth. Soil samples were then collected in an acetate sample tube installed inside the sample sleeve. A new acetate sample tube was used at each sample interval/location to avoid cross-contamination between sampling points. After the rod assembly was hydraulically extended to the target sample depth, the sample sleeve was retrieved to ground surface and the acetate sample tube containing soil from the appropriate sample interval was removed from the stainless steel rod. The tube was then cut with a hand saw into a 6-inch section and capped with Teflon®-lined end caps. A portion of each soil sample was also transferred into 40-milliliter (ml) VOAs in accordance with US EPA sampling method 5035 protocols for VOC analysis. The samples were then labeled with unique identification, sealed inside a Ziplock® bag, and placed in a chest cooled with ice for delivery to the analytical laboratory. CCI recorded the unique sample identification information on a chain-of-custody form.

Soil boring SB6 was advanced using a hand auger. Upon reaching the desired sample depth using the hand auger, a soil sample was collected from the hand auger bucket. The soil samples were collected into 4-ounce glass jars. A portion of each soil sample was also transferred into 40-ml VOAs in accordance with US EPA sampling method 5035 protocols for VOC analysis. The samples were then labeled with unique identification, sealed inside a Ziplock® bag, and placed in a chest cooled with ice for delivery to the analytical laboratory. CCI recorded the unique sample identification information on a chain-of-custody form.

## 2.3 SOIL VAPOR SAMPLING ACTIVITIES

Five (5) of the soil borings (SV1 - SV5) were converted into temporary dual-nested soil vapor probes with the temporary soil vapor probes installed at depths of 5-feet and 15-feet bgs. A 1-foot thick sand pack was placed around the probe tips followed by a 1-foot thick dry bentonite layer and then a hydrated bentonite layer to complete the temporary soil vapor probe construction.

After the temporary soil vapor probes were allowed to equilibrate for at least two (2) hours, soil vapor samples were collected from the temporary soil vapor probes. The soil vapor samples were collected on October 2, 2023. The soil vapor sampling was conducted by Jones. Soil vapor samples were collected into Tedlar bags. The tubing placed in the ground was purged three times as recommended by DTSC regulations. The sampling rate was approximately 200 cc/min.

Prior to the purging and sampling of the soil vapor at each point, a shut-in test was conducted to check for leaks in the above ground fittings. The shut-in test was performed on the above ground apparatus by evacuating the line to a vacuum of 100 inches of water, sealing the entire system, and watching the vacuum for some length of time. A vacuum gauge attached in parallel to the apparatus measured the vacuum. If there was any observable loss of vacuum, the fittings were adjusted as needed until the vacuum did not change noticeably.

A tracer gas mixture of n-pentane, n-hexane, isopropyl alcohol (IPA), and n-propanol was then placed at the tubing-surface interface before sampling and the soil vapor samples were collected. These compounds were analyzed during the 8260B analytical run to determine if there were surface leaks into the subsurface due to improper installation of the probes. No n-pentane, n-hexane, IPA, or n-propanol was found in the soil vapor samples analyzed during this Phase II ESA.

## 2.4 INDOOR AIR SAMPLING ACTIVITIES

On October 2 and 3, 2022, area air samples were collected from four (4) indoor locations and one (1) outdoor location on the Property (refer to Figure 2 in Appendix A). The air samples were collected in evacuated 6-liter Summa® canisters provided by Jones. Each Summa® canister was equipped with an air flow regulator so that the air sample would be collected uniformly over the 24-hour sampling period. Chain-of-custody protocols were followed.

Once the 24-hour sampling period was completed, the Summa® canisters were transported directly to Jones for analysis. At Jones, the air samples were analyzed by GC/MS for VOCs. The air samples were processed in accordance with the US EPA method TO-15.

## 2.5 SOIL ANALYTICAL LABORATORY RESULTS

Soil boring SB6 was advanced between the two trailers located on the northwest portion of the Property. Soil borings SB7, SB8, and SB9 were advanced in the area identified as the potential former UST location. The soil sample collected from 5-foot bgs from soil boring SB6 and the 10-foot bgs soil samples collected from soil borings SB7, SB8, and SB9 were analyzed for TPH CC ID and VOCs. The results of the analysis did not detect concentrations of the targeted analytes above their respective practical quantitation limits (PQLs) in the soil samples analyzed.

## 2.6 SOIL VAPOR ANALYTICAL LABORATORY RESULTS

The soil vapor samples were analyzed for VOCs. The analytical results were compared with their respective San Francisco Regional Water Quality Control Board (SF-RWQCB) Environmental Screening Levels (ESLs) for residential soil gas. A table summarizing the analytical results can be found in Appendix B of this report. A copy of the analytical data report can be found in Appendix D of this report. The results of the analysis detected the following:

### Soil Vapor Probe SV1

Soil boring SV1 was converted into a temporary dual-nested soil vapor probe with the probe tips set at 5-foot and 15-foot bgs. The soil vapor samples collected from these temporary soil vapor probes were analyzed for VOCs. The results of the analysis of soil vapor sample SV1-5 detected concentrations of the following VOCs:

- Benzene at 17 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ). The ESL for benzene is  $3.2 \mu\text{g}/\text{m}^3$ . The detected benzene concentration in soil vapor sample SV1-5 exceeded the respective ESL.
- Freon 113 at  $18 \mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- Tetrachloroethene (PCE) at  $27 \mu\text{g}/\text{m}^3$ . The ESL for PCE is  $15 \mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV1-5 exceeded the respective ESL.
- Toluene at  $75 \mu\text{g}/\text{m}^3$ . The ESL for toluene is  $10,000 \mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV1-5 did not exceed the respective ESL.
- *m,p*-Xylene at  $23 \mu\text{g}/\text{m}^3$ . The ESL for *m,p*-Xylene is  $3,500 \mu\text{g}/\text{m}^3$ . The detected *m,p*-Xylene concentration in soil vapor sample SV1-5 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV1-5.

The results of the analysis of soil vapor sample SV1-15 detected concentrations of the following VOCs:

- Freon 113 at  $36 \mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- PCE at  $58 \mu\text{g}/\text{m}^3$ . The ESL for PCE is  $15 \mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV1-15 exceeded the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV1-15.

### Soil Vapor Probe SV2

Soil boring SV2 was converted into a temporary dual-nested soil vapor probe with the probe tips set at 5-feet and 15-feet bgs. The soil vapor samples collected from these temporary soil vapor probes were analyzed for VOCs. The results of the analysis of soil vapor sample SV2-5 detected concentrations of the following VOCs:

- Benzene at 9.0  $\mu\text{g}/\text{m}^3$ . The ESL for benzene is 3.2  $\mu\text{g}/\text{m}^3$ . The detected benzene concentration in soil vapor sample SV2-5 exceeded the respective ESL.
- Freon 113 at 50  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- 4-Isopropyltoluene at 76  $\mu\text{g}/\text{m}^3$ . An ESL for 4-Isopropyltoluene is not specified.
- PCE at 22  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV2-5 exceeded the respective ESL.
- Toluene at 53  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV2-5 did not exceed the respective ESL.
- *m,p*-Xylene at 18  $\mu\text{g}/\text{m}^3$ . The ESL for *m,p*-Xylene is 3,500  $\mu\text{g}/\text{m}^3$ . The detected *m,p*-Xylene concentration in soil vapor sample SV2-5 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV2-5.

The results of the analysis of soil vapor sample SV2-15 detected concentrations of the following VOCs:

- Freon 113 at 62  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- PCE at 64  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV2-15 exceeded the respective ESL.
- Toluene at 30  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV2-15 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV2-15.

### Soil Vapor Probe SV3

Soil boring SV3 was converted into a temporary dual-nested soil vapor probe with the probe tips set at 5-feet and 15-feet bgs. The soil vapor samples collected from these temporary soil vapor probes were analyzed for VOCs. The results of the analysis of soil vapor sample SV3-5 detected concentrations of the following VOCs:

- Benzene at 9.0  $\mu\text{g}/\text{m}^3$ . The ESL for benzene is 3.2  $\mu\text{g}/\text{m}^3$ . The detected benzene concentration in soil vapor sample SV3-5 exceeded the respective ESL.
- Freon 113 at 191  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.

- 4-Isopropyltoluene at 41  $\mu\text{g}/\text{m}^3$ . An ESL for 4-Isopropyltoluene is not specified.
- PCE at 143  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV3-5 exceeded the respective ESL.
- Toluene at 54  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV3-5 did not exceed the respective ESL.
- *m,p*-Xylene at 29  $\mu\text{g}/\text{m}^3$ . The ESL for *m,p*-Xylene is 3,500  $\mu\text{g}/\text{m}^3$ . The detected *m,p*-Xylene concentration in soil vapor sample SV3-5 did not exceed the respective ESL.
- *o*-Xylene at 9.0  $\mu\text{g}/\text{m}^3$ . The ESL for *o*-Xylene is 3,500  $\mu\text{g}/\text{m}^3$ . The detected *o*-Xylene concentration in soil vapor sample SV3-5 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV3-5.

The results of the analysis of soil vapor sample SV3-15 detected concentrations of the following VOCs:

- Freon 113 at 279  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- 4-Isopropyltoluene at 25  $\mu\text{g}/\text{m}^3$ . An ESL for 4-Isopropyltoluene is not specified.
- PCE at 198  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV3-15 exceeded the respective ESL.
- Toluene at 44  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV3-15 did not exceed the respective ESL.
- *m,p*-Xylene at 19  $\mu\text{g}/\text{m}^3$ . The ESL for *m,p*-Xylene is 3,500  $\mu\text{g}/\text{m}^3$ . The detected *m,p*-Xylene concentration in soil vapor sample SV3-15 did not exceed the respective ESL.
- *o*-Xylene at 8.0  $\mu\text{g}/\text{m}^3$ . The ESL for *o*-Xylene is 3,500  $\mu\text{g}/\text{m}^3$ . The detected *o*-Xylene concentration in soil vapor sample SV3-15 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV3-15.

#### Soil Vapor Probe SV4

Soil boring SV4 was converted into a temporary dual-nested soil vapor probe with the probe tips set at 5-foot and 15-foot bgs. The soil vapor samples collected from these temporary soil vapor probes were analyzed for VOCs. The results of the analysis of soil vapor sample SV4-5 detected concentrations of the following VOCs:

- Freon 113 at 102  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- PCE at 70  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV4-5 exceeded the respective ESL.
- Toluene at 38  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV4-5 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV4-5.

The results of the analysis of soil vapor sample SV4-15 detected concentrations of the following VOCs:

- Freon 136 at 279  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- PCE at 126  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV4-15 exceeded the respective ESL.
- Toluene at 26  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV4-15 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV4-15.

#### Soil Vapor Probe SV5

Soil boring SV5 was converted into a temporary dual-nested soil vapor probe with the probe tips set at 5-foot and 15-foot bgs. The soil vapor samples collected from these temporary soil vapor probes were analyzed for VOCs. The results of the analysis of soil vapor sample SV5-5 detected concentrations of the following VOCs:

- Freon 113 at 112  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- PCE at 76  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV5-5 exceeded the respective ESL.
- Toluene at 28  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV5-5 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV5-5.

The results of the analysis of soil vapor sample SV5-15 detected concentrations of the following VOCs:

- Freon 136 at 178  $\mu\text{g}/\text{m}^3$ . An ESL for Freon 113 is not specified.
- PCE at 118  $\mu\text{g}/\text{m}^3$ . The ESL for PCE is 15  $\mu\text{g}/\text{m}^3$ . The detected PCE concentration in soil vapor sample SV5-15 exceeded the respective ESL.
- Toluene at 29  $\mu\text{g}/\text{m}^3$ . The ESL for toluene is 10,000  $\mu\text{g}/\text{m}^3$ . The detected toluene concentration in soil vapor sample SV5-15 did not exceed the respective ESL.

Concentrations of the other targeted VOCs were not detected above their respective PQLs in soil vapor sample SV5-15.

## 2.7 INDOOR AIR ANALYTICAL LABORATORY RESULTS

The air samples were analyzed for VOCs using US EPA method TO-15. The analytical results were compared with their respective ESLs for residential air. The results of the analysis of the air samples detected the following:

### Air Sample AS-1

Air sample AS-1 was collected from inside the Property building. The results of the analysis detected concentrations of benzene (0.57 micrograms per cubic meter [ $\mu\text{g}/\text{m}^3$ ]), carbon tetrachloride (0.75  $\mu\text{g}/\text{m}^3$ ), chloroform (0.34  $\mu\text{g}/\text{m}^3$ ), cyclohexane (0.24  $\mu\text{g}/\text{m}^3$ ), 1,4-Dichlorobenzene (0.12  $\mu\text{g}/\text{m}^3$ ), ethylbenzene (0.25  $\mu\text{g}/\text{m}^3$ ), freon 11 (1.15  $\mu\text{g}/\text{m}^3$ ), freon 12 (1.37  $\mu\text{g}/\text{m}^3$ ), freon 113 (0.50  $\mu\text{g}/\text{m}^3$ ), methylene chloride (0.59  $\mu\text{g}/\text{m}^3$ ), toluene (1.12  $\mu\text{g}/\text{m}^3$ ), 1,2,4-Trimethylbenzene (1.24  $\mu\text{g}/\text{m}^3$ ), *m,p*-Xylenes (0.69  $\mu\text{g}/\text{m}^3$ ), and *o*-Xylenes (0.28  $\mu\text{g}/\text{m}^3$ ) in air sample AS-1.

The airborne concentrations of the following VOCs measured in air sample AS-1 exceeded their respective ESLs:

- Benzene: 0.57  $\mu\text{g}/\text{m}^3$  (ESL: 0.097  $\mu\text{g}/\text{m}^3$ )
- Carbon tetrachloride: 0.75  $\mu\text{g}/\text{m}^3$  (ESL: 0.067  $\mu\text{g}/\text{m}^3$ )
- Chloroform: 0.34  $\mu\text{g}/\text{m}^3$  (ESL: 0.12  $\mu\text{g}/\text{m}^3$ )

### Air Sample AS-2

Air sample AS-2 was collected from inside the Property building. The results of the analysis detected concentrations of benzene (0.59  $\mu\text{g}/\text{m}^3$ ), carbon tetrachloride (0.83  $\mu\text{g}/\text{m}^3$ ), chloroform (0.41  $\mu\text{g}/\text{m}^3$ ), cyclohexane (0.22  $\mu\text{g}/\text{m}^3$ ), ethyl acetate (0.63  $\mu\text{g}/\text{m}^3$ ), ethylbenzene (0.26  $\mu\text{g}/\text{m}^3$ ), freon 11 (1.13  $\mu\text{g}/\text{m}^3$ ), freon 12 (1.34  $\mu\text{g}/\text{m}^3$ ), freon 113 (0.50  $\mu\text{g}/\text{m}^3$ ), methylene chloride (0.58  $\mu\text{g}/\text{m}^3$ ), toluene (1.12  $\mu\text{g}/\text{m}^3$ ), 1,2,4-Trimethylbenzene (1.74  $\mu\text{g}/\text{m}^3$ ), *m,p*-Xylenes (0.72  $\mu\text{g}/\text{m}^3$ ), and *o*-Xylenes (0.30  $\mu\text{g}/\text{m}^3$ ) in air sample AS-2.

The airborne concentrations of the following VOCs measured in air sample AS-2 exceeded their respective ESLs:

- Benzene: 0.59  $\mu\text{g}/\text{m}^3$  (ESL: 0.097  $\mu\text{g}/\text{m}^3$ )
- Carbon tetrachloride: 0.83  $\mu\text{g}/\text{m}^3$  (ESL: 0.067  $\mu\text{g}/\text{m}^3$ )
- Chloroform: 0.41  $\mu\text{g}/\text{m}^3$  (ESL: 0.12  $\mu\text{g}/\text{m}^3$ )

### Air Sample AS-3

Air sample AS-3 was collected from inside the Property building. The results of the analysis detected concentrations of benzene (0.57  $\mu\text{g}/\text{m}^3$ ), carbon tetrachloride (0.75  $\mu\text{g}/\text{m}^3$ ), chloroform (0.31  $\mu\text{g}/\text{m}^3$ ), cyclohexane (0.28  $\mu\text{g}/\text{m}^3$ ), ethyl acetate (0.57  $\mu\text{g}/\text{m}^3$ ), ethylbenzene (0.30  $\mu\text{g}/\text{m}^3$ ), freon 11 (1.33  $\mu\text{g}/\text{m}^3$ ), freon 12 (1.59  $\mu\text{g}/\text{m}^3$ ), freon 113 (0.56  $\mu\text{g}/\text{m}^3$ ), methylene chloride (0.67  $\mu\text{g}/\text{m}^3$ ), toluene (1.25  $\mu\text{g}/\text{m}^3$ ), 1,2,4-Trimethylbenzene (1.68  $\mu\text{g}/\text{m}^3$ ), *m,p*-Xylenes (0.88  $\mu\text{g}/\text{m}^3$ ), and *o*-Xylenes (0.32  $\mu\text{g}/\text{m}^3$ ) in air sample AS-3.

The airborne concentrations of the following VOCs measured in air sample AS-3 exceeded their respective ESLs:

- Benzene: 0.57  $\mu\text{g}/\text{m}^3$  (ESL: 0.097  $\mu\text{g}/\text{m}^3$ )
- Carbon tetrachloride: 0.75  $\mu\text{g}/\text{m}^3$  (ESL: 0.067  $\mu\text{g}/\text{m}^3$ )
- Chloroform: 0.31  $\mu\text{g}/\text{m}^3$  (ESL: 0.12  $\mu\text{g}/\text{m}^3$ )

#### Air Sample AS-4

Air sample AS-4 was collected from inside the Property building. The results of the analysis detected concentrations of benzene (0.68  $\mu\text{g}/\text{m}^3$ ), carbon tetrachloride (0.78  $\mu\text{g}/\text{m}^3$ ), chloroform (0.30  $\mu\text{g}/\text{m}^3$ ), cyclohexane (0.30  $\mu\text{g}/\text{m}^3$ ), ethyl acetate (0.69  $\mu\text{g}/\text{m}^3$ ), ethylbenzene (0.30  $\mu\text{g}/\text{m}^3$ ), freon 11 (1.27  $\mu\text{g}/\text{m}^3$ ), freon 12 (1.50  $\mu\text{g}/\text{m}^3$ ), freon 113 (0.56  $\mu\text{g}/\text{m}^3$ ), methylene chloride (0.59  $\mu\text{g}/\text{m}^3$ ), toluene (1.41  $\mu\text{g}/\text{m}^3$ ), tetrahydrofuran (0.20  $\mu\text{g}/\text{m}^3$ ), 1,2,4-Trimethylbenzene (1.67  $\mu\text{g}/\text{m}^3$ ), *m,p*-Xylenes (0.90  $\mu\text{g}/\text{m}^3$ ), and *o*-Xylenes (0.35  $\mu\text{g}/\text{m}^3$ ) in air sample AS-4.

The airborne concentrations of the following VOCs measured in air sample AS-4 exceeded their respective ESLs:

- Benzene: 0.68  $\mu\text{g}/\text{m}^3$  (ESL: 0.097  $\mu\text{g}/\text{m}^3$ )
- Carbon tetrachloride: 0.78  $\mu\text{g}/\text{m}^3$  (ESL: 0.067  $\mu\text{g}/\text{m}^3$ )
- Chloroform: 0.30  $\mu\text{g}/\text{m}^3$  (ESL: 0.12  $\mu\text{g}/\text{m}^3$ )

#### Air Sample AS-5

Air sample AS-5 was collected from outside the Property building. The results of the analysis detected concentrations of benzene (0.76  $\mu\text{g}/\text{m}^3$ ), carbon tetrachloride (0.76  $\mu\text{g}/\text{m}^3$ ), chloroform (0.17  $\mu\text{g}/\text{m}^3$ ), cyclohexane (0.41  $\mu\text{g}/\text{m}^3$ ), 1,4-Dichlorobenzene (0.10  $\mu\text{g}/\text{m}^3$ ), ethyl acetate (0.82  $\mu\text{g}/\text{m}^3$ ), ethylbenzene (0.31  $\mu\text{g}/\text{m}^3$ ), freon 11 (1.13  $\mu\text{g}/\text{m}^3$ ), freon 12 (1.39  $\mu\text{g}/\text{m}^3$ ), freon 113 (0.53  $\mu\text{g}/\text{m}^3$ ), methylene chloride (0.72  $\mu\text{g}/\text{m}^3$ ), toluene (1.61  $\mu\text{g}/\text{m}^3$ ), tetrahydrofuran (0.33  $\mu\text{g}/\text{m}^3$ ), 1,2,4-Trimethylbenzene (0.60  $\mu\text{g}/\text{m}^3$ ), *m,p*-Xylenes (1.06  $\mu\text{g}/\text{m}^3$ ), and *o*-Xylenes (0.38  $\mu\text{g}/\text{m}^3$ ) in air sample AS-5.

The airborne concentrations of the following VOCs measured in air sample AS-5 exceeded their respective ESLs:

- Benzene: 0.76  $\mu\text{g}/\text{m}^3$  (ESL: 0.097  $\mu\text{g}/\text{m}^3$ )
- Carbon tetrachloride: 0.76  $\mu\text{g}/\text{m}^3$  (ESL: 0.067  $\mu\text{g}/\text{m}^3$ )
- Chloroform: 0.17  $\mu\text{g}/\text{m}^3$  (ESL: 0.12  $\mu\text{g}/\text{m}^3$ )

For additional assessment, CCI compared the elevated air sample results to the Cal/OSHA Permissible Exposure Limits (PEL) for an 8-hour Time Weighted Average (TWA). The detected benzene, carbon tetrachloride, and chloroform concentrations were converted to parts per million volume (ppmV) and were compared to their respective PELs (refer to the table below). The benzene, carbon tetrachloride, and chloroform concentrations were all well below their respective PELs.

Target Analyte	Sample Identification				Action Level
	AS-1 (ppmV)	AS-2 (ppmV)	AS-3 (ppmV)	AS-4 (ppmV)	CAL/OSHA PEL 8-Hour TWA (ppmV)
Benzene	0.00018	0.00018	0.00018	0.00021	1.0
Carbon tetrachloride	0.00012	0.00013	0.00012	0.00012	2.0
Chloroform	0.000070	0.000084	0.000064	0.000061	2.0

## 3.0 CONCLUSIONS & RECOMMENDATIONS

---

---

### 3.1 CONCLUSIONS

This Phase II ESA consisted of soil, soil vapor, and indoor air sampling on the Property. The sampling activities were conducted to assess the potential adverse environmental impacts to the Property from the northeasterly neighboring gasoline station and dry cleaning operations, the location of the Property within the contaminated groundwater plume of the San Fernando Valley Superfund site, and the former operation of an UST which was removed from the Property in 1999. Prior to the sampling activities, a geophysical survey was conducted to attempt to identify the former location of the UST. An area on the northwest portion of the rear yard area was suspected to be a former UST location based on differences in soil density according to the geophysical survey.

Four (4) soil borings were advanced on the Property for the collection of soil samples. Three (3) of the soil borings (SB7 - SB9) were advanced in the area identified as the potential former UST location. These soil borings were advanced to total depths of 15-foot bgs and soil samples were collected at depths of 5-foot, 10-foot, and 15-foot bgs. One (1) of the soil borings (SB6) was advanced between the two trailers located on the northwest portion of the Property. This soil boring was advanced to a total depth of 7-foot bgs and soil samples were collected at depths of 5-foot and 7-foot bgs. The soil samples collected from 10-foot bgs from soil borings SB7 - SB9 and the 5-foot bgs soil sample collected from soil boring SB6 were analyzed for TPH CC ID and VOCs. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in the soil samples analyzed.

Five (5) soil borings (SV1 - SV5) were advanced on the Property for the collection of soil vapor samples. Soil vapor samples were collected from each of the soil borings at depths of 5-foot and 15-foot bgs. The results of the soil vapor analysis detected concentrations of VOCs including benzene, freon 113, 4-Isopropyltoluene, PCE, toluene, *m,p*-Xylene, and/or *o*-Xylene in the soil vapor samples analyzed. Of the detected VOCs, benzene and PCE were detected at concentrations which exceeded their respective ESLs for residential soil gas. For PCE, higher concentrations were detected at 15-foot bgs compared to 5-foot bgs. This result suggests that the PCE in the soil vapor is a result of an off-site source (i.e., the San Fernando Valley Superfund site and/or the northeasterly-adjacent dry cleaning facility) and not the result of historical activities on the Property.

Five (5) air samples were collected on the Property during this assessment. Four (4) of the air samples (AS-1 - AS-4) were collected from inside the Property building. One (1) of the air samples (AS-5) was collected from the exterior of the Property building in the east yard. The air samples were analyzed for VOCs. The results of the analysis detected concentrations of benzene, carbon tetrachloride, chloroform, cyclohexane, 1,4-Dichlorobenzene, ethyl acetate, ethylbenzene, freon 11, freon 12, freon 113, methylene chloride, toluene, tetrahydrofuran, 1,2,4-Trimethylbenzene, *m,p*-Xylenes, and/or *o*-Xylenes in the air samples. Of the detected VOCs, benzene, carbon tetrachloride, and chloroform were detected above their respective ESLs in both the interior and exterior air samples.

Based on the results of the soil vapor and indoor air sampling, there does not appear to be a VEC for the Property. Elevated concentrations of PCE were detected in the soil vapors samples. However, PCE was not detected in the indoor air samples. Elevated concentrations of benzene were detected in the soil vapor and air samples. The benzene concentration detected in the exterior air sample was greater than the benzene concentrations detected in the interior air samples. In general, the VOC concentrations detected in the interior air samples were similar to the exterior air sample concentrations. Given these similarities, the interior concentrations appear to be the result of ambient air conditions in the Burbank area and not a result of a VEC or historical Property activities.

CCI has conducted numerous indoor air surveys in Los Angeles County. The chemicals detected in the air samples collected on the Property are typically seen throughout Los Angeles County. The benzene and carbon tetrachloride concentrations are likely the result of the high automobile usage and industrial activities in Los Angeles County. Chloroform may be released to the air as a result of its formation in the chlorination of drinking water, irrigation water, and wastewater, as well as from industrial activities. It should be noted that ESLs are typically used to determine whether additional assessment is necessary. The ESL User's Guide indicates that "the presence of a chemical at concentrations in excess of ESL does not necessarily indicate adverse effects on human health or the environment, rather that additional evaluation is warranted." For this assessment, the "additional evaluation" was essentially conducted concurrently through soil, soil vapor, and indoor air sampling.

For additional assessment, CCI compared the elevated air sample results to the Cal/OSHA PELs for an 8-hour TWA. The detected benzene, carbon tetrachloride, and chloroform concentrations were converted to ppmV and were compared to their respective PELs. The benzene, carbon tetrachloride, and chloroform concentrations were all well below their respective PELs. These result indicate that the indoor air quality on the Property appears significantly below levels safe for human activities.

### 3.2 RECOMMENDATIONS

Based on the results of this assessment, CCI does not recommend additional assessment of the Property at this time.

---

---

## 4.0 LIMITATIONS

---

---

This assessment was conducted according to accepted industry standards and guidelines for similar assessments conducted in this geographic region at this time.

The conclusions and recommendations of this assessment are based, in part, from information and data provided by others. CCI is not responsible for the accuracy or completeness of this information. Inaccurate data, or information that was not found or made available to CCI, may result in a modification of our conclusions and recommendations.

In today's technology, no amount of assessment can ascertain that the Property is completely free of environmental concern. This assessment is not intended to be all inclusive, identify all potential concerns, or wholly eliminate the possibility of the Property having environmental risks. It is possible that variations in unpermitted, undocumented, or concealed improvements or alterations to the Property could exist beyond what was found during this assessment. Future changes in observed conditions on the Property could occur due to variations in environmental and physical conditions.

### USER RELIANCE

This report may be distributed and relied upon by the City of Burbank, and their successors and assigns. Reliance on the information and conclusions of this report by any other person or entity is not authorized without the written consent of CCI. This report is not legal opinion and does not offer warranties or guarantees.

### Notes and Definitions

- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the reporting limit
- RPD Relative Percent Difference
- E Estimated Concentration; concentration exceeds calibration range.
- LCC Leak Check Compound
- 1 Recovery outside of acceptable limits. LCS/LCSD recoveries and %RSD were within QC limits, therefore data was accepted.
- SMSR Sample matrix prevented adequate surrogate recovery.
- J Value less than PQL but greater than MDL
- HHSR High hydrocarbon concentration in this sample prevented adequate surrogate recovery.

## Appendix D

### *Explosive and Flammable Hazards Worksheet*

## Explosive and Flammable Hazards (CEST and EA)

General requirements	Legislation	Regulation
HUD-assisted projects must meet Acceptable Separation Distance (ASD) requirements to protect them from explosive and flammable hazards.	N/A	24 CFR Part 51 Subpart C
<b>Reference</b>		
<a href="https://www.hudexchange.info/environmental-review/explosive-and-flammable-facilities">https://www.hudexchange.info/environmental-review/explosive-and-flammable-facilities</a>		

1. Is the proposed HUD-assisted project itself the development of a hazardous facility (a facility that mainly stores, handles or processes flammable or combustible chemicals such as bulk fuel storage facilities and refineries)?

No

→ Continue to Question 2.

Yes

**Explain:**

N/A

→ Go directly to Question 5.

2. Does this project include any of the following activities: development, construction, rehabilitation that will increase residential densities, or conversion?

No

→ Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

Yes

→ Continue to Question 3.

3. Within 1 mile of the project site, are there any current *or planned* stationary aboveground storage containers that are covered by 24 CFR 51C? Containers that are NOT covered under the regulation include:

- Containers 100 gallons or less in capacity, containing common liquid industrial fuels OR
- Containers of liquified petroleum gas (LPG) or propane with a water volume capacity of 1,000 gallons or less that meet the requirements of the 2017 version of National Fire Protection Association (NFPA) Code 58.

If all containers within the search area fit the above criteria, answer “no.” For any other type of aboveground storage container within the search area that holds one of the

flammable or explosive materials listed in Appendix I of 24 CFR part 51 subpart C, answer “yes.”

No

→ Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide all documents used to make your determination.

Yes

→ Continue to Question 4.

4. Visit HUD’s website to identify the appropriate tank or tanks to assess and to calculate the required separation distance using the [electronic assessment tool](#). To document this step in the analysis, please attach the following supporting documents to this screen:

- Map identifying the tank selected for assessment, and showing the distance from the tank to the proposed HUD-assisted project site; and
- Electronic assessment tool calculation of the required separation distance.

Based on the analysis, is the proposed HUD-assisted project site located at or beyond the required separation distance from all covered tanks?

Yes

→ Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

No

→ Go directly to Question 6.

5. Is the hazardous facility located at an acceptable separation distance from residences and any other facility or area where people may congregate or be present?

Please visit HUD’s website for information on calculating Acceptable Separation Distance.

Yes

→ Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.

No

→ Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.  
Continue to Question 6.

6. For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Mitigation measures may include both natural and manmade barriers, modification of the project design, burial or removal of the hazard, or other engineered solutions. Describe selected mitigation measures, including the timeline for implementation, and attach an implementation plan. If negative effects cannot be mitigated, cancel the project at this location.

N/A

### **Worksheet Summary**

#### **Compliance Determination**

Provide a clear description of your determination and a synopsis of the information that it was based on, such as:

- Map panel numbers and dates
- Names of all consulted parties and relevant consultation dates
- Names of plans or reports and relevant page numbers

The proposed project would adaptively reuse and convert the former Boys & Girls Club of Burbank to a new access center for Home Again Los Angeles (HALA). The project would construct two modular pre-fabricated units housing a total of four “tiny home suites” to provide interim housing for families with children who are seeking placement in more permanent housing. The project would not involve construction of a facility that mainly stores, handles or processes flammable or combustible chemicals, and according to the Phase I Environmental Site Assessment (ESA) conducted by Conservation Consulting International (CCI) for the project site in August 2023 (see Appendix C.1 to the CEST), no existing aboveground storage tanks (ASTs) are present within the 2244 N Buena Vista Street property.

Due to the project’s interim housing component, the project is expected to increase the residential density of the local neighborhood. Thus, an online search of the CalEPA Regulated Site Portal was conducted to identify stationary ASTs regulated under 24 CFR 51C located within a one-mile radius from the project site, and to assess potential hazards associated with locating the project to close to the identified ASTs. The volumes/distances of all stationary ASTs containing “Specific Hazardous Substances,” as identified in Appendix I to Subpart C of Part 51, were entered into HUD’s Acceptable Separation Distance (ASD) Assessment Tool in a manner consistent with the methodology described in HUD’s Fact Sheet H2: *Determining Which Tanks to Evaluate for Acceptable Separation Distance*. Based on the data reviewed, it was determined that the project site is located beyond the ASD for each respective tank; therefore, no facilities containing explosive or flammable fuels, gases, or chemicals were identified as presenting a risk to future occupants or end users of the project site. Please refer to the AST radius map, summary table, and CalEPA records attached to the end of this worksheet.

Various additional online resources were searched to identify nearby ASTs, including Google Earth aerial imagery, SWRCB’s GeoTracker Database, and DTSC’s EnviroStor database. Public records searches were also submitted to the City of Burbank Fire Department and the Los Angeles County Fire Department to verify that no ASTs regulated under 24 CFR 51C were present within the gas station/commercial businesses property located near the northern boundary of the project site. No additional ASTs were identified by the City or County fire departments. The public records searches/fire department email responses from May 2025 are attached to the end of this worksheet.

**Are formal compliance steps or mitigation required?**

Yes

No

# Acceptable Separation Distance (ASD) Electronic Assessment Tool

The Environmental Planning Division (EPD) has developed an electronic-based assessment tool that calculates the Acceptable Separation Distance (ASD) from stationary hazards. The ASD is the distance from above ground stationary containerized hazards of an explosive or fire prone nature, to where a HUD assisted project can be located. The ASD is consistent with the Department's standards of blast overpressure (0.5 psi-buildings) and thermal radiation (450 BTU/ft<sup>2</sup> - hr - people and 10,000 BTU/ft<sup>2</sup> - hr - buildings). Calculation of the ASD is the first step to assess site suitability for proposed HUD-assisted projects near stationary hazards. Additional guidance on ASDs is available in the Department's guidebook "Siting of HUD- Assisted Projects Near Hazardous Facilities" and the regulation 24 CFR Part 51, Subpart C, Siting of HUD-Assisted Projects Near Hazardous Operations Handling Conventional Fuels or Chemicals of an Explosive or Flammable Nature.

**Note:** Tool tips, containing field specific information, have been added in this tool and may be accessed by hovering over the ASD result fields with the mouse.

# Acceptable Separation Distance (ASD) Electronic Assessment Tool

The Environmental Planning Division (EPD) has developed an electronic-based assessment tool that calculates the Acceptable Separation Distance (ASD) from stationary hazards. The ASD is the distance from above ground stationary containerized hazards of an explosive or fire prone nature, to where a HUD assisted project can be located. The ASD is consistent with the Department's standards of blast overpressure (0.5 psi-buildings) and thermal radiation (450 BTU/ft<sup>2</sup> - hr - people and 10,000 BTU/ft<sup>2</sup> - hr - buildings). Calculation of the ASD is the first step to assess site suitability for proposed HUD-assisted projects near stationary hazards. Additional guidance on ASDs is available in the Department's guidebook "Siting of HUD- Assisted Projects Near Hazardous Facilities" and the regulation 24 CFR Part 51, Subpart C, Siting of HUD-Assisted Projects Near Hazardous Operations Handling Conventional Fuels or Chemicals of an Explosive or Flammable Nature.

**Note:** Tool tips, containing field specific information, have been added in this tool and may be accessed by hovering over the ASD result fields with the mouse.

## Acceptable Separation Distance Assessment Tool

Is the container above ground?	Yes: <input checked="" type="checkbox"/> No: <input type="checkbox"/>
Is the container under pressure?	Yes: <input type="checkbox"/> No: <input checked="" type="checkbox"/>
Does the container hold a cryogenic liquified gas?	Yes: <input type="checkbox"/> No: <input type="checkbox"/>
Is the container diked?	Yes: <input type="checkbox"/> No: <input checked="" type="checkbox"/>
What is the volume (gal) of the container?	<input type="text" value="19442"/>
What is the Diked Area Length (ft)?	<input type="text"/>

# Acceptable Separation Distance (ASD) Electronic Assessment Tool

The Environmental Planning Division (EPD) has developed an electronic-based assessment tool that calculates the Acceptable Separation Distance (ASD) from stationary hazards. The ASD is the distance from above ground stationary containerized hazards of an explosive or fire prone nature, to where a HUD assisted project can be located. The ASD is consistent with the Department's standards of blast overpressure (0.5 psi-buildings) and thermal radiation (450 BTU/ft<sup>2</sup> - hr - people and 10,000 BTU/ft<sup>2</sup> - hr - buildings). Calculation of the ASD is the first step to assess site suitability for proposed HUD-assisted projects near stationary hazards. Additional guidance on ASDs is available in the Department's guidebook "Siting of HUD- Assisted Projects Near Hazardous Facilities" and the regulation 24 CFR Part 51, Subpart C, Siting of HUD-Assisted Projects Near Hazardous Operations Handling Conventional Fuels or Chemicals of an Explosive or Flammable Nature.

**Note:** Tool tips, containing field specific information, have been added in this tool and may be accessed by hovering over the ASD result fields with the mouse.

## Acceptable Separation Distance Assessment Tool

Is the container above ground?	Yes: <input checked="" type="checkbox"/> No: <input type="checkbox"/>
Is the container under pressure?	Yes: <input checked="" type="checkbox"/> No: <input type="checkbox"/>
Does the container hold a cryogenic liquified gas?	Yes: <input type="checkbox"/> No: <input checked="" type="checkbox"/>
Is the container diked?	Yes: <input type="checkbox"/> No: <input type="checkbox"/>
What is the volume (gal) of the container?	<input type="text" value="8999"/>
What is the Diked Area Length (ft)?	<input type="text"/>
What is the Diked Area Width (ft)?	<input type="text"/>
<input type="button" value="Calculate Acceptable Separation Distance"/>	
Diked Area (sqft)	<input type="text"/>
ASD for Blast Over Pressure (ASDBOP)	<input type="text" value="452.85"/>
ASD for Thermal Radiation for People (ASDPPU)	<input type="text" value="690.74"/>
ASD for Thermal Radiation for Buildings (ASDBPU)	<input type="text" value="138.84"/>
ASD for Thermal Radiation for People (ASDPNPD)	<input type="text"/>

The Environmental Planning Division (EPD) has developed an electronic-based assessment tool that calculates the Acceptable Separation Distance (ASD) from stationary hazards. The ASD is the distance from above ground stationary containerized hazards of an explosive or fire prone nature, to where a HUD assisted project can be located. The ASD is consistent with the Department's standards of blast overpressure (0.5 psi-buildings) and thermal radiation (450 BTU/ft<sup>2</sup> - hr - people and 10,000 BTU/ft<sup>2</sup> - hr - buildings). Calculation of the ASD is the first step to assess site suitability for proposed HUD-assisted projects near stationary hazards. Additional guidance on ASDs is available in the Department's guidebook "Siting of HUD- Assisted Projects Near Hazardous Facilities" and the regulation 24 CFR Part 51, Subpart C, Siting of HUD-Assisted Projects Near Hazardous Operations Handling Conventional Fuels or Chemicals of an Explosive or Flammable Nature.

**Note:** Tool tips, containing field specific information, have been added in this tool and may be accessed by hovering over the ASD result fields with the mouse.

## Acceptable Separation Distance Assessment Tool

Is the container above ground?	Yes: <input checked="" type="checkbox"/> No: <input type="checkbox"/>

---

You don't often get email from jsorowice@burbankca.gov. [Learn why this is important](#)

Good morning,

Regarding the properties located at APN: 2464-013-035 and 2464-013-003 in the City of Burbank, we have no record of any aboveground storage tanks located at either site. Additionally, there are no records of regulated substances being stored at these sites in quantities that require reporting. I would recommend reaching out to the Los Angeles County CUPA regarding the dry cleaning service located at 2411 N San Fernando Blvd for any Hazardous Waste Program records.

**JAMES SOROWICE**

--- Please respond above this line ---

RE: PRA of May 07, 2025, Reference # H070992-050725.

Dear Andray Cardoza,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

**Re: 2801 N SAN FERNANDO BLVD  
BURBANK CA 91504**

**The search revealed that no records were found for the above noted address.**

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, CulverCity, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction [click here](#).

If you have any questions regarding your request, please contact our office at: 818-364-7120.

Health Hazardous Materials Division

Appendix E.1  
*USFWS IPaC Results*

# IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

## Location

Los Angeles County, California

## Local office

Carlsbad Fish And Wildlife Office

☎ (760) 431-9440

📅 (760) 431-5901

2177 Salk Avenue - Suite 250  
Carlsbad, CA 92008-7385

NOT FOR CONSULTATION

# Endangered species

**This resource list is for informational purposes only and does not constitute an analysis of project level impacts.**

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species<sup>1</sup> and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries<sup>2</sup>).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

- 
1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information. IPaC only shows species that are regulated by USFWS (see FAQ).

2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

## Birds

NAME	STATUS
Coastal California Gnatcatcher <i>Polioptila californica californica</i> Wherever found There is <b>final</b> critical habitat for this species. Your location does not overlap the critical habitat. <a href="https://ecos.fws.gov/ecp/species/8178">https://ecos.fws.gov/ecp/species/8178</a>	Threatened
Southwestern Willow Flycatcher <i>Empidonax traillii extimus</i> Wherever found There is <b>final</b> critical habitat for this species. Your location does not overlap the critical habitat. <a href="https://ecos.fws.gov/ecp/species/6749">https://ecos.fws.gov/ecp/species/6749</a>	Endangered

## Reptiles

NAME	STATUS
Southwestern Pond Turtle <i>Actinemys pallida</i> Wherever found No critical habitat has been designated for this species. <a href="https://ecos.fws.gov/ecp/species/4768">https://ecos.fws.gov/ecp/species/4768</a>	Proposed Threatened

## Amphibians

NAME	STATUS
Western Spadefoot <i>Spea hammondi</i> Wherever found No critical habitat has been designated for this species. <a href="https://ecos.fws.gov/ecp/species/5425">https://ecos.fws.gov/ecp/species/5425</a>	Proposed Threatened

## Insects

NAME	STATUS
------	--------

---

Monarch Butterfly *Danaus plexippus*

Candidate

Wherever found

No critical habitat has been designated for this species.

<https://ecos.fws.gov/ecp/species/9743>

## Flowering Plants

---

NAME

STATUS

Nevin's Barberry *Berberis nevinii*

Endangered

Wherever found

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.

<https://ecos.fws.gov/ecp/species/8025>

Slender-horned Spineflower *Dodecahema leptoceras*

Endangered

Wherever found

No critical habitat has been designated for this species.

<https://ecos.fws.gov/ecp/species/4007>

## Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

You are still required to determine if your project(s) may have effects on all above listed species.

## Bald & Golden Eagles

There are no documented cases of eagles being present at this location. However, if you believe eagles may be using your site, please reach out to the local Fish and Wildlife Service office.

---

Additional information can be found using the following links:

- Eagle Management <https://www.fws.gov/program/eagle-management>

- Measures for avoiding and minimizing impacts to birds  
<https://www.fws.gov/library/collections/avoiding-and-minimizing-incident-take-migratory-birds>
- Nationwide conservation measures for birds  
<https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>
- Supplemental Information for Migratory Birds and Eagles in IPaC  
<https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action>

#### **What does IPaC use to generate the potential presence of bald and golden eagles in my specified location?**

The potential for eagle presence is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply). To see a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

#### **What does IPaC use to generate the probability of presence graphs of bald and golden eagles in my specified location?**

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

#### **What if I have eagles on my list?**

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the [Eagle Act](#) should such impacts occur. Please contact your local Fish and Wildlife Service Field Office if you have questions.

## Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act<sup>1</sup> and the Bald and Golden Eagle Protection Act<sup>2</sup>.

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats<sup>3</sup> should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the "[Supplemental Information on Migratory Birds and Eagles](#)".

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Eagle Management <https://www.fws.gov/program/eagle-management>
- Measures for avoiding and minimizing impacts to birds <https://www.fws.gov/library/collections/avoiding-and-minimizing-incident-take-migratory-birds>
- Nationwide conservation measures for birds <https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>
- Supplemental Information for Migratory Birds and Eagles in IPaC <https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME

BREEDING SEASON

---

<b>Allen's Hummingbird</b> <i>Selasphorus sasin</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9637">https://ecos.fws.gov/ecp/species/9637</a>	Breeds Feb 1 to Jul 15
<b>Belding's Savannah Sparrow</b> <i>Passerculus sandwichensis beldingi</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA <a href="https://ecos.fws.gov/ecp/species/8">https://ecos.fws.gov/ecp/species/8</a>	Breeds Apr 1 to Aug 15
<b>Black-chinned Sparrow</b> <i>Spizella atrogularis</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9447">https://ecos.fws.gov/ecp/species/9447</a>	Breeds Apr 15 to Jul 31
<b>Bullock's Oriole</b> <i>Icterus bullockii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Mar 21 to Jul 25
<b>California Gull</b> <i>Larus californicus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Mar 1 to Jul 31
<b>California Thrasher</b> <i>Toxostoma redivivum</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Jan 1 to Jul 31
<b>Cassin's Finch</b> <i>Haemorhous cassinii</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9462">https://ecos.fws.gov/ecp/species/9462</a>	Breeds May 15 to Jul 15
<b>Common Yellowthroat</b> <i>Geothlypis trichas sinuosa</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA <a href="https://ecos.fws.gov/ecp/species/2084">https://ecos.fws.gov/ecp/species/2084</a>	Breeds May 20 to Jul 31
<b>Lawrence's Goldfinch</b> <i>Spinus lawrencei</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9464">https://ecos.fws.gov/ecp/species/9464</a>	Breeds Mar 20 to Sep 20

Northern Harrier <i>Circus hudsonius</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA <a href="https://ecos.fws.gov/ecp/species/8350">https://ecos.fws.gov/ecp/species/8350</a>	Breeds Apr 1 to Sep 15
Nuttall's Woodpecker <i>Dryobates nuttallii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA <a href="https://ecos.fws.gov/ecp/species/9410">https://ecos.fws.gov/ecp/species/9410</a>	Breeds Apr 1 to Jul 20
Oak Titmouse <i>Baeolophus inornatus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9656">https://ecos.fws.gov/ecp/species/9656</a>	Breeds Mar 15 to Jul 15
Olive-sided Flycatcher <i>Contopus cooperi</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/3914">https://ecos.fws.gov/ecp/species/3914</a>	Breeds May 20 to Aug 31
Santa Barbara Song Sparrow <i>Melospiza melodia graminea</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA <a href="https://ecos.fws.gov/ecp/species/5513">https://ecos.fws.gov/ecp/species/5513</a>	Breeds Mar 1 to Sep 5
Western Gull <i>Larus occidentalis</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Apr 21 to Aug 25
Western Screech-owl <i>Megascops kennicottii cardonensis</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Mar 1 to Jun 30
Wrentit <i>Chamaea fasciata</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Mar 15 to Aug 10

## Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read

["Supplemental Information on Migratory Birds and Eagles"](#), specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

### Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is  $0.25/0.25 = 1$ ; at week 20 it is  $0.05/0.25 = 0.2$ .
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

### Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

### Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

### No Data (—)

A week is marked as having no data if there were no survey events for that week.

### Survey Timeframe

**Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.**

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

**What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?**

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

**What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?**

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go to the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

### **How do I know if a bird is breeding, wintering or migrating in my area?**

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the [RAIL Tool](#) and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

### **What are the levels of concern for migratory birds?**

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

### **Details about birds that are potentially affected by offshore projects**

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

### **What if I have eagles on my list?**

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

### **Proper Interpretation and Use of Your Migratory Bird Report**

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

## Facilities

### **National Wildlife Refuge lands**

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

### **Fish hatcheries**

There are no fish hatcheries at this location.

# Wetlands in the National Wetlands Inventory (NWI)

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

This location did not intersect any wetlands mapped by NWI.

**NOTE:** This initial screening does **not** replace an on-site delineation to determine whether wetlands occur. Additional information on the NWI data is provided below.

## Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

## Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

## Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should

seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

### APPENDICES

Appendix A: Site Record

## 1.0 INTRODUCTION

Kimley-Horn and Associates, Inc. (KHA) prepared a Historic Property Inventory and Evaluation Report for the Home Again Los Angeles Access Center Project (Project) area located at 2244 N. Buena Vista Street within the City of Burbank in Los Angeles County, California. This project is subject to review under the National Environmental Policy Act (NEPA) and constitutes a Federal undertaking under the National Historic Preservation Act (NHPA). As such, KHA conducted a literature review, record search, outreach, and field survey for the Area of Potential Effects (APE) to identify the presence of cultural resources that are eligible for listing in the National Register of Historic Places (NRHP), otherwise identified as Historic Properties, and potential effects to Historic Properties that could occur as a result of the undertaking.

### 1.1 Project Description

The APE for the undertaking is located at 2244 N. Buena Vista Street in the northwestern portion of the City of Burbank in the County of Los Angeles, California (Figure 1). The APE includes approximately 0.47 acres of land encompassing the entirety APN 2464-013-900 and a small portion of 2244 N. Buena Vista Street (Figure 2). The proposed Project would adaptively reuse and convert a facility known as the former Boys & Girls Club of Burbank (initially built as a City fire station) to a new access center for Home Again Los Angeles (HALA). HALA is a local 501(c)(3) nonprofit homeless services provider that offers five core programs for the unhoused and those on the verge of homelessness, including Shelter, Rapid Rehousing, Transitional Housing, Rental Relief, and Educational Workshop programs focused on homeless prevention and housing stability. The property within the APE is owned by the City of Burbank and includes several buildings/structures that were vacated in 2021 following 27 years of tenancy (from 1994 to 2021) by the Boys & Girls Club. The existing vacant structures in the APE include a large “main facility” (4,500 square feet), two portable buildings (850 square feet and 280 square feet, respectively), and existing storage sheds. The proposed Project would renovate and/or remove the existing facilities in the APE, allowing HALA to relocate its existing Burbank operation to 2244 N. Buena Vista Street.

The main component of the Project is the development of the HALA Access Center, which requires a facility large enough to accommodate a community room, a job center, case management rooms, intake rooms, and community partner rooms. The new Access Center would allow HALA to provide wraparound services focusing on employment, financing, and housing to the unhoused and those on the verge of homelessness. To achieve this, the interior of the existing 4,500-square-foot building would be renovated and reconfigured. The proposed renovations include demolition of existing walls, doors, and plumbing fixtures, and various upgrades to the building including, but not limited to: new roofing and water proofing; interior electrical and lighting upgrades; new flooring and a new drop ceiling; plumbing improvements (water heater and gas system); a fire safety system; energy modernization (insulation and windows); a new HVAC system; structural seismic retrofitting; hazardous materials abatement (asbestos removal); and interior and exterior painting.

The proposed Project would require upgraded utility service connections, including a new fire sprinkler water service line and Burbank Water and Power (BWP) electrical service upgrades. The water service line would be installed underground between the Access Center and the point of connection at N. Buena Vista

Figure 1: Project Vicinity Map

Figure 2: Area of Potential Effects (APE)

Street. It is anticipated that installation of the water service connection would involve excavating a maximum length of 65 feet, a maximum width of 3 feet, and to a maximum depth of 6 feet below ground surface (bgs). Other improvements to the surrounding portions of the property include demolition/removal of the two existing portable trailers at the northern property line, removing a small wall that is located along N. Buena Vista Street and replacing it with a new gate, landscaping and irrigation improvements, demolition/removal of the existing storage structures at the rear of the property, and re-surfacing the existing basketball court.

The proposed Project also includes plans for installation of two modular pre-fabricated units, housing a total of four “tiny home suites” that include bathrooms with a shower/tub, toilet and sink in each of the units at the north side of the property next to the Access Center, where the existing portable trailers are to be demolished. The tiny homes along with a room in the Access Center will provide a minimum 120 SF habitable space per unit. The tiny home suites would provide interim housing offering families supportive services and a minimum six-month duration of stay, until they opt to move into permanent housing. Families will work with a dedicated case manager to develop a personalized strategic plan focusing on employment, finances, and housing, while awaiting placement in more permanent housing.

## 1.2 Regulatory Setting

### ***National Environmental Policy Act***

The National Environmental Policy Act (NEPA) establishes the federal policy of protecting significant historic, cultural, and natural aspects of our national heritage during federal project planning. All federal or federally assisted projects requiring action pursuant to Section 102 of NEPA must take into account the effects on cultural resources. According to the NEPA regulations, in considering whether an action may “significantly affect the quality of the human environment,” an agency must consider, among other things, unique characteristics of the geographic area such as proximity to historic or cultural resources (40 Code of Federal Regulations [C.F.R.] § 1508.27[b][3]) and the degree to which the action may adversely affect resources listed in or eligible for listing in the National Register of Historic Places (National Register). NEPA regulations also require that, to the fullest extent possible, agencies shall prepare draft environmental documents concurrently with and integrated with environmental impact analyses and related surveys and studies required by the National Historic Preservation Act (NHPA). When Section 106 of the NHPA and NEPA are integrated, project actions that cause adverse effects under Section 106 are usually considered to be significant under NEPA.

### ***National Historic Preservation Act***

The National Historic Preservation Act (NHPA) establishes the federal government policy on historic preservation and the programs through which this policy is implemented. Cultural resources include any prehistoric or historic district, site, building, structure, or object and those included in, or determined eligible for inclusion in, the National Register of Historic Places (NRHP) are identified as Historic Properties. Historic Properties also include resources determined to be National Historic Landmarks (NHLs). NHLs are nationally significant historic places designated by the Secretary of the Interior (SOI) because they possess exceptional value or quality in illustrating or interpreting United States heritage. A property is considered

historically significant if it meets one or more of the NRHP criteria and retains sufficient historic integrity to be able to convey its significance. This act also established the Advisory Council on Historic Preservation (ACHP), an independent agency responsible for implementing Section 106 of NHPA by developing procedures to protect cultural resources included in, or eligible for inclusion in, the NRHP.

Section 106 of the NHPA requires that effects on historic properties be taken into consideration in any federal undertaking. The process has five steps: (1) initiating the Section 106 process, (2) identifying Historic Properties, (3) assessing adverse effects to Historic Properties, (4) resolving adverse effects, and (5) implementing stipulations in an agreement document. Section 106 affords the ACHP and the State Historic Preservation Officer (SHPO), as well as other consulting parties, a reasonable opportunity to comment on any undertaking that would adversely affect Historic Properties. SHPOs administer the national historic preservation program at the state level, review NRHP nominations, maintain data on historic properties that have been identified but not yet nominated, and consult with federal agencies during Section 106 review.

Eligibility for the NRHP rests on two factors: significance and integrity. In order to be eligible for inclusion in the NRHP, a property must meet one or more of the criteria listed below (36 CFR § 60.4) and retain integrity:

- Criterion A: Association with “events that have made a significant contribution to the broad patterns of our history.”
- Criterion B: Association with “the lives of persons significant in our past.”
- Criterion C: Resources “that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.”
- Criterion D: Resources “that have yielded, or may be likely to yield, information important to history or prehistory.”

The National Register bulletin entitled How to Apply the National Register Criteria for Evaluation states that in order for a property to qualify for listing in the NRHP, it must meet at least one of the National Register criteria by: (1) being associated with an important historic context, and (2) retaining historic integrity of those features necessary to convey its significance (National Park Service 1997). The historic context of a resource will define the theme(s), geographical limits, and period of significance by which to evaluate a resource’s significance (National Park Service 1997:7). Generally, cultural properties must be 50 years of age or more to be eligible for listing in the NRHP. According to the National Park Service (1997:2), “properties that have achieved significance within the past 50 years shall not be considered eligible” unless such properties are “of exceptional importance.” In addition to being significant under one or more of these criteria, NRHP eligibility requires that a resource retain sufficient integrity to convey its significance. Integrity is evaluated through consideration of characteristics that existed during a resource’s period of significance. Integrity is evaluated with regard to the retention of seven elements:

- Location: The place where the resource was constructed
- Design: The combination of elements that create the form, plans, space, structure, and style of the resource
- Setting: The physical environment of the resource, including the landscape and spatial relationship of the buildings
- Materials: The physical elements that were combined or deposited during a particular period of time and in a particular pattern of configuration to form the resource
- Workmanship: The physical evidence of the crafts of a particular culture or people during any given period of history
- Feeling: The resource's expression of the aesthetic or historic sense of a particular period of time
- Association: The direct link between an important historic event or person and a resource

The NHPA allows properties of traditional religious and cultural importance to a Native American tribe to be eligible for NRHP inclusion (Section 101(d)(6)(A)). Additionally, a broader range of Traditional Cultural Properties (TCPs) are also considered and may be eligible for or listed in the NRHP. TCPs are places associated with the cultural practices or beliefs of a living community that are rooted in that community's history and that may be eligible because of their association with cultural practices or beliefs of living communities that are rooted in that community's history and are important in maintaining the continuing cultural identity of the community.

### 1.3 Historical and Natural Setting

The Project area is located within the central portion of Los Angeles County within the Los Angeles Basin. The Los Angeles Basin is a structural depression that is approximately 50 miles long and 20 miles wide that developed as a result of tectonic forces and the San Andreas Fault zone (Ingersoll and Rumelhart 1999; Critelli et al. 1995). Sediments have eroded into the basin from the surrounding mountains since the middle Miocene (13 million years ago), resulting in thousands of feet of sediment accumulation within the Basin. When the sea level dropped during the Pleistocene (2.58 million to 11,700 years ago), the uppermost layers of the Basin then became composed of alluvial sediments (Yerkes et al. 1965). In the present day, the Project area is underlain by disturbed late Pleistocene/early Holocene-aged alluvium (Qyf2) location in the middle of a series of wash deposits (Qw) (Campbell et al. 2016). The area, like much of California, contains a unique and diverse climate and environment. This regional diversity provided Native Californians the ability to exploit a range of different plants, animals, and natural resources.

The Project area is located within the ancestral territory of the Gabrieleño/Tongva. Although Alfred Kroeber recorded the territories of southern California tribes in 1925, the ancient territorial borders remain vague for two reasons: first, territorial boundaries were flexible and, secondly, indigenous borders and land use were not recorded until after European contact destroyed native lifeways. Although firm and defining borders cannot be known, archaeological, ethnographic, and historic evidence exists to support the prehistoric use by the Gabrieleño/Tongva (Gabrieleño [Tongva] Band of Mission Indians). It is generally

understood that their ancestral territory included the watersheds of the San Gabriel, Santa Ana, and Los Angeles Rivers, portions of the Santa Monica and Santa Ana Mountains, the Los Angeles Basin, the coast from Aliso Creek to Topanga Creek, and San Clemente, San Nicolas, and Santa Catalina Islands.

The Gabrieleño/Tongva had a rich and diverse material culture, including shell set in asphaltum, carvings, painting, baskets, an extensive steatite industry, and a wide range of stone, shell, and bone materials. At the time of European contact, they inhabited numerous permanent villages in fertile lowlands along waterways in sheltered areas along the coast, each of which held a population in the low hundreds. Smaller villages were also located at varying distances from these permanent villages, all of which were highly connected via economic, religious, and social ties (Bean and Smith 1978). Villages contained circular and domed homes made of tule mats, fern, or carrizo, as well as small, circular earth-covered sweathouses (Kroeber 1925; Bean and Smith 1978). Their hunting and gathering subsistence strategy included land and offshore efforts that resulted in the take of both small and large land animals, sea mammals, river and ocean fish, and a variety of plant resources. The population sometimes migrated between villages on a temporary basis throughout the year, returning to their permanent villages for ceremony or when resources needed to be replenished (Hudson and Blackburn 1982).

Records show that the Gabrieleño/Tongva were first contacted by Europeans in 1542 as a result of Juan Rodríguez Cabrillo visiting the area during exploration. Following many subsequent Spanish visits to the region, the colonization of the indigenous population began in 1769 around the same time as the establishment of Missions San Gabriel in 1771 and San Fernando in 1797. Due in part to the introduction of new diseases, as well as the harsh conditions of mission life, the indigenous population quickly dwindled and cultural practices were lost. Following the secularization of the missions, most surviving Gabrieleño/Tongva became wage laborers on the ranchos of Mexican California and were later nearly completely wiped out as a result of a smallpox outbreak in the 1860s. The combination of removal, murder, disease, forced labor, and poor diet contributed to the disappearance of the Gabrieleño/Tongva as a culturally identifiable group in the 1900 federal census (Bean and Smith 1978). However, the 20th century found a revitalization of the Gabrieleño/Tongva people and culture, and though the communities remain unrecognized by the Federal government, they remain a very active people in the Los Angeles area today.

The early history of Burbank dates from 1887, when it was a small farming community in the San Fernando Valley, until it was later incorporated in 1911, at which time the City included much industrial and residential growth. This time period, which lasted until 1928, is reflective of a large residential, commercial, and industrial boom associated with the air and auto industries. During the Great Depression and World War II from 1929 through 1945, the City experienced a noted slowdown of development followed the implementation of economic recovery efforts, such as the Works Progress Administration, the establishment of Walt Disney Studios, and war-focused aircraft production. In the post-war era between 1946 and 1965, the City saw a population boom that led to increased housing development, as well as success through renewed aircraft development via Lockheed as a result of the start of the Cold War and the establishment of the National Broadcasting Company (NBC) television within the City (GPA 2009). Since then, the City has continued to thrive, even developing the nickname of “The Media Capital

of the World”, as it later became home to many media companies beyond NBC and Disney, such as Warner Bros., Cartoon Network, Nickelodeon, and Netflix (City of Burbank 2023).

## 2.0 METHODS

All efforts made for the completion of this report was completed pursuant to requirements set forth in the NHPA and NEPA. This study is intended to identify whether historic properties are located within the APE and to develop specific recommendations that will address any potential effects to the historic properties as a result of the project. Tasks completed include:

- Review of geological and historical maps and imagery to identify the resource sensitivity of the APE;
- Review of National, State, and local registers to identify if any listed cultural resources are located within the APE;
- A cultural records search through the South Central Coastal Information Center (SCCIC) to identify any studies conducted and/or resources recorded within or adjacent to the APE;
- Outreach to local historical societies and the City of Burbank;
- Review of historical documents, such as architectural plans and photographs;
- Review of the City of Burbank Citywide Historic Context Report;
- Recordation and significance evaluation of any identified resources; and
- Development of recommendations related to historic properties in the APE.

## 3.0 INVENTORY

### 3.1 Record Search

A review of available historical and topographic maps, aerial imagery, and technical studies was conducted to ascertain the level of existing disturbance within the APE as well as the potential for existing buried and built environment cultural resources. KHA cultural resources management staff conducted a records search at the South Central Coastal Information Center (SCCIC) on August 29, 2024 to identify any previously recorded cultural resources or previously conducted cultural resources studies within the APE plus a 0.5 mile buffer (Figure 3). The results of the records search noted that nine (9) cultural resources studies have been conducted within 0.5 miles of the APE, though none that intersect with the APE (Table 1). No previously recorded cultural resources were identified within the APE or within the 0.5-mile buffer.

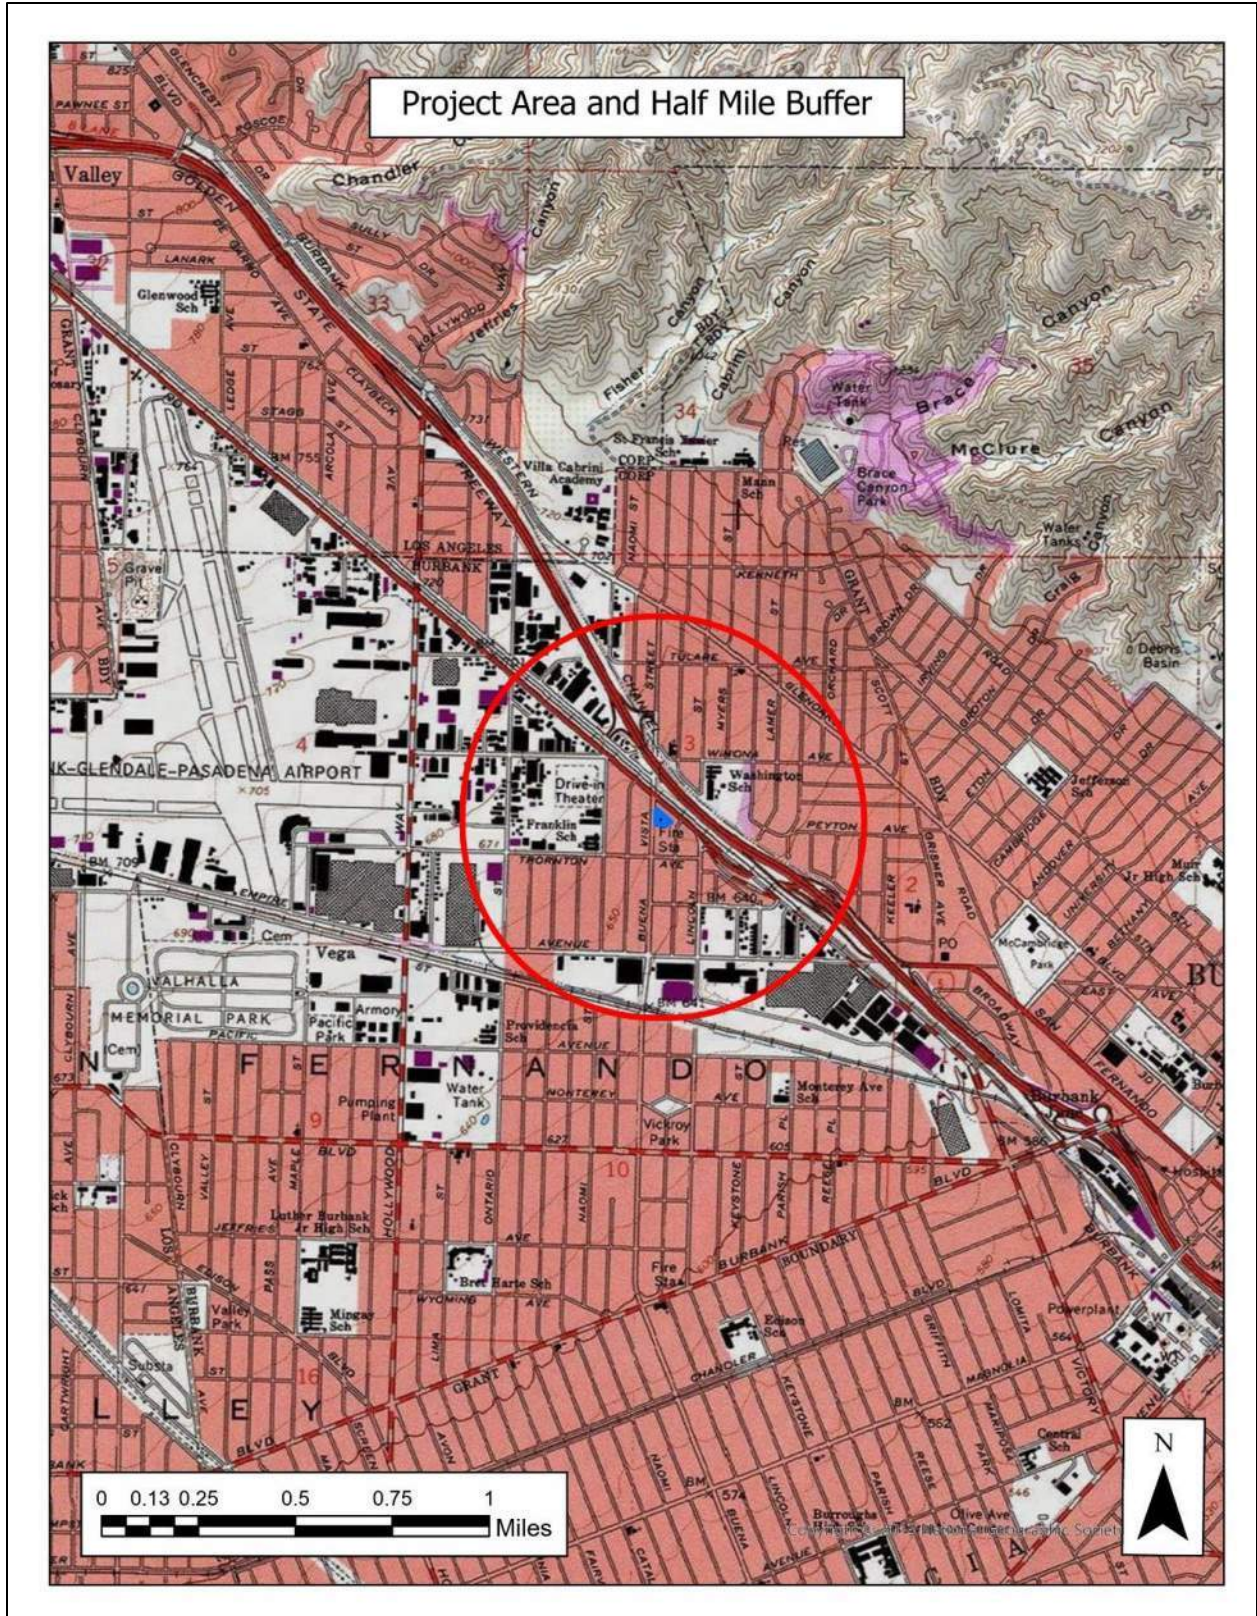

Figure 3: APE Plus a 0.5-Mile Buffer

### 3.2 Outreach

KHA contacted the City of Burbank to request any historical records or information of the historic-era building in the APE. The City of Burbank responded on December 9, 2024, and provided property deeds, city council minutes, resolutions, and building plans dating from 1941-2010 related to the building (City Clerk). KHA also contacted the following historical societies to request any historical records or information of the historic-era building in the APE: Burbank Historical Society, Los Angeles Fire Department Historical Society, Los Angeles City Historical Society, and Historical Society of Southern California. Unfortunately, outreach to historical societies did not yield any results or records for review.

### 3.3 Literature Review

Review of historical topographic maps, aerial imagery, and City records for the APE indicates the subject parcel was undisturbed and undeveloped prior to 1928 until the mid-20th century. In 1941, the APE was included in the division of Tract number 4615, and land deeds from this year show that land sales of portions of the APE were made to two married couples in 1941; A.M. Dunn and Myrtle M. Dunn who purchased Lot 121, and Alene G. Guild and Charles H. Guild who purchased Lot 122 (Figure 4; City Clerk). Mike Radich and C.T. Brown were also granted a deed that included a small portion of the northern APE based off an earlier 1938 land purchase (City Clerk). Imagery shows evidence of extensive soil disturbance by 1950 via the construction of the modern alignment of N. Buena Vista Street and development in the subject parcel of a residential structure and detached automobile garage in the south portion of the property (Historic Aerials). In 1955 and 1956, the City of Burbank purchased lots 121, 122, and 123 for the purpose of constructing a fire station (City Clerk). Deeds show that lot 121 was sold for a price of \$5,000 by the same owners recorded in 1941, A.M. Dunn and Myrtle Dunn, however Lot 122 was sold at a price

of \$5,000 by “Roscoe Investment Company,” and Lot 123 was sold at a price of \$14,000 by Peter and Effie Broadley. City Resolutions 10,659, 10,673, 10,674, 10,675, and 10,676 document the purchases of Lots 121, 122, 123, and 139 for the purpose of constructing a Fire Station at the site and City Resolution 10,672 documents an invitation for contractors to bid on the construction (City Clerk).

Prescott & Whalley architects were contracted to design the fire station, and a permit was granted in August 1956 (Figure 5; City Clerk). Alfred Prescott and Raymond Whalley were based in Burbank and began practicing in the late 1940s. Their firm was best known for their work in Burbank and their projects include the County Courts Building (1954), Burbank City Hall Annex (1959), and the St. Jerome Catholic Church in Westchester, CA (1966) (Historic Resources Group 2015). They also designed several other fire stations in the Los Angeles basin, such as Station No. 95 in Westchester and Station No. 97 in Studio City (Historic Resources Group 2015). Aerial imagery from 1956 shows the residence within the APE had been demolished and the fire station was constructed within the APE (Historic Aerials). This structure was used as a City of Burbank Fire Station between that time and 1994, first as Station No.3 and then later as Station No. 13 (Burbank Public Library; Figures 6 and 7). Records provided by the City show minimal changes occurred to the building footprint during this period, with only a lease agreement for three parking spaces included amongst records during this timeframe.

In 1994, the property was then leased to The Boys & Girls Club of Burbank and Greater East Valley from 1994 through 2021. The rental agreement is documented in City Resolution 24,131 and was amended in 1997 in Resolution 25,003. They made numerous improvements and modifications between 1995 and 2002, including modernization of electrical equipment in 1996, renovations to the interior of the building in 1997 with a total cost of \$14,000 (extent of renovations illegible in records), installation of an HVAC system in 1997, construction of an enclosed patio addition in 1999 totaling \$18,600, installation of fire safety equipment in 1999 and 2002, and improvements to the building’s ceiling and roof in 2005 (City Clerk). The Boys & Girls Club served about 75 children in the Burbank community and included award winning programs such as the Death and Hard of Hearing program added in 2004 (Boys & Girls Club of Burbank and Greater East Valley; Figure 8).The property has remained vacant since 2020 when the Boys & Girls Club vacated the property, and has since been subject to vandalism on the interior and exterior of the building (Figures 9-18, below).

### 3.4 Survey

KHA surveyed the entire APE on January 26, 2025. Access to the interior of the building was provided by the City. The historic-era resource was recorded on the applicable site record forms, which are included in Appendix A of this report, and extensive photographs were taken of both the interior and exterior (Figures 9-18, below).

### 3.5 Resource Description

KHA-BUR-01 is a historic-era building, originally constructed circa 1956 as a fire station by the City of Burbank at 2244 North Buena Vista Street. The building operated as a fire station from 1956 to 1994 as Station No.3 and then later as Station No. 13. Though records indicate the City acquired the parcels with the intent to construct a fire station, records do not indicate a specific reason as to why the City chose this particular location. The single-story building was designed in the Mid-Century Modernism style by local Burbank-based architects Prescott & Whalley, who began their practice in the 1940s. They also designed two fire houses in the City of Los Angeles, as well as other fire houses and civic/municipal buildings in the region throughout the 1940s and 1950s (Historic Resources Group 2015).

In 1994, the building was leased to the Boys and Girls Club of Burbank and Greater East Valley and several modifications to the building were made during their tenancy. In 1997, the interior of the building was remodeled to convert the building from a fire station to a children's club. However, research conducted through City records and regional historical societies did not identify records with the original interior layout of the building and, as such, it is unclear where specific alterations were made. On the exterior, the original handball courts and training yard were modified to a playground, and records note an enclosed patio addition was added to the south of the building in 1998.

In its current condition, the building features a dominant double-width equipment bay with support spaces (e.g., office, dormitory, day room, kitchen, and storage) placed in secondary surrounding masses. The building also features a stepped roof and stucco exterior walls. The façade is recessed and cantilevered with decorative flagstone masonry elements, and the original large bay door has been modified/filled. The main entrance is also cantilevered and contains large glass doors. The building is set back from the street and contains a wide paved driveway. The outdoor area associated with the building is primarily a large flat area with a basketball hoop. Updates have been made to the roof and ceiling, and portable trailers were added to the property at some point. Additionally, the exterior has been cosmetically altered to reflect its use as a Boys & Girls Club and there is extensive vandalism on the interior of the building. However, the building has maintained many of its original exterior elements, such as the driveway, window openings and locations, overhangs, and decorative rock wall and planter.

## 4.0 EVALUATION

### ***KHA-BUR-01 (Fire Station No. 3/Boys and Girls Club of Burbank and Greater East Valley)***

#### **Historic Context Review and Discussion**

##### *City of Burbank Citywide Historic Context Report*

KHA reviewed the City of Burbank’s Citywide Historic Context Report (Burbank HCR), which identifies several periods of significance for historic built environment resources (GPA 2009). The construction of the building falls into the period of “Burbank During the Post-War Years” period (1946-1960). The Burbank HCR describes this period as being defined by rapid residential growth, particularly to house Japanese American evacuees returning from Internment Camps during World War II. This period saw the culmination of a trend of the City moving away from agricultural activity to industrial and entertainment activity as the chief economic activity. To serve the growing population and changing needs of the City, this period also saw the rise of infrastructure projects with large power, rail, and roadway projects completed during this period. While the Burbank HCR identifies several building/resource typologies that fall into this period, KHA-BUR-01 is most closely related to the category of Civic/Institutional Buildings. However, resources within this category are limited to specific Burbank Water and Power buildings, the Olive Avenue Power Plant, and other general Civic buildings in Downtown Burbank. As such, per the City’s own efforts to identify significant historic resources and their contribution to areas, themes, and periods of historical significance within the City, KHA-BUR-01 (or similar resource types) was not identified as a potentially significant resource. However, it is also recognized that the Burbank HCR, while incredibly detailed for many periods and building/resource typologies, did not prepare a detailed context with associated descriptions, a list character-defining features, essential aspects of integrity, or applicable criteria for Civic/Institutional Buildings. Therefore, KHA reviewed the Los Angeles Citywide Historic Context Statement (LA HCS) to support the review of KHA-BUR-01, as it included a developed section for Post World War II Fire Stations constructed between 1947 and 1963 that proved relevant to the fire station in the broader Los Angeles Basin, including the City of Burbank (SurveyLA 2017).

##### *Los Angeles Citywide Historic Context Statement*

Within the LA HCS under the subtheme “Post World War II Fire Stations, 1947-1963”, there is an identified typology and associated time period noted as “The Second Wave, 1956-1963” that applies to KHA-BUR-01. This period is defined as a focus on new constructions that served the growing suburban population, and construction during this period was influenced by new developments in firehouse planning theory, including a preference for single-story stations, all supporting spaces having access to the equipment bay, stations located on a wide street close to an intersection with an arterial, and stations set back 30 feet from the road to permit clearance for the equipment in front of the doors. Additionally, technological changes to fire equipment, such as a transition from gasoline to diesel powered motors, led to an incorporation of overhead doors rather than folding doors. Stations from this period were usually built in the Mid-Century Modernism style popular at the time. Two of the fire stations constructed during this period in Los Angeles identified within the LA HCS were designed by Prescott & Whalley, who also designed KHA-BUR-01. The LA HCS identifies the following eligibility standards, character defining

features, and integrity associations for the postwar fire stations concentrated in the San Fernando Valley, some of which can be applied to similar resource types within the City of Burbank:

Eligibility Standards:

- Was constructed during the period of significance
- Is representative of municipal responses to post World War II growth
- Is associated with the 1947 or 1955 municipal bond measure in Los Angeles

Character Defining/Associative Features:

- Retains most of the essential character defining and features of the type and style from the period of significance
- Is a good to excellent example of the Late Moderne or Mid-Century Modern style as applied to an institutional building
- Has certain functional elements, e.g. equipment bays, staff quarters, hose drying towers and flagpoles, as well as optional elements such as handball courts and training facilities
- Illustrates features of the general architectural forms discussed in the Historic Context: two-story first wave reinforced concrete; single-story first wave reinforced concrete/masonry; single-story first wave stucco-on-wood-frame; two-story second wave reinforced concrete/brick; single-story second wave sloped roof; single-story second wave flat roof; unique forms
- Illustrates relationship between the station form and the setting, e.g. two-story reinforced concrete or brick forms for center city and dense neighborhood commercial settings, single-story forms for suburban/residential settings

Integrity Considerations:

- Should retain integrity of Design, Materials, Location, Feeling, and Association
- Is still readable as a fire station and has not undergone significant alterations or additions

When comparing KHA-BUR-01 to the above, the property meets the first two eligibility standards, as the fire house was built in 1956 and is representative of a response to post-World War II growth in the City. As the third standard is specific to the City of Los Angeles, it does not apply to KHA-BUR-01. As it relates to character-defining features of this resource type, the building is a moderate example of the Mid-Century Modern style, and has maintained features indicative of this style, such as the window openings/locations, overhangs, and rock wall/planter. Additionally, the property maintains a single-story with a flat roof that illustrates its relationship to a residential setting and seems to have retained some interior character-defining features, such as staff quarters. Some exterior character-defining features, specifically the flagpole, are still present, though others, such as the bay door and outdoor handball courts/training area, have been re-developed/alterd. Furthermore, other exterior character-defining features of Second Wave fire houses, such as drying towers, were not included in the original design of KHA-BUR-01. Upon further review, it was noted that the building has elements from the First Wave typology identified in the LA HCS for fire houses constructed between 1948 and 1953, including a dominant equipment bay with support spaces (e.g., office, dormitory, day room, kitchen, and storage) placed in secondary surrounding masses. As such, while the property has generally retained its original layout and many original features, it also strays from the design associated with Second Wave fire houses that was identified as significant for the applicable time period (SurveyLA 2017; Figures 7 and 19-20).

Figure 19: Example of First Wave (Station 71)

Figure 20: Example of Second Wave (Station 103)

### Evaluation Under NRHP Criteria

As noted above, the neighborhood within which KHA-BUR-01 was not identified as a significant historical area, nor was KHA-BUR-01 identified as a significant resource, within the City of Burbank's Citywide Historic Context Report. However, it was evident during review of the report that, though KHA-BUR-01 was historic in age at the time and, therefore, age-eligible for consideration, the report was focused on other resource types and did not prepare a detailed context with associated descriptions, a list character-defining features, essential aspects of integrity, or applicable criteria for Civic/Institutional Buildings. As such, KHA reviewed a Historic Context prepared by the City of Los Angeles that was applicable to KHA-BUR-01 and similar resource types across the region: "Post World War II Fire Stations, 1947-1963". This Historic Context and its developed eligibility standards, character defining features, and integrity associations outlined above were utilized in part to evaluate KHA-BUR-01 for eligibility for listing in the NRHP, with the understanding that any standards associated with the City of Los Angeles itself or its location within City limits boundaries would not apply to the structure in Burbank.

Criterion A

While the fire house is generally associated with the post-World War II population boom and associated housing, civil services, etc., it is not uniquely representative of this period or otherwise contribute to our broader understanding of the period. As such, KHA-BUR-01 is not recommended for listing in the NRHP under Criterion A.

Criterion B

Research did not identify the resource's association with any person or people significant to history. As such, KHA-BUR-01 is not recommended for listing in the NRHP under Criterion B.

Criterion C

Research identified that the building was constructed by Prescott & Whalley, a Burbank-based team who began their practice in the 1940s. Though the firm seemed to find some local success and specialized in the design of these types of public service buildings, though there is no indication that their designs were particularly unique in comparison to other same-age designs for similar resource types. Furthermore, though the building generally retains integrity of its original design and material, it does not convey the work of a master or serve as a strong or unique example of a significant resource type, primarily due to including elements from both First Wave and Second Wave designs, but not serving as a strong example of either. As such, the building is not recommended eligible for listing in the NRHP under Criterion C.

Criterion D

The property is not linked to any prehistoric activities and is unlikely to yield any information important to the prehistory of the area or United States. As such, the building is not recommended eligible for listing in the NRHP under Criterion D.

Integrity

As it relates to the integrity, KHA-BUR-01 has retained integrity of location, maintains an association with the growth of the City, and retains some of its integrity as it relates to design and materials. While research indicates the structure has undergone some level of renovation, survey observed the building likely retains the general layout of the original fire station and some of the original materials. However, more recent uses of the structure as a Boys & Girls Club has altered the aesthetic of the resource to the point that, while one may be able to eventually identify the original uses of the structure, it is not immediately apparent. In general, the structure does not easily or readily convey its origins as a fire station, and the general integrity of the building's workmanship has been diminished. This is perhaps also due to alterations made to the grounds of the structure and surrounding neighborhood since the 1950s, which no longer exhibits the original setting or conveys the original feeling of the fire house and its immediate vicinity.

## 5.0 RECOMMENDATIONS

This assessment did not identify Historic Properties within the APE. While the APE contains one (1) historic-era building, the building does not meet any criteria for listing in the NRHP based on review of the

resource within a broad Historic Context developed by the City of Burbank and an applicable Historic Context for mid-century fire houses developed by the City of Los Angeles. Additionally, the APE has a low likelihood for buried archaeological resources due to the level of previous disturbance related to prior development. As such, this study concludes that there are no Historic Properties within the APE and that the undertaking is unlikely to result in an adverse effect to Historic Properties. As such, it is recommended that the undertaking be provided a finding of “No Historic Properties Effected”.

 (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

KHA-BUR-01 is not recommended eligible for listing under any NRHP criteria. While the fire house is generally associated with the post-World War II population boom and associated housing, civil services, etc., it is not uniquely representative of this period or otherwise contribute to our broader understanding of the period. Furthermore, research did not identify the resource's association with any person or people significant to history, and while the architects of the building, Prescott & Whalley, managed to leave behind a successful footprint in the region with their design of similar buildings, research did not identify their designs to be particularly representative of this resource type. Furthermore, though the building generally retains integrity of its original design, it does not convey the work of a master or serve as a strong or unique example of this resource type, both due to its lack of original key character-defining features (i.e. the façade bay door) and given the original design seemed to omit some features identified as key to this resource type (i.e. the traditional tower). For these reasons, the building is not recommended eligible for listing in the NRHP under Criteria A, B, or C. Furthermore, the property is not linked to any prehistoric activities and is unlikely to yield any information important to the prehistory of the area or United States. As such, the building is not recommended eligible for listing in the NRHP under Criterion D.

\*Recorded by: Kimley-Horn Date 1/26/2025  Continuation  Update

(Description Continued)

In 1994, the building was leased to the Boys and Girls Club of Burbank and Greater East Valley and several modifications to the building were made during their tenancy. In 1997, the interior of the building was remodeled to convert the building from a fire station to a children's club. Unfortunately, research was unable to determine the previous interior layout and as such the extent of these changes to the building footprint is unknown. In 1998, an enclosed patio addition was added to the south of the building. Additional observed changes to the building from its historic condition include modifications to the roof and ceiling, exterior yard, addition of portable trailers to the property, and modifications to the original vehicle-bay doors. Additionally, extensive vandalism was observed to the interior of the building at the time of survey.

Review of historical topographic maps, aerial imagery, and city data of the APE indicates the subject parcel was undisturbed and undeveloped prior to 1928 until the mid-20th century. In 1941, the APE was included in the division of Tract number 4615, and land deeds from this year show that land sales of portions of the APE were made to two married couples in 1941; A.M. Dunn and Myrtle M. Dunn who purchased Lot 121, and Alene G. Guild and Charles H. Guild who purchased Lot 122. Mike Radich and C.T. Brown were also granted a deed that included a small portion of the northern APE based off an earlier 1938 land purchase. Imagery shows evidence of extensive soil disturbance by 1950 via the construction of the modern alignment of N. Buena Vista Street and development in the subject parcel of a residential structure and detached automobile garage in the south portion of the property. In 1955 and 1956, the City of Burbank purchased lots 121, 122, and 123 for the purpose of constructing a fire station. Deeds show that lot 121 was sold for a price of \$5,000 by the same owners recorded in 1941, A.M. Dunn and Myrtle Dunn, however Lot 122 was sold at a price of \$5,000 by "Roscoe Investment Company," and Lot 123 was sold at a price of \$14,000 by Peter and Effie Broadley. City Resolutions 10,659, 10,673, 10,674, 10,675, and 10,676 document the purchases of Lots 121, 122, 123, and 139 for the purpose of constructing

a Fire Station at the site and City Resolution 10,672 documents an invitation for contractors to bid on the construction. Prescott & Whalley architects were contracted to design the fire station, and a permit was granted in August, 1956. Alfred Prescott and Raymond Whalley were based in Burbank and began practicing in the late 1940s. Their firm was best known for their work in Burbank and their projects include the County Courts Building (1954), Burbank City Hall Annex (1959), and the St. Jerome Catholic Church in Westchester, CA (1966). Aerial imagery from 1956 shows the residence within the APE had been demolished and the fire station was constructed within the APE. This structure was used as a City of Burbank Fire Station between that time and 1994, first as Station No.3 and then later as Station No. 13. Records provided by the City show minimal changes occurred to the building footprint during this period, with only a lease agreement for three parking spaces included amongst records during this period.

The property was then leased to The Boys & Girls Club of Burbank and Greater East Valley from 1994 through 2021. The rental agreement is documented in City Resolution 24,131 and was amended in 1997 in Resolution 25,003. They made numerous improvements and modifications between 1995 and 2002, including modernization of electrical equipment in 1996, renovations to the interior of the building in 1997 with a total cost of \$14,000 (extent of renovations illegible in records), installation of an HVAC system in 1997, construction of an enclosed patio addition in 1999 totaling \$18,600, installation of fire safety equipment in 1999 and 2002, and improvements to the building's ceiling and roof in 2005. The Boys & Girls Club served about 75 children in the Burbank community and included award winning programs such as the Death and Hard of Hearing program added in 2004. The property has remained vacant since 2020 when the Boys & Girls Club vacated the property, and has since been subject to vandalism on the interior and exterior of the building.
